Peoria, Illinois.

Gentlemen:

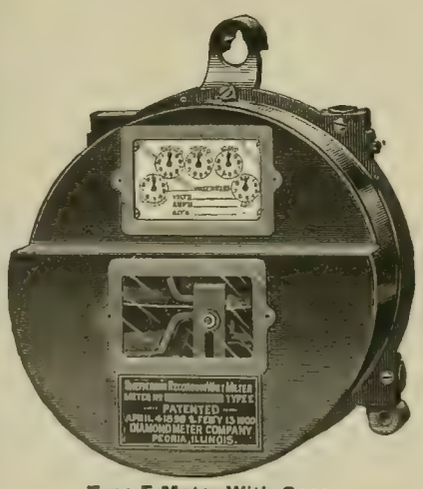
The United States Circuit Court of Appeals has rendered a decision in favor of the defendant in the case in which the Scheeffer meter, manufactured by you, was involved. This suit was based upon Tesla patents 511,559 and 511,560, which, their owner asserts, broadly cover all induction watt meters. The decision above referred to (which is by a court of last resort) leaves you free to make and sell, and your customers free to use, the induction watt meter you have been making.

Yours very truly,

Charles A. Brown

This refers more specifically to a suit brought by the Westinghouse Electric Mfg. Co. against the Catskill Illuminating & Power Co., Catskill, N. Y., for using the SCHEEFFER Induction Watt Meter manufactured by the DIAMOND METER CO., Peoria, Ill.

This suit was defended and won by the DIAMOND METER CO., and having been passed upon by the Court of Appeals the decision is final, therefore:



Type E Meter With Case.

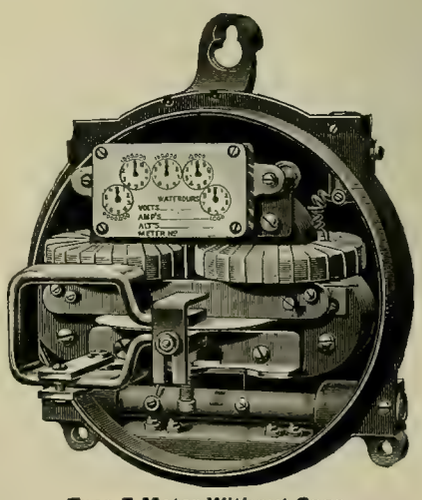
THE SCHEEFFER INDUCTION METER DOES NOT INFRINGE.

We are prepared to furnish our well and favorably known TYPE E meter to the trade and are in position to fill all orders promptly.

We shall continue the manufacture of our TYPE F Commutator Meter for Direct Current trade.

DIAMOND METER CO.,

PEORIA, ILL., - - - U. S. A.



Type E Meter Without Case.

The "Electra" Carbons are the recognized standard all the world over.

There are no Carbons better than the "Electra" and none "just as good."

H-U. ACCUMULATORS.

For ELECTRIC LIGHTING and RAILWAY CENTRAL and SUB-STATIONS, POWER STATIONS, TELEPHONE, TELEGRAPH, RAILWAY CAR LIGHTING and all other purposes to which Storage Batteries are applicable.

We guarantee LOWEST FIRST COST, HIGHEST EFFICIENCY, MOST CONSERVATIVE RATING and CHEAPEST MAINTENANCE.

DON'T WAIT FOR THE COURTS

to lower the price of coal, but install our system of underground steam mains, and sell your exhaust steam for heating purposes, instead of throwing it away. Now is the time to decide to install a plant.

You can increase your electric business.

You can pay your coal and labor bills.

You can defy competition.

You can give your friends and neighbors a supply of heat from a central station.

You can laugh at the coal trust.

Write us for pamphlet showing how it is done.

FOR SALE.

GENERATORS—500 Volts.

Two T. H., 500 K. W.
Four T. H., 270 K. W., arranged to be driven with a single pulley clutch coupling on each side of pulley.
One General Electric, 250 K. W.
One Westinghouse, 175 K. W.
Two General Electric, 100 K. W., 4 pole.
Two General Electric, 100 K. W., 6 pole.
Six Edison, No. 60, 175 K. W.
Six T. H., D62.
One Edison No. 20, 60 K. W.

GENERATORS—110 Volts.

Two 210 K. W., G. E. design, 14 pole, for direct connection, at a speed of 120 R. P. M.
Four 60 K. W. Edison.
Two 46 K. W. Edison.

ALTERNATING GENERATORS.

One 750 K. W., Westinghouse 60-cycle, 2-phase, 2,200 volt generator, belted to one 24 and 48x60 cross-compound condensing Cooper Corliss engine, complete.
Two 100 K. W., G.E. 3 phase, 60 cycle generator, complete.
Two 100 K. W., G. E., 1100 volts monocyclic, complete.
One 60 K. W., Westinghouse, 1100 volts.
One 35 K. W., Westinghouse, 1100 volts, complete.

STREET CAR EQUIPMENT.

One hundred and eighty 25 H. P. motors, new and complete with pinions, gear and gear cases.
One hundred and eighty "K" Controllers.
Twenty-five K-2 Controllers.

ENGINES.

Six 36 and 60x60, Cooper cross-compound, non-condensing, new, never shipped from factory.
One 30x54 St. Louis Corliss.
Two 24x60 Lane & Bodley, designed for rolling mill work.
One 28x60 Pennsylvania Iron Works Co.
One 20x48 Wheelock.
One 20x48 Double Wheelock.
One 20x42 Wheelock.
One 14x42 Hamilton Corliss.
Two 21x18 Armington & Sims.
Four 16 and 22x22 Houston, Stanwood & Gamble, cross-compound.
Five 12 and 20x16 tandem compound Ball.
Two 11 and 17x14 cross-compound Ideal.
Two 9 and 16x12 tandem compound Ball.
One 8 and 13x12 tandem compound Ball.
Three 17x18, Skinner, with air cylinders attached.
Two 16x20 Porter-Allen.
Two 15x20 Automatic Russell.
One 15½x15 Armington & Sims high speed simple automatic, 270 R. P. M.
One 15x15 Armington & Sims simple automatic, 270 R. P. M.
One 13½x15 Armington & Sims high speed simple automatic, 300 R. P. M.
One 14x17 Fisher, new.

BOILERS.

Four 66x18 with 66 4-inch tubes. A complete battery at a great bargain.
Three 66 x 14, with 66 4-inch tubes.
Two 72 in. x 18 ft., with 66 4-inch tubes.
Five 60x16 ft. high pressure boilers
Two Sterling Water Tube Boilers, 250 H.P. each.
Two 500 H. P. Hazelton.

FERRIS WHEEL.

One 60 ft. Ferris Wheel, electrically driven.

AT A BARGAIN — A complete Edison 3-wire plant of 300 K. W. capacity.

It will be profitable to wire or write us giving requirements of machinery wanted or for sale.

Salary Increased 150% Through the I. C. S.

When I enrolled in the I. C. S., I was receiving thirty dollars a month as dynamo tender. Entirely as a result of the knowledge gained through my Course, I have advanced to the position of assistant electrical engineer of the State Hospital at Dannemora, N. Y.; and receive a salary of seventy-five dollars a month. I believe that any one who will study an I. C. S. Course can advance himself both in salary and position. Herbert B. Brand,
Dannemora, Clinton Co., N. Y.

This is but one of many hundred indorsements, proving that our students succeed. Our new free booklet, "1001 Stories of Success," gives the names, addresses, and progress of over a thousand other students whom we have placed on the road to progress and prosperity. Every student of the I. C. S. is entitled to the assistance of the Students' Aid Department in securing advancement or a new position. Our Courses cost from $10 up. Terms easy. No books to buy. Start TODAY to rise!

Fill out and send in the coupon NOW!

INTERNATIONAL CORRESPONDENCE SCHOOLS,
Box 1029, SCRANTON, PA.
Please send me, free, a copy of "1001 Stories of Success," and explain how I can qualify for the position before which I have marked X below.

HOOKS

Labor saving devices are always welcome to the lineman, but never more so than when he is at the top of a thirty-foot pole on a cold winter's day. Twenty minutes saved there is worth more than dollars and cents to the lineman's employer in the long run.

Suspension Hooks for Type A Transformers.

With the "Wood" patent cam-locking suspension hooks shipped with Type A transformers, after the transformer is set in place it can be locked fast to the hooks by a couple of taps with a hammer—or a pair of pliers. And there need be no frozen fingers or loosely hung transformers.

IDEAL FIRE PROTECTION FOR ALL ELECTRICAL APPARATUS.
Highest Awards at National Export, Central Canadian, Pan-American and Charleston Expositions.
MONARCH FIRE APPLIANCE CO.,
247-249 Pearl St., New York City.

VILLARD AUTOMATIC DUCT RODS ARE THE BEST RODS—THEY STAND THE TEST.

Wheeled.

These rods are coupled and uncoupled instantly and with ease. They will not buckle or form a zigzag line and are very light running. They are perfectly rigid when pushed, and become flexible when pulled. They cannot be uncoupled in the ducts, the rear end of a rod having to be raised to an angle of forty-five degrees to detach it. One man can push it with ease 600 feet and a hard blow can be struck with telling effect without the slightest injury to the rods. The wheels serve as duct cleaners as well as obviate friction. The castings are made of solid bronze and malleable iron as desired, with wheels of chilled iron. The rods are made of hickory well seasoned in oil to prevent decay. They are put up in sets of 200 rods or 600 feet.

With Solid Bronze Couplings.		With Malleable Iron Couplings.	
3 FT., WHEELED.	LIST PRICE, $1.35	3 FT., WHEELED.	LIST PRICE, $1.10
3 " WHEELLESS.	" " 1.15	3 " WHEELLESS.	" " .80

Discount upon application. Other lengths to order. Send for descriptive circular.

WESTON Electrical Instrument Co.,
Waverly Park, NEWARK, N. J.

Illuminated Dial Station Instruments.
These instruments are constructed upon the same general principle as our regular Standard Portable Direct Current Voltmeters and Ammeters, but are much larger, and the working parts are inclosed in a neatly designed dust-proof cast-iron case which effectively shields the instruments from disturbing influences of external magnetic fields.
BERLIN—European Weston Electrical Instrument Co., Elsterstrasse No. 83.

Weston Standard Illuminated Dial Station Ammeter, Style B. "Flush Type."

Weston Standard
Portable Direct Reading Voltmeters and Millivoltmeters. Ammeters and Milliammeters, Wattmeters and Voltmeters, for Alternating and Direct Current Circuits.
Our portable instruments are recognized as standards throughout the civilized world.
Our Semi-Portable Laboratory Standard Voltmeters and Ammeters are [illegible].
They are the most reliable, absolute standards for Laboratory use.
LONDON—Elliott Bros., Century Works, Lewisham.

MANUFACTURED BY

G. I. Co.

CHICAGO EDISON COMPANY, 139 Adams Street, CHICAGO.

. . . THE . . .

NERNST LAMP

MORE LIGHT FOR LESS MONEY.

Advantages Over the Incandescent Lamp.

1—Requires only about ½ as much current per candlepower.
2—Gives a natural white light LIKE THE SUN'S RAYS, bringing out more clearly the true color of fabrics, etc.
3—75 per cent. of the light is thrown downward without any shadows.
4—Can be had in units of 50, 100, 170 and 400 candlepower.

Advantages Over the Arc Lamp.

1—Does not flicker, hum nor make any noise, being an absolutely steady light.
2—Gives a natural white light instead of a bluish white.
3—Light is thrown downward, instead of on the sides, and no shadows are cast.
4—Power factor is 100 per cent.

ELECTROLYSIS-PROOF

UNDERGROUND CONDUIT

OUR CONDUIT IS { *Absolutely— Electrolysis-Proof, Non-Abrasive, Moisture-Proof, Non-Corrosive, Perfect Insulator.* }

Insulation Test, **66,000 VOLTS.**

A perfect joint which is self-aligning, making the conduit line a solid tube from manhole to manhole.

Construction simple, rapid and inexpensive, requires no skilled labor.

Cables drawn more easily and a longer distance than in any other.

Resistance strength when underground as great as any.

Life of Conduit everlasting. Asphalt never deteriorates.

One General Electric, 250 K. W.
One Westinghouse, 175 K. W.
Two General Electric, 100 K. W., 4 pole.
Two General Electric, 100 K. W., 6 pole.
Six Edison, No. 60, 175 K. W.
Six T. H., D62.
One Edison No. 20, 60 K. W.

GENERATORS—110 Volts.

Two 210 K. W., G. E. design, 14 pole, for direct connection, at a speed of 120 R. P. M.
Four 60 K. W. Edison.
Two 46 K. W. Edison.

ALTERNATING GENERATORS.

One 750 K.W., Westinghouse 60-cycle, 2-phase, 2,200 volt generator, belted to one 24 and 48x60 cross-compound condensing Cooper Corliss engine, complete.
Two 100 K. W., G.E. 3 phase, 60 cycle generator, complete.
Two 100 K. W., G. E., 1100 volts monocyclic, complete.
One 60 K. W., Westinghouse, 1100 volts.
One 35 K. W., Westinghouse, 1100 volts, complete.

STREET CAR EQUIPMENT.

One hundred and eighty 25 H. P. motors, new and complete with pinions, gear and gear cases.
One hundred and eighty "K" Controllers.
Twenty-five K-2 Controllers.

ENGINES.

Six 36 and 60x60, Cooper cross-compound, non-condensing, new, never shipped from factory.
One 30x54 St. Louis Corliss.
Two 24x60 Lane & Bodley, designed for rolling mill work.
One 28x60 Pennsylvania Iron Works Co.
One 20x48 Wheelock.
One 20x48 Double Wheelock.
One 20x42 Wheelock.
One 14x42 Hamilton Corliss.
Two 21x18 Armington & Sims.
Four 16 and 22x22 Houston, Stanwood & Gamble, cross-compound.
Five 12 and 20x16 tandem compound Ball.
Two 11 and 17x14 cross-compound Ideal.
Two 9 and 16x12 tandem compound Ball.
One 8 and 13x12 tandem compound Ball.
Three 17x18, Skinner, with air cylinders attached.
Two 16x20 Porter-Allen.
Two 15x20 Automatic Russell.
One 15½x15 Armington & Sims high speed simple automatic, 270 R. P. M.
One 15x15 Armington & Sims simple automatic, 270 R. P. M.
One 13½x15 Armington & Sims high speed simple automatic, 300 R. P. M.
One 14x17 Fisher, new.

BOILERS.

Four 66x18 with 66 4-inch tubes. A complete battery at a great bargain.
Three 66 x 14, with 66 4-inch tubes.
Two 72 in. x 18 ft., with 66 4-inch tubes.
Five 60x16 ft. high pressure boilers.
Two Sterling Water Tube Boilers, 250 H.P. each.
Two 500 H. P. Hazelton.

FERRIS WHEEL.

One 60 ft. Ferris Wheel, electrically driven.

AT A BARGAIN — A complete Edison 3-wire plant of 300 K. W. capacity.

It will be profitable to wire or write us giving requirements of machinery wanted or for sale.

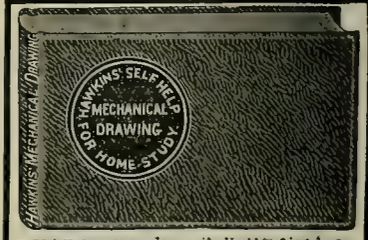
SAMSON TURBINE

If you are contemplating the improvement of a water-power where a TURBINE will be required, we can interest you. This is especially true if you wish to use the TURBINE for driving GENERATOR or DYNAMO.

HIGH EFFICIENCY at REDUCED GATEAGE, QUICK SPEED, BALANCED GATES, are just a few of the many points of excellence embodied in the SAMSON. Write Dept. D. for catalog.

JAMES LEFFEL & CO., SPRINGFIELD, OHIO, U.S.A.

Learn to Draw



THIS BOOK as shown in illustration is a self-instructor for home study and practice in the art of MECHANICAL DRAWING for ENGINEERS, MACHINISTS, ELECTRICIANS, METAL WORKERS and all interested in drafting for shop practice, and has been prepared in a plain practical language and illustrated by the author of "HAWKINS' EDUCATIONAL WORKS." The book is divided into 28 different subjects which comprise the fundamental principals of drawing, each heading being thoroughly treated.

There are 320 pages 300 illustrations and diagrams. The book is handsomely bound in green cloth, gold edges and titles, size 7x10½ in., printed on fine paper. Upon receipt of price, the book will be sent to any address prepaid, money returned if not as represented. Order to-day.

ELECTRICITY MADE SIMPLE.

233 Pages. 108 Illustrations. **By CLARK CARYL HASKINS.** Cloth $1.00. Paper .50.

A BOOK DEVOID OF TECHNICALITIES—SIMPLE, PLAIN AND UNDERSTANDABLE.

There are many elementary books about electricity upon the market, but this is the first one presenting the matter in such shape that the layman may understand it, and, at the same time, not written in a childish manner.

This little work is not intended for the instruction of experts, nor as a guide for professors. The author has endeavored to bring the matter down to the level of those whose opportunities for gaining information on the branches treated have been limited.

Four chapters are devoted to Static Electricity; three each to Chemical Batteries and Light and Power; two each to Terrestrial Magnetism and Electro-Magnetism; one each to Atmospheric Electricity; Lightning Rods; Electro-Chemistry; Applied Electro-Magnetism; Force, Work and Energy; Practical Application of Ohm's Law; also a chapter upon Methods of Developing Electricity, other than Chemical.

The large number of examples that are given to illustrate the practical application of elementary principles is gaining for it a reputation as a text book for schools and colleges.

FOR ENGINEERS, DYNAMO MEN, FIREMEN, LINEMEN, WIREMEN AND LEARNERS. FOR STUDY OR REFERENCE.

ELECTRICIAN PUBLISHING CO., 510 MARQUETTE BLDG., CHICAGO.

HOOKS

Labor saving devices are always welcome to the lineman, but never more so than when he is at the top of a thirty-foot pole on a cold winter's day. Twenty minutes saved there is worth more than dollars and cents to the lineman's employer in the long run.

Suspension Hooks for Type A Transformers.

With the "Wood" patent cam-locking suspension hooks shipped with Type A transformers, after the transformer is set in place it can be locked fast to the hooks by a couple of taps with a hammer—or a pair of pliers. And there need be no frozen fingers or loosely hung transformers.

I-T-E SWITCHBOARD PRACTICE.

HAVE YOU A COPY?

WE WILL GIVE YOU ONE.

Send thirty-six cents in two-cent stamps, mention this advertisement, and we will send you a copy, by express prepaid.

"I-T-E SWITCHBOARD PRACTICE."

Finely printed on enameled paper, 243 pages; size, 9x11. Fully illustrated and handsomely bound in cloth extra.

REGULAR PRICE, $3.00 NET.

IN 1898 we published "Modern Switchboards," for which we have had a constantly increasing demand. This book has been for some time out of print and will not be reprinted. The present volume, "Switchboard Practice," brings the subject of switchboard design, construction and maintenance right down to date. It is complete in every detail.

If you are interested in electricity, or about to install an electric plant for lighting or power purposes, direct or alternating current, or to enlarge your present plant, you cannot afford to be without our engineers' reference book,

"Switchboard Practice."

Not only does it describe the uses and advantages of a great variety of protective devices for use with dynamos, transformers, motors and motor-driven tools, but it also describes the principle on which the best electrical measuring instruments are designed.

Full specifications are given for switchboards for light and power purposes, together with diagrams of connections.

To the architect and engineer this book is invaluable, and to the manager of the manufacturing plant about to put in an electric power plant to drive his machinery, this book places before him the electrical information that is absolutely necessary.

An important chapter on Street Railway Switchboards will be of interest to every railway engineer.

ELECTROLYSIS-PROOF

UNDERGROUND CONDUIT

OUR CONDUIT IS { *Absolutely— Electrolysis-Proof, Non-Abrasive, Moisture-Proof, Non-Corrosive, Perfect Insulator.* }

Insulation Test, **66,000 VOLTS.**

A perfect joint which is self-aligning, making the conduit line a solid tube from manhole to manhole.

Construction simple, rapid and inexpensive, requires no skilled labor.

Cables drawn more easily and a longer distance than in any other.

Resistance strength when underground as great as any.

Life of Conduit everlasting. Asphalt never deteriorates.

EDISON TELEPHONE LAMPS

ARE

The Standard for Visual Signals.

They save the "Exchange" time and money; because every lamp is perfect. Sure to fit. Sure to burn. The life is extremely long—running into years.

Be sure to get the EDISON.

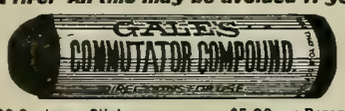
SPARKING

Reduces the working capacity of a motor or dynamo, wears out the commutator, wastes power and may cause a fire. All this may be avoided if you use . . . . . .



The only article that will PREVENT SPARKING. Will keep the Commutator in good condition and PREVENT CUTTING.

Absolutely Will Not Gum The Brushes.

It will put that high gloss on the Commutator you have so long sought after.

PROPOSALS

For the Construction of an Electric-Lighting Plant for the City of Mankato, Minn.

Sealed proposals will be received by the city recorder of the city of Mankato, Minn., for the furnishing and installing of a municipal electric-lighting plant, in and for the city of Mankato, Minn., in strict accordance with the plans and specifications prepared therefore by W. I. Gray & Co., engineers. Plans and specifications are now placed on file at the following places for the convenience and use of bidders: At the recorder's office, Mankato, Minn.; W. I. Gray & Co.'s office, 804 Sykes Block, Minneapolis, Minn., and Geo. Cutter Co.'s office, Union and Fulton Streets, Chicago, Ills. Proposals will be received up to 2 o'clock p. m., Monday, March 30th, 1903, at which time they will be opened and made public. The common council reserves the right to reject any and all bids, as in the opinion of the council will be most advantageous to the city of Mankato.

Dated at Mankato, Minn., March 14th, 1903.

J. B. HODAPP, City Recorder.

GUNS $1.00 EACH.

U. S. Army guns, as curiosities, for cosey corners, dens, etc.

STREET LIGHTING CITY OF WEBSTER GROVES, MISSOURI.

Sealed proposals for lighting the streets and public places of the city of Webster Groves, Mo., with approximately 200 20 c. p. incandescent lamps, for a period of ten years beginning September 1, 1903, will be received at the office of the City Clerk, Webster Groves, until 8 p. m. Monday, April 6th, 1903, to be opened immediately thereafter, at an open meeting of the Board of Aldermen.

The successful bidder will be granted a 20-year franchise for private lighting.

Plans and specifications may be seen at the office of the City Clerk, also at the office of William H. Bryan, Consulting Engineer, 706 and 707 Lincoln Trust Building, St. Louis, Mo.

Each proposal must be accompanied by a certified check payable to the City Treasurer of Webster Groves, for $500.00.

The right is reserved to reject any or all bids, and to waive informalities.

C. O. TWINING,
Chairman Committee on City Lighting.

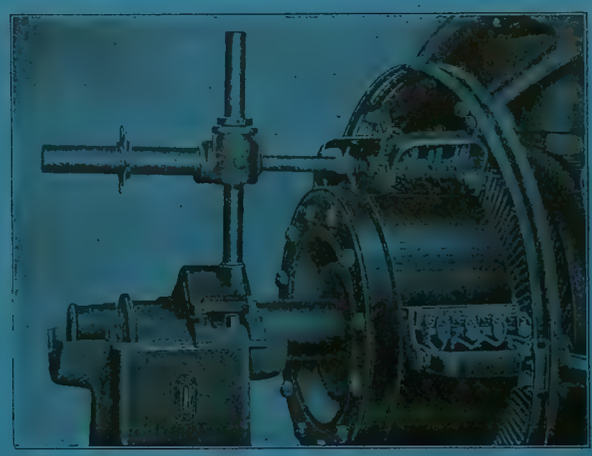
COMMUTATOR TRUING DEVICES



Truing Device Mounted on 150 KW. Generator.

The above shown truing device is admirably adapted to the needs of the central station man. With this one device he can keep the commutators of nearly all machines under 200 kilowatts' capacity in perfect condition.

It is quickly and easily adjusted and is always ready for use.

It has been in use for years on machines of Fort Wayne manufacture and is now offered to the trade in perfected shape.

Bulletin 1038 treats of it.

We also build arc lamps for ALL CIRCUITS

SEND FOR FULL DESCRIPTION. OSBORN-MORGAN CO., KELLY STREET, CLEVELAND, O.

PITTSBURGH TRANSFORMERS.

Winding and Insulation of the coils form the most important operation in transformer building. In winding the Type K, the iron core, suitably insulated, is placed in the lathe and the secondary coil wound directly upon it. Flexible mica insulation, re-inforced and protected, is then wrapped around the secondary, and upon this is wound the primary coil, thus forming one solid member. :: :: :: (*From Catalogue C.*)

ELECTROLYSIS-PROOF

UNDERGROUND CONDUIT

OUR CONDUIT IS { *Absolutely— Electrolysis-Proof, Non-Abrasive, Moisture-Proof, Non-Corrosive, Perfect Insulator.* }

Insulation Test, 66,000 VOLTS.

A perfect joint which is self-aligning, making the conduit line a solid tube from manhole to manhole.

Construction simple, rapid and inexpensive, requires no skilled labor.

Cables drawn more easily and a longer distance than in any other.

Resistance strength when underground as great as any.

Life of Conduit everlasting. Asphalt never deteriorates.

STROMBERG-CARLSON SWITCHBOARDS

(1 SECTION MULTIPLE LAMP SIGNAL SWITCHBOARD READY FOR SHIPMENT)

The foundations of successful telephone exchanges *are built of the best grade of material throughout*

NOTE CONSTRUCTION OF SECTIONS SHOWN

Will Stand Critical Examination

WHY?

Because no hidden part is used unless it is absolutely perfect.

Because each part can be explained and illustrated to the minutest detail.

Because they have been purchased for many of the largest telephone systems.

Mention this paper and we will mail bulletins on various lines of our apparatus as fast as they are published.

EDISON TELEPHONE LAMPS

ARE THE

STANDARD FOR VISUAL SIGNALS.

They save the exchange time and money because every lamp is perfect—sure to fit—sure to burn. The life is extremely long—running into years.

Be sure to get the EDISON.

EDISON DECORATIVE & MINIATURE LAMP DEPARTMENT

GENERAL ELECTRIC COMPANY,

Harrison, N. J.

We Make All Kinds of Boxes and Cabinets for the Electrical Trade.

WE CAN ACCURATELY DRILL THEM FOR YOU SO THAT THEY ARE ALL READY FOR THE ASSEMBLING OF THE METAL PARTS. SEND US YOUR SPECIFICATIONS AND LET US QUOTE YOU.

LA CROSSE CABINET CO.

LA CROSSE, WIS.

These two cuts show our new Compact Cabinet with nickel-plated brackets supporting the paper shelf. The paper shelf and nickel-plated brackets are removed in shipping. Doing this saves room, avoids scratching, and facilitates shipping.

The nickel-plated brackets make a handsome contrast with he highly finished quarter-sawed oak front and paper shelf.

WE CAN FURNISH THESE CABINETS ALL DRILLED

READY FOR THE WORKING PARTS.

In addition to the above cabinet, we make all of the standard styles including

CENTRAL ENERGY, MAGNETO BOXES, CABINETS FOR RESIDENCE PHONES, ETC.

Our Specialty is HIGH-GRADE FINISH AND ACCURATE WORK.

SOMETHING NEW

SELF-CONTAINED DESK TELEPHONE

Instant accessability to every part, contact, etc., by the simple unscrewing of one milled thumb nut, shown just above hook—neither hook nor frame in circuit. Self-cleaning contacts of platinum.

Solid nickeled brass frame.

Write for our new Artistic Catalogue.

OUR BATTERY DEPARTMENT

has just published a most complete and compact catalogue upon the leading

PRIMARY BATTERIES

which takes in all forms of Dry and Wet Batteries. This catalogue greatly clears up the battery situation, giving in a concise, clear manner the true value of "Leading Batteries."

THE NUNGESSER NO. 3 CELL

is really a wonderful battery, taking the place of many other forms at less cost and TO MUCH GREATER ADVANTAGE. The catalogue covers the details which are well worth knowing.

Address **BATTERY DEPARTMENT,** Electric Appliance Company,

92 and 94 West Van Buren Street, CHICAGO.

EXPERIENCE TEACHES

Experience no doubt has taught you to use only the highest grade signal lamps on your switchboards to properly demonstrate their efficiency, not the cheapest.

Experience with the aid of our complete factory equipment and technical department has taught us to supply for commercial use a lamp covering all the features of merit to make telephony practical by lamp signals.

A sample order for test will teach you of our reliability and lead to quotations on your yearly supply.

L. B. 382, CALLIPOLIS, O.

STREET LIGHTING CITY OF WEBSTER GROVES, MISSOURI.

Sealed proposals for lighting the streets and public places of the city of Webster Groves, Mo., with approximately 200 20 c. p. incandescent lamps, for a period of ten years beginning September 1, 1903, will be received at the office of the City Clerk, Webster Groves, until 8 p. m. Monday, April 6th, 1903, to be opened immediately thereafter, at an open meeting of the Board of Aldermen.

The successful bidder will be granted a 20-year franchise for private lighting.

Plans and specifications may be seen at the office of the City Clerk, also at the office of William H. Bryan, Consulting Engineer, 706 and 707 Lincoln Trust Building, St. Louis, Mo.

Each proposal must be accompanied by a certified check payable to the City Treasurer of Webster Groves, for $500.00.

The right is reserved to reject any or all bids, and to waive informalities.

C. O. TWINING,
Chairman Committee on City Lighting.
Webster Groves, Mo., March 11, 1903.

HELP WANTED.

187½ kw., Westinghouse, M. P. 8, 120-volt Generator, direct connected to Westinghouse Compound Engine.

50 kw., Commercial, M. P., 125 volts, Compound Wound Generator, with 8½ and 13x12 Armington & Sims Tandem Compound Engine. One year old.

50 kw., Eddy Compound Generator, 125 volts, direct connected to 13x13 Harrisburg Ideal Engine.

25 kw., 250-volt Westinghouse Generators, direct connected to self-oiling Ball Engines.

25 kw., General Electric, 110 volts, 4 pole, Compound Wound Generator, with 9½x10 Armington & Sims Engine.

2—25 kw., 125 volt General Electric Generators, direct connected to one Triple Expansion Marine Vertical Engine.

ALTERNATING.

2—250 kw., G. E., 2,400 volts, 50 cycles, 3-phase.
2—200 kw., G. E., 2,300 volts, 40 cycles, 3-phase.
1—150 kw., Stanley, 1,000 or 2,000 volts, 133 cycles.
2—120 kw., G. E., 2,000 volts, 125 cycles.
2—120 kw., G. E., 1,040 volts, 125 cycles.
1—100 kw., G. E., 2,080 volts, 60 cycles.
1—60 kw., G. E., 1,040 volts, 125 cycles.
1—A35 T.-H., 1,000 volts, 125 cycles.

RAILWAY GENERATORS.

2—500 kw., 6-pole General Electric.
2—225 kw., 6 pole General Electric.
2—200 kw., 4-pole General Electric.
1—200 kw., M. P. 6, Westinghouse.
1—175 kw., M. P. 4, Westinghouse.
2—150 kw., M. P. 6, Westinghouse.
2—110 kw., 4-pole Eddy.
1—100 kw., 4-pole Walker.
3—100 kw., 4-pole General Electric.
1—100 kw., Edison Bipolar.
2— 90 kw., Thomson-Houston.
1— 80 kw., General Electric.
2— 80 kw., Detroit.
5—D62 Thomson-Houston.

ENGINES.

1—14x14 Rice Automatic.
2—13 and 23x17 Tandem Compound McIntosh & Seymour.
2—10 and 18x20 Payne Compound.
1—13x12 Armington & Sims.
1—12 and 20x12 Westinghouse Compound.
1—7x8 Payne.
1—18x48 Geo. H. Corliss.
1—16x42 Greene.
1—10½ and 16½x12 Cross Compound Armington & Sims.
2—26x48 Providence Greene.
2—18 and 30x16 Westinghouse Compound.
3—18½x18 Armington & Sims.
1—18½x18 New York Safety.
1—20x48 Harris-Corliss.

BOILERS.

7—163 H. P. Babcock & Wilcox.
5—250 H. P. Climax.
1—600 H. P. Climax.
2—66x16 Return Tubular.
2—66x18 Return Tubular.

ARC GENERATORS.

No. 12 Brush, 150 light, 9.6 amp.
No. 11 Brush, 125 light, 9.6 amp.
No. 9B Brush, 120 light, 6.6 amp.
M. D. 2 T.-H., 50 light, 9.6 amp.
L. D. 12 T.-H., 75 light, 6.6 amp.
M. 12 T.-H., 45 light, 6.6 amp.

A large assortment of Arc Lamps all in good working order, for direct and alternating currents, series and multiple circuits. Also a fine lot of Transformers, especially General Electric Type H. and Thomson-Houston Type F.

FOR SALE.

GENERATORS—500 Volts.

Two T. H., 500 K. W.
Four T. H., 270 K. W., arranged to be driven with a single pulley clutch coupling on each side of pulley.
One General Electric, 250 K. W.
One Westinghouse, 175 K. W.
Two General Electric, 100 K. W., 4 pole.
Two General Electric, 100 K. W., 6 pole.
Six Edison, No. 60, 175 K. W.
Six T. H., D62.
One Edison No. 20, 60 K. W.

GENERATORS—110 Volts.

Two 210 K. W., G. E. design, 14 pole, for direct connection, at a speed of 120 R. P. M.
Four 60 K. W. Edison.
Two 46 K. W. Edison.

ALTERNATING GENERATORS.

One 750 K.W., Westinghouse 60-cycle, 2-phase, 2,200 volt generator, belted to one 24 and 48x60 cross-compound condensing Cooper Corliss engine, complete.
Two 100 K. W., G.E. 3 phase, 60 cycle generator, complete.
Two 100 K. W., G. E., 1100 volts monocyclic, complete.
One 60 K. W., Westinghouse, 1100 volts.
One 35 K. W., Westinghouse, 1100 volts, complete.

STREET CAR EQUIPMENT.

One hundred and eighty 25 H. P. motors, new and complete with pinions, gear and gear cases.
One hundred and eighty "K" Controllers.
Twenty-five K-2 Controllers.

ENGINES.

Six 36 and 60x60, Cooper cross-compound non-condensing, new, never shipped from factory.
One 30x54 St. Louis Corliss.
Two 24x60 Lane & Bodley, designed for rolling mill work.
One 28x60 Pennsylvania Iron Works Co.
One 20x48 Wheelock.
One 20x48 Double Wheelock.
One 20x42 Wheelock.
One 14x42 Hamilton Corliss.
Two 21x18 Armington & Sims.
Four 16 and 22x22 Houston, Stanwood & Gamble, cross-compound.
Five 12 and 20x16 tandem compound Ball.
Two 11 and 17x14 cross-compound Ideal.
Two 9 and 16x12 tandem compound Ball.
One 8 and 13x12 tandem compound Ball.
Three 17x18, Skinner, with air cylinders attached.
Two 16x20 Porter-Allen.
Two 15x20 Automatic Russell.
One 15½x15 Armington & Sims high speed simple automatic, 270 R. P. M.
One 15x15 Armington & Sims simple automatic, 270 R. P. M.
One 13½x15 Armington & Sims high speed simple automatic, 300 R. P. M.
One 14x17 Fisher, new.

BOILERS.

Four 66x18 with 66 4-inch tubes. A complete battery at a great bargain.
Three 66 x 14, with 66 4-inch tubes.
Two 72 in. x 18 ft., with 66 4-inch tubes.
Five 60x16 ft. high pressure boilers.
Two Sterling Water Tube Boilers, 250 H.P. each.
Two 500 H. P. Hazelton.

FERRIS WHEEL.

One 60 ft. Ferris Wheel, electrically driven.

AT A BARGAIN — A complete Edison 3-wire plant of 300 K. W. capacity.

It will be profitable to wire or write us giving requirements of machinery wanted or for sale.

New Standard Specialties.

DRY CELL.

If kept out of the sun, in a cool dry place, this cell will not run down on the shelf in two years, and at the end of that time will be as good as other makes fresh from the factory. To maintain its superiority to all others, no expense is spared, and only the best materials and chemicals are used in its manufacture

This cell will save the consumer money, because a fewer number will perform a given amount of work four times as long as any other cell of equal size.

ELECTRICAL BOOKS.
All Kinds.
ELECTRICIAN PUBLISHING COMPANY,
Suite 510 Marquette, CHICAGO.

EDWARDS AND CO
The R. E.-A. L. Monitor Bell.
(Patented.)
Hammer rod supported in two places and thrown straight out and in by the armature, striking gong on inside, near edge thus giving a full clear tone.
All springs made of Phosphor Bronze and so formed that there is least possible strain.
Contacts are platinized, adjustment is made by pressure on the standard which supports one contact. No screws or nuts being used in the adjustment, bell does not get out of order by operation.
Ordinarily the weak point is the pivot, the unreliable one the adjusting screw and nut. As these defects have been eliminated this bell will stand hard usage and operate under adverse conditions.
The hammer entirely concealed by gong and cannot be tampered with.
It is especially adapted for use on street cars as, in addition to the advantages mentioned, it is dust, insect and moisture proof.

IMPORTANT TELEPHONE BOOKS.

THE TELEPHONE HANDBOOK. By Herbert Laws Webb. 16mo, 150 pp. Price $1.00.
This handbook is a reliable treatise on telephony, and a practical book on telephone working and management, based entirely on standard American practice. It is extremely useful to telephone inspectors and operators.

AMERICAN TELEPHONE PRACTICE. By Kempster B. Miller, M. E. 510 pp. 380 illustrations. Price $3.00.
This is the first complete treatise on telephony in the English language. The text is profusely illustrated by cuts of commercial apparatus and carefully prepared diagrams of circuits. No diagram is given without a full explanation. The apparatus, circuits and methods of the American Bell Telephone Company and of the various independent companies are fully described. The apparatus and methods used in making all of the tests required in commercial telephone work are fully treated.

THE INSPECTOR AND TROUBLE MAN. By A. E. Dobbs. 106 pp. Price $1.00.
A practical book, written in plain language. Full of information and diagrams for the operator, exchange manager, inspector, trouble man and lineman. A complete description of telephones, how to find and remedy their troubles, together with working plans for exchange construction, complete with diagrams of all up-to-date telephones and switchboards.

A, B, C, OF THE TELEPHONE. By J. E. Homans, A. M. 352 pp. 269 illustrations. Price $1.00.
Owing to the demand for a comprehensive book giving a clear, terse idea of the principles governing the construction, installation, care and management of telephones and their appliances, this book has been compiled. It has been the aim of the author to make this the most complete elementary book on this subject for the practical electrician, wireman, lineman and engineer, and it is written in a clear and careful style.

THE PRACTICAL TELEPHONE HANDBOOK. By Joseph Poole, A. I. E. E. Second edition, revised and enlarged. 360 pp. 288 illustrations. Price $1.50.
In this work the writer has endeavored to produce a manual of moderate size and cost, but thoroughly practical, and detailing, as far as space will allow, the most recent methods of telephone working. While the requirements of telephone employes have been kept constantly in view it is fully intended also that the book shall be of service as a source of information on telephonic matters to users of the telephone and to the public generally.

PRACTICAL FEATURES OF TELEPHONE WORK. By A. E. Dobbs. 134 pp. Price 75 cents.
A simple, plain-speaking handbook for the practical telephone man.

TELEPHONE TROUBLES AND HOW TO FIND THEM. A complete handbook for telephone inspectors. By W. Hyde and J. H. McManman, edited by Prof. C. H. Haskins. Eighth edition. 16mo, 48 pp. Price 25 cents.
This little volume is an extremely practical work for telephone employes, written in a popular style and devoid of technicalities.

TELEPHONE LINES AND THEIR PROPERTIES. By Wm. J. Hopkins. Sixth edition. 272 pp. Illustrated. Price $1.50.

A MANUAL OF TELEPHONY. A new and large edition. By W. H. Preece, F. R. S., and A. J. Stubbs. 508 pp. 333 illustrations. Price $4.50.

TELEPHONES, THEIR CONSTRUCTION AND FITTING. A Practical Manual on the Fitting Up and Maintenance of Telephone and Auxiliary Apparatus. By F. C. Allsop. 191 pp. 168 illustrations. Price $1.25.

TELEPHONING OF GREAT CITIES. By Bennett. Paper. Price 35 cents.

MAGNETO HAND TELEPHONE. Its Construction, Fitting Up and Adaptability to Everyday Use. By Hughes. 80 pp. 23 illustrations. Price $1.00.

ELECTRICAL TRANSMISSION OF INTELLIGENCE AND OTHER ADVANCED PRIMERS OF ELECTRICITY, treating on the telegraph, telephone, etc. By E. J. Houston. 330 pp. 88 illustrations. Price $1.00.

The Above, or Any Other Electrical Work Published, Sent on Receipt of Price.

ELECTRICIAN PUBLISHING CO., 510 MARQUETTE BLDG., CHICAGO.

...THE...

Pillsbury Alternating Current Ceiling Fan

Has an induction type motor, no gears or pulleys. Blades attached directly to revolving armature. Armature supported on ball bearings immersed in oil, thus practically doing away with all friction.

SUBSCRIPTIONS.

With January 1st began the thirty-second volume of the WESTERN ELECTRICIAN, and during 1903 it will complete its sixteenth and the first half of its seventeenth year, the paper having been founded July 2, 1887, and continued under the present management for this entire period. We offer the past as a guaranty of the future, and in addition pledge the best efforts of an experienced and competent staff to the constant improvement of the paper.

The WESTERN ELECTRICIAN is published for the purpose of assisting everyone interested in the art. It is a general electrical and scientific paper, and gives to its readers all the latest news and keeps them thoroughly informed of everything that is going on in all the different departments of the electrical and allied fields. Its technical and scientific articles cover all the latest inventions and improvements and keep the reader thoroughly informed of all that is new in the art. Its special articles, written by the most prominent authorities, as well as its general articles, are of the highest order, and no interested person can afford to be without the paper.

Suite 510 Marquette Building, - - CHICAGO, U. S. A.

The Inspector AND Trouble Man.

By A. E. DOBBS.

Full of information and diagrams for the operator, exchange owner, exchange manager, inspector, trouble man, lineman.

A complete description of telephones and their troubles. How to find and remedy them, together with working plans for exchange construction, complete with diagrams of all up-to-date telephones and switchboards.

This is a practical book, written in **plain language**, and for **anyone** interested in telephony.

Mailed anywhere on receipt of price . . . ONE DOLLAR.

No technicalities. Substantially bound in cloth.

ELECTRICIAN PUBLISHING CO.,

510 MARQUETTE BUILDING, CHICAGO.

Peerless Alternating Current DESK AND BRACKET FANS.

Will not run hot and have THREE DISTINCT running speeds, something that no other alternating current fan has. It's practically noiseless and will throw more breeze with less current than any fan in the market.

THE PRICE IS RIGHT. WRITE US.

SAMSON TURBINE

If you are contemplating the improvement of a water-power where a TURBINE will be required, we can interest you. This is especially true if you wish to use the TURBINE for driving GENERATOR or DYNAMO.

HIGH EFFICIENCY at REDUCED GATEAGE, QUICK SPEED, BALANCED GATES, are just a few of the many points of excellence embodied in the SAMSON. Write Dept. D. for catalog.

JAMES LEFFEL & CO., SPRINGFIELD, OHIO, U.S.A.

Learn to Draw

THIS BOOK as shown in illustration is a self-instructor for home study and practice in the art of MECHANICAL DRAWING for ENGINEERS, MACHINISTS, ELECTRICIANS, METAL WORKERS and all interested in drafting for shop practice, and has been prepared in a plain practical language, and illustrated by the author of "HAWKINS EDUCATIONAL WORKS." The book is divided into 28 different subjects which comprise the fundamental principals of drawing, each heading being thoroughly treated.

There are 320 pages, 300 illustrations and diagrams. The book is handsomely bound in green cloth, gold edges and titles, size 7x10½ in., printed on fine paper. Upon receipt of price, the book will be sent to any address prepaid, money returned if not as represented. Order to-day.

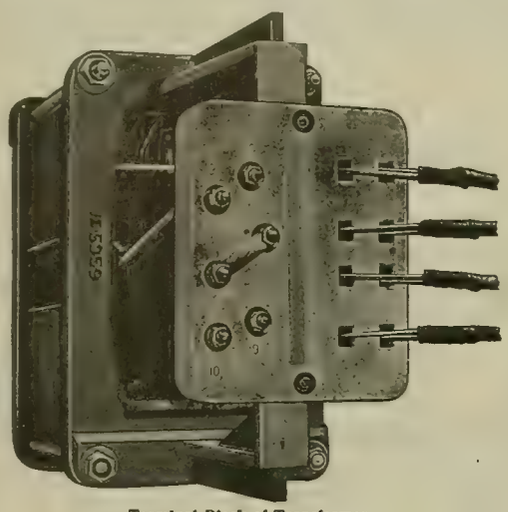
Westinghouse Transformers.

The number of secondary voltages of Westinghouse O. D. and Type N Transformers is a distinctive feature. Besides those tabulated below, other primary values will give proportional secondary voltages.



Terminal Block of Transformer.

Primary	Secondary: Class 200	Secondary: Class 400
1050	52½, 105, 210	105, 210, 420
	58, 116, 232	116, 232, 464
2100	52½, 105, 210	105, 210, 420
	55, 110, 220	110, 220, 440
	58, 116, 232	116, 232, 464

Class 200 Transformers will supply 50, 100 and 200 volt incandescent lamps, 200 volt Nernst lamps, or 200 volt power circuits.

Class 400 Transformers will supply 100 and 200 volt incandescent lamps, 200 volt Nernst lamps, or 400 volt power circuits; also 400 volt 3-wire service for 200 volt Nernst and incandescent lamps.

Close adjustments of secondary voltage permit the same transformer to be used near the station where the voltage is high, or at the end of a long feeder where the voltage is low.

In the manufacture of incandescent lamps many vary slightly from standard voltages. These lamps,—of high efficiency,—are always in stock. Type N and O. D. Transformers permit their use.

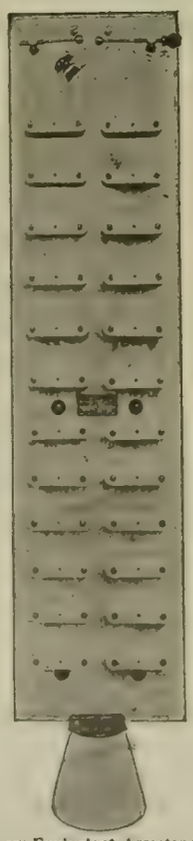
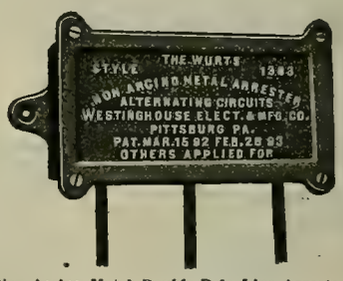
Westinghouse Lightning Arresters



Low Equivalent Arrester for High Potential Circuits.

The effective protection they afford is attested by their use in the majority of central stations. Not only do they prevent the formation of the arc, but keep down, also, any dangerous rise in line potential—two conditions which a lightning arrester must meet to be successful.



Non-Arcing Metal Double-Pole Line Arrester, Type C, Alternating Current.

Send 10 cents for 80-page illustrated catalogue giving the truth in detail about the best boats built.

Protection

vs.

Efficiency

Protection of human life from the dangerous voltages of primary circuits is *usually* obtained in the design of transformers by sacrificing efficiency.

Insulation-filled space in the windings of a transformer is like column-filled floor space in a sky-scraper. It increases safety, but decreases working area.

Cross-section of Core and Coils.

Type A Transformer Windings are as safe as it is possible to make them—practically lightning-proof—and the space sacrificed to obtain this safety does not affect their high efficiencies.

It is really not "Protection *vs.* Efficiency," with Type A Transformers, but

Protection

and

Efficiency

VILLARD AUTOMATIC DUCT RODS ARE THE BEST RODS—THEY STAND THE TEST.
These rods are coupled and uncoupled instantly and with ease. They will not buckle or form a zigzag line and are very light running. They are perfectly rigid when pushed, and become flexible when pulled. They cannot be uncoupled in the ducts, the rear end of a rod having to be raised to an angle of forty-five degrees to detach it. One man can push it with ease 600 feet and a hard blow can be struck with telling effect without the slightest injury to the rods. The wheels serve as duct cleaners as well as obviate friction. The castings are made of solid bronze and malleable iron as desired, with wheels of chilled iron. The rods are made of hickory well seasoned in oil to prevent decay. They are put up in sets of 200 rods or 600 feet.
With Solid Bronze Couplings.
3 FT., WHEELED. LIST PRICE, $1.35
3 " WHEELLESS. " " 1.15

Weston Standard Portable Direct Reading Millivoltmeter.

REFLECTORS!
Light is useless if you can't have it where you want it.
Paragon Reflectors throw the light just where you want it.
Our Incandescent Reflectors are neat and are superior to all others. They are green outside, glossy enamel white inside. Reflecting surface. Made in various styles and sizes. Get our catalog.
American Reflector & Lighting Co.,
271-273 FRANKLIN ST., CHICAGO.

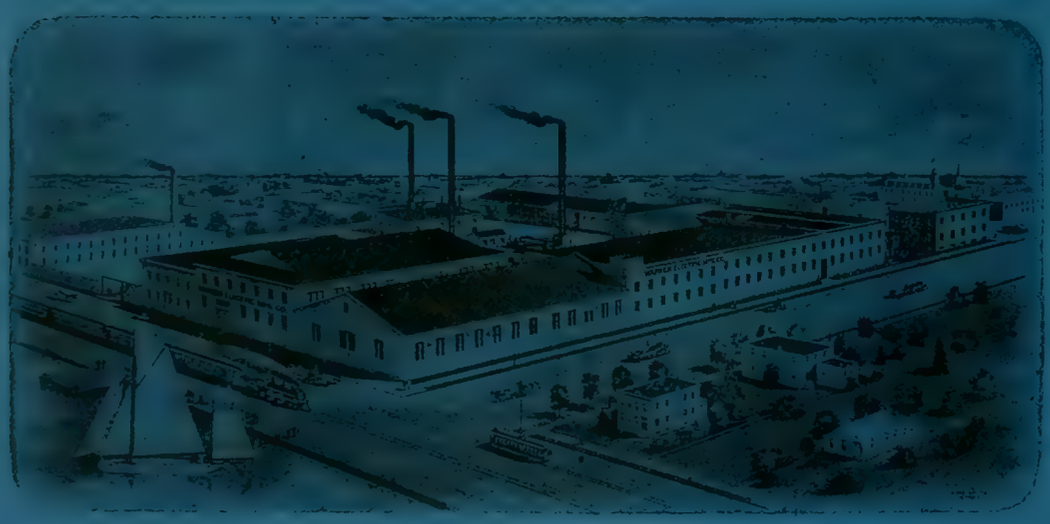
The Warren Alternator.

OUR PRODUCT.

BELTED TYPE.

ENGINE TYPE.

OUR FACTORY.



Recent additions to our shop plant, new tools, electric crane, etc., afford us increased capacity to manufacture sizes up to

1000 KILOWATT Machines of the Engine Type and
1500 KILOWATT Machines of the Water Wheel Type.

BULLETINS ON APPLICATION—THEY TELL YOU ABOUT IT.

CARBONS

CONSUMERS CARBON CO.

LANCASTER, OHIO, U. S. A.

Carbons of all kinds and for all purposes.

An INCANDESCENT LAMP represents a large investment of capital, ingenuity and skilled workmanship, it is sold at a price so low as to necessitate eternal vigilance in cutting costs to a minimum. A successful lamp manufacturer can not afford to experiment with poor materials. This explains the popularity of

BAKER & CO.'S PLATINUM

408 N. J. R. R. Ave., NEWARK, N. J. 120 LIBERTY ST., NEW YORK.

We buy and Refine Platinum Scrap also.

TRANSFORMERS

FOR VALUE RECEIVED, We hereby guarantee Transformer No....., Capacity..... Watts.....Volts Primary..... Volts Secondary, against loss by burn-out from any cause, lightning included, for two years, after which we will repair at the cost of Magnet wire per pound. This Transformer is sent subject to approval after 30 days' trial from date of shipment. If not returned in 30 days it is considered accepted.

We will extend this guarantee for three years more, or five years in all, on the condition that you give us your entire transformer trade.

There is no condition on our regular two years' guarantee; on the five years' guarantee a bill for all repairs made after the two years will be rendered, but will be cancelled upon a statement from your company that all purchases of transformers by your company since the date of the original invoice have been made from the Kuhlman Electric Co.

Terms of payment... ... ... days from date of invoice. We retain the ownership of the goods until the account or any note given in settlement thereof has been fully paid.

WRITE FOR NEW DESCRIPTIVE CATALOG

PROMPT SHIPMENTS!

We make shipments from factory or sales offices on the same day order is received.

ELECTROLYSIS-PROOF
UNDERGROUND CONDUIT

OUR CONDUIT IS { *Absolutely— Electrolysis-Proof, Non-Abrasive, Moisture-Proof, Non-Corrosive, Perfect Insulator.* }

Insulation Test, **66,000 VOLTS.**

A perfect joint which is self-aligning, making the conduit line a solid tube from manhole to manhole.

Construction simple, rapid and inexpensive, requires no skilled labor.

Cables drawn more easily and a longer distance than in any other.

Resistance strength when underground as great as any.

Life of Conduit everlasting. Asphalt never deteriorates.

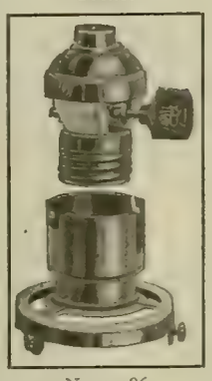
P-K Holoshade Socket



No. 29386

Our 50 Dollar Competition Name is

P=K "HOLOSHADE" SOCKET

This was suggested by a member of our firm AFTER seeing the name "Holdshade" as sent in by four (4) different persons. We will, therefore, take great pleasure in dividing the $50.00 between these four, and can only wish it was more for each.

"HOLO" IS GREEK

and means "complete in all its parts; whole; safe and sound."

"HOLOSHADE" IS GOOD PLAIN AMERICAN

and means infinitely more. It refers to a

COMPLETE SOCKET AND SHADE HOLDER

that is a common sense, inseparable union of a specially rigid shade holder with a socket shell. It makes fixture wiring safe and sound; holds the heaviest shade true to its place; and is the finishing touch to a high-class fixture that keeps it looking well to its end.

Our Customers Say So.

It is not only the price of an arc lamp—that's not the end. Repairs, delays, inferior results, increased expense in maintaining and in operation—these all add to the cost.

The A-B is simple and correct in its mechanism —is a perfected and practical arc lamp.

It cuts out the trouble and saves money.

WE BUY AND SELL ALL KINDS

Electrical and Steam MACHINERY

DIRECT-CONNECTED UNITS.

300 kw., General Electric 500-550-volt Generator, direct connected to Tandem Compound, 16 and 30x48 Whetherill-Corliss Horizontal Left-hand Engine.

200 kw., Westinghouse, M. P. 8, 500-550-volt Generator, direct connected to 18 and 30x16 Westinghouse Engine; generator entirely rewound and engine in excellent condition.

187½ kw., Westinghouse, M. P. 8, 120-volt Generator, direct connected to Westinghouse Compound Engine.

50 kw., Commercial, M. P., 125 volts, Compound Wound Generator, with 8½ and 13x12 Armington & Sims Tandem Compound Engine. One year old.

50 kw., Eddy Compound Generator, 125 volts, direct connected to 13x13 Harrisburg Ideal Engine.

25 kw., 250-volt Westinghouse Generators, direct connected to self-oiling Ball Engines.

25 kw., General Electric, 110 volts, 4-pole, Compound Wound Generator, with 9½x10 Armington & Sims Engine.

2—25 kw., 125-volt General Electric Generators, direct connected to one Triple Expansion Marine Vertical Engine.

ALTERNATING.

2—250 kw., G. E., 2,400 volts, 50 cycles, 3-phase.
2—200 kw., G. E., 2,300 volts, 40 cycles, 3-phase.
1—150 kw., Stanley, 1,000 or 2,000 volts, 133 cycles.
2—120 kw., G. E., 2,000 volts, 125 cycles.
2—120 kw., G. E., 1,040 volts, 125 cycles.
1—100 kw., G. E., 2,080 volts, 60 cycles.
1—60 kw., G. E., 1,040 volts, 125 cycles.
1—A35 T.-H., 1,000 volts, 125 cycles.

RAILWAY GENERATORS.

2—500 kw., 6-pole General Electric.
2—225 kw., 6 pole General Electric.
2—200 kw., 4-pole General Electric.
1—200 kw., M. P. 6, Westinghouse.
1—175 kw., M. P. 4, Westinghouse.
2—150 kw., M. P. 6, Westinghouse.
2—110 kw., 4-pole Eddy.
1—100 kw., 4-pole Walker.
3—100 kw., 4-pole General Electric.
1—100 kw., Edison Bipolar.
2— 90 kw., Thomson-Houston.
1— 80 kw., General Electric.
2— 80 kw., Detroit.
5—D62 Thomson-Houston.

ENGINES.

1—14x14 Rice Automatic.
2—13 and 23x17 Tandem Compound McIntosh & Seymour.
2—10 and 18x20 Payne Compound.
1—13x12 Armington & Sims.
1—12 and 20x12 Westinghouse Compound.
1—7x8 Payne.
1—18x48 Geo. H. Corliss.
1—16x42 Greene.
1—10½ and 16½x12 Cross Compound Armington & Sims.
2—26x48 Providence-Greene.
2—18 and 30x16 Westinghouse Compound.
3—18½x18 Armington & Sims.
1—18½x18 New York Safety.
1—20x48 Harris-Corliss.

BOILERS.

7—163 H. P. Babcock & Wilcox.
5—250 H. P. Climax.
1—600 H. P. Climax.
2—66x16 Return Tubular.
2—66x18 Return Tubular.

ARC GENERATORS.

No. 12 Brush, 150 light, 9.6 amp.
No. 11 Brush, 125 light, 9.6 amp.
No. 9B Brush, 120 light, 6.6 amp.
M. D. 2 T.-H., 50 light, 9.6 amp.
L. D. 12 T.-H., 75 light, 6.6 amp.
M. 12 T.-H., 45 light, 6.6 amp.

A large assortment of Arc Lamps all in good working order, for direct and alternating currents, series and multiple circuits. Also a fine lot of Transformers, especially General Electric Type H. and Thomson-Houston Type F.

GENERATORS—500 Volts.

Two T. H., 500 K. W.
Four T. H., 270 K. W., arranged to be driven with a single pulley clutch coupling on each side of pulley.
One General Electric, 250 K. W.
One Westinghouse, 175 K. W.
Two General Electric, 100 K. W., 4 pole.
Two General Electric, 100 K. W., 6 pole.
Six Edison, No. 60, 175 K. W.
Six T. H., D62.
One Edison No. 20, 60 K. W.

GENERATORS—110 Volts.

Two 210 K. W., G. E. design, 14 pole, for direct connection, at a speed of 120 R. P. M.
Four 60 K. W. Edison.
Two 46 K. W. Edison.

ALTERNATING GENERATORS.

One 750 K.W., Westinghouse 60-cycle, 2-phase, 2,200 volt generator, belted to one 24 and 48x60 cross-compound condensing Cooper Corliss engine, complete.
Two 100 K. W., G.E. 3 phase, 60 cycle generator, complete.
Two 100 K. W., G. E., 1100 volts monocyclic, complete.
One 60 K. W., Westinghouse, 1100 volts.
One 35 K. W., Westinghouse, 1100 volts, complete.

STREET CAR EQUIPMENT.

One hundred and eighty 25 H. P. motors, new and complete with pinions, gear and gear cases.
One hundred and eighty "K" Controllers.
Twenty-five K-2 Controllers.

ENGINES.

Six 36 and 60x60, Cooper cross-compound, non-condensing, new, never shipped from factory.
One 30x54 St. Louis Corliss.
Two 24x60 Lane & Bodley, designed for rolling mill work.
One 28x60 Pennsylvania Iron Works Co.
One 20x48 Wheelock.
One 20x48 Double Wheelock.
One 20x42 Wheelock.
One 14x42 Hamilton Corliss.
Two 21x18 Armington & Sims.
Four 16 and 22x22 Houston, Stanwood & Gamble, cross-compound.
Five 12 and 20x16 tandem compound Ball.
Two 11 and 17x14 cross-compound Ideal.
Two 9 and 16x12 tandem compound Ball.
One 8 and 13x12 tandem compound Ball.
Three 17x18, Skinner, with air cylinders attached.
Two 16x20 Porter-Allen.
Two 15x20 Automatic Russell.
One 15½x15 Armington & Sims high speed simple automatic, 270 R. P. M.
One 15x15 Armington & Sims simple automatic, 270 R. P. M.
One 13½x15 Armington & Sims high speed simple automatic, 300 R. P. M.
One 14x17 Fisher, new.

BOILERS.

Four 66x18 with 66 4-inch tubes. A complete battery at a great bargain.
Three 66 x 14, with 66 4-inch tubes.
Two 72 in. x 18 ft., with 66 4-inch tubes.
Five 60x16 ft. high pressure boilers.
Two Sterling Water Tube Boilers, 250 H.P. each.
Two 500 H. P. Hazelton.

FERRIS WHEEL.

One 60 ft. Ferris Wheel, electrically driven.

AT A BARGAIN—A complete Edison 3-wire plant of 300 K. W. capacity.

It will be profitable to wire or write us giving requirements of machinery wanted or for sale.

Do YOU Want A Better Position?

The indorsements and photographs that we have published in the various magazines, during the past year, promptly convinced many that we could train them for advancement. For the few who still doubt that we can enable them to better their positions and increase their salaries we have compiled, at a great expense, the 48-page booklet illustrated below.

This gives the names, addresses, and progress of over a thousand I. C. S. students whom we have placed on the road to prosperity. Among these you will find the names and addresses of many in your locality with whom you can confer. To those inquiring now it will be sent free. Our Courses cost from $10 up. Terms easy. No books to buy. Every student of the I. C. S. is entitled to the assistance of the Students' Aid Department in securing advancement or a new position. Start TODAY to rise!

Fill Out and Send In the Coupon NOW!

O.K.
C.C.McC.

Dear Sir:-

Replying to your inquiry, we would say that your lamps have given the utmost satisfaction in our works. We contemplate installing them in every situation where an abundance of strong light is needed, and wherever fine or close work is done. We have nothing but unqualified praise for the lamp and you will hear from us as fast as changes are practical.

Yours very truly

35 FT. CABIN LAUNCH, 1,500.00

Send 10 cents for 80-page illustrated catalogue giving the truth in detail about the best boats built.

Protection
vs.
Efficiency

Protection of human life from the dangerous voltages of primary circuits is *usually* obtained in the design of transformers by sacrificing efficiency.

Insulation-filled space in the windings of a transformer is like column-filled floor space in a sky-scraper. It increases safety, but decreases working area.

Cross-section of Core and Coils.

Type A Transformer Windings are as safe as it is possible to make them—practically lightning-proof—and the space sacrificed to obtain this safety does not affect their high efficiencies.

It is really not "Protection *vs.* Efficiency," with Type A Transformers, but

Protection
and
Efficiency

WESTON Electrical Instrument Co.,
Waverly Park, NEWARK, N. J.

Illuminated Dial Station Instruments.
These instruments are constructed upon the same general principle as our regular Standard Portable Direct Current Voltmeters and Ammeters, but are much larger, and the working parts are inclosed in a neatly designed, dust-proof cast-iron case which effectively shields the instruments from disturbing influences of external magnetic fields.

Weston Standard Illuminated Dial Station Ammeter, Style B.

Weston Standard
Portable Direct Reading Voltmeters and Millivoltmeters, Ammeters and Milliammeters, Wattmeters and Voltmeters, for Alternating and Direct Current Circuits.
Our portable instruments are recognized as standards throughout the civilized world.
Our Semi-Portable Laboratory Standard Voltmeters and Ammeters are still better.
They are the most reliable, absolute standards for Laboratory use.

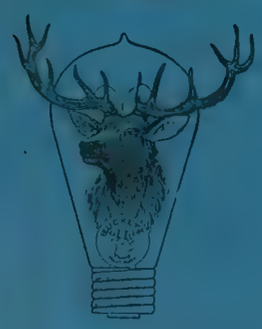
WE MANUFACTURE:
Portables, Chandeliers, Brackets, Desk Lamps, Clusters, Canopies and All Sizes and Styles of Shades and Reflectors.
Goods carried by all principal jobbers. Send for Catalogue No. 10, just issued.
FARIES MFG. CO., DECATUR, ILL.



It is sometimes difficult to pick out the right road when buying incandescent lamps.

The Buckeye Lamp is the original cellulose filament lamp of the world. Years before other manufacturers realized the advantages to be gained by a homogeneous filament we were making them. Just so the **Buckeye** has been the leader in every innovation that has come to stay.

We were the first manufacturers to produce machinery for making incandescent lamps and thereby getting a regular product. **Uniformity** is the hard point in lamp manufacture. With good methods, good machines, and **31 rigid inspections,** besides many minor inspections, **uniformity** is assured you. If other lamps are giving you trouble, or failing to satisfy you, the foregoing will explain why you had **BETTER BUY BUCKEYE.**

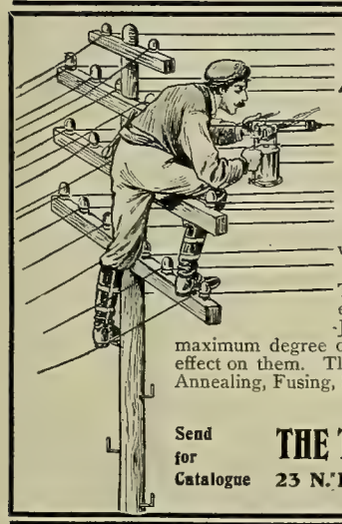
SALES OFFICES

Room 85 Hartford Building, Chicago. 170 Broadway, New York.



High In the Air
Amid Storm and Wind

THE TURNER
DOUBLE JET
GASOLINE
TORCHES

will make a lineman's work much easier.

These torches are superior to all others for electricians' and lineman's work. The Double Jet construction of the burner generates the maximum degree of mechanical heat, and the wind has little effect on them. They are unequaled for Brazing, Tempering, Annealing, Fusing, Soldering, or any work requiring heat.

ELECTROLYSIS-PROOF
UNDERGROUND CONDUIT

OUR CONDUIT IS { *Absolutely— Electrolysis-Proof, Non-Abrasive, Moisture-Proof, Non-Corrosive, Perfect Insulator.* }

Insulation Test,
66,000
VOLTS.

A perfect joint which is self-aligning, making the conduit line a solid tube from manhole to manhole.

Construction simple, rapid and inexpensive, requires no skilled labor.

Cables drawn more easily and a longer distance than in any other.

Resistance strength when underground as great as any.

Life of Conduit everlasting. Asphalt never deteriorates.

Where We Stand.

We don't ask for your business on sentimental grounds—but because you can get more for your money here than elsewhere.

We have gone into this business to stay. We want your sample order but we will not fill it with sample lamps. That shall be one of our cardinal principles; to make our lamps on such a high plane that the run of our factory will suit you. We think we can hold trade better with a good average product than by sending you a few picked lamps, and afterwards "picking" you.

You will find our lamps not wonderful but good—thoroughly good. As represented, or your money back. There are only four factories in the country that make as complete a line. Write to-day for prices on regular lamps 2 to 50 c.p. Round lamps, high-volt lamps, Street Railway lamps, or Bunghole lamps. Prompt shipments. Close selection.

Beautiful new factory thoroughly equipped

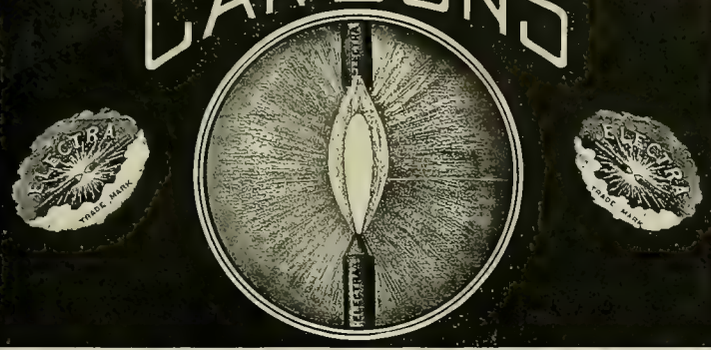
"ELECTRA" FLAME LIGHT CARBONS

MARVELOUS EFFECT

"ELECTRA" Flame Light Carbons are suitable for all types of Open Arc Lamps, either direct or alternating current, with slight charge in regulation of lamp.



HIGHEST INTENSITY

The intensity and brilliancy of light is three times that of regular "ELECTRA," and five times that of other carbons, making them eminently suitable for all special lighting purposes.

HUGO REISINGER, SOLE IMPORTER, 11 BROADWAY, NEW YORK.

H-U. ACCUMULATORS.

For ELECTRIC LIGHTING and RAILWAY CENTRAL and SUB-STATIONS, POWER STATIONS, TELEPHONE, TELEGRAPH, RAILWAY CAR LIGHTING and all other purposes to which Storage Batteries are applicable.

We guarantee LOWEST FIRST COST, HIGHEST EFFICIENCY, MOST CONSERVATIVE RATING and CHEAPEST MAINTENANCE.

HELIOS-UPTON CO., 222 Fullerton Ave., CHICAGO.

"WESCO" ELECTRICAL SUPPLIES

WE CARRY IN ST. LOUIS STOCK

one of the most complete lines of supplies and construction material in the U. S., and are prepared to ship promptly anything pertaining to the operation, maintenance or equipment of Isolated Plants and Central Stations, Electric Railways and Telephone Lines and Exchanges.

We handle nothing but the very best material and our guarantee is back of all our goods. Our prices are as low as they can be on first-class material.

We issue catalogues covering our various lines.

You ought to have them.

WESTERN ELECTRICAL SUPPLY CO.

ST. LOUIS, MO., U. S. A.

Our Customers Say So.

It is not only the price of an arc lamp—that's not the end. Repairs, delays, inferior results, increased expense in maintaining and in operation—these all add to the cost.

The A-B is simple and correct in its mechanism —is a perfected and practical arc lamp.

It cuts out the trouble and saves money.

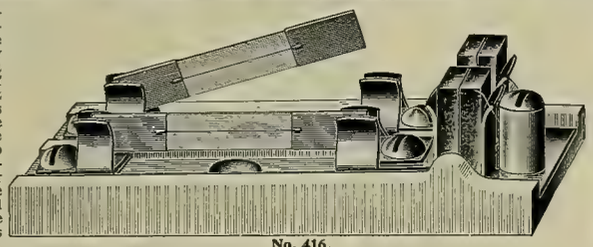
GENL. OFFICES: CENTURY BLDG, NEWARK, N. J.
OVER FIFTEEN THOUSAND (15,000) MILES IN USE.
Highest Award in its Class at Paris Exposition, 1900, and Pan-American Exposition, Buffalo, 1901.

Sole Owners of the Maxstadt Patent No. 655,905
We manufacture our joints under the ***patent*** we advertise.
PATENTED AUGUST 14, 1900, IN THE UNITED STATES AND FOREIGN COUNTRIES.

No. 882.

This cut represents the Maxstadt patent improved American Joint, ready for use. Made in copper and tinned steel, for copper and galvanized iron wire. This joint is absolutely perfect and costs less money than any other joint on the market. Our Tinned Steel Joints are especially adapted for iron wire, and give entire satisfaction wherever used. Prices and samples on application.

This illustration represents one of the many different styles of Maxstadt Fuse Blocks and Fuse we manufacture We can also furnish fuses, paper sleeves, fuse wire and links. Write for prices and samples.



No. 416.
Patented March 31, 1891.

GENERATORS—500 Volts.

Two T. H., 500 K. W.
Four T. H., 270 K. W., arranged to be driven with a single pulley clutch coupling on each side of pulley.
One General Electric, 250 K. W.
One Westinghouse, 175 K. W.
Two General Electric, 100 K. W., 4 pole.
Two General Electric, 100 K. W., 6 pole.
Six Edison, No. 60, 175 K. W.
Six T. H., D62.
One Edison No. 20, 60 K. W.

GENERATORS—110 Volts.

Two 210 K. W., G. E. design, 14 pole, for direct connection, at a speed of 120 R. P. M.
Four 60 K. W. Edison.
Two 46 K. W. Edison.

ALTERNATING GENERATORS.

One 750 K.W., Westinghouse 60-cycle, 2-phase, 2,200 volt generator, belted to one 24 and 48x60 cross-compound condensing Cooper Corliss engine, complete.
Two 100 K. W., G.E. 3 phase, 60 cycle generator, complete.
Two 100 K. W., G. E., 1100 volts monocyclic, complete.
One 60 K. W., Westinghouse, 1100 volts.
One 35 K. W., Westinghouse, 1100 volts, complete.

STREET CAR EQUIPMENT.

One hundred and eighty 25 H. P. motors, new and complete with pinions, gear and gear cases.
One hundred and eighty "K" Controllers.
Twenty-five K-2 Controllers.

ENGINES.

Six 36 and 60x60, Cooper cross-compound non-condensing, new, never shipped from factory.
One 30x54 St. Louis Corliss.
Two 24x60 Lane & Bodley, designed for rolling mill work.
One 28x60 Pennsylvania Iron Works Co.
One 20x48 Wheelock.
One 20x48 Double Wheelock.
One 20x42 Wheelock.
One 14x42 Hamilton Corliss.
Two 21x18 Armington & Sims.
Four 16 and 22x22 Houston, Stanwood & Gamble, cross-compound.
Five 12 and 20x16 tandem compound Ball.
Two 11 and 17x14 cross-compound Ideal.
Two 9 and 16x12 tandem compound Ball.
One 8 and 13x12 tandem compound Ball.
Three 17x18, Skinner, with air cylinders attached.
Two 16x20 Porter-Allen.
Two 15x20 Automatic Russell.
One 15½x15 Armington & Sims high speed simple automatic, 270 R. P. M.
One 15x15 Armington & Sims simple automatic, 270 R. P. M.
One 13½x15 Armington & Sims high speed simple automatic, 300 R. P. M.
One 14x17 Fisher, new.

BOILERS.

Four 66x18 with 66 4-inch tubes. A complete battery at a great bargain.
Three 66 x 14, with 66 4-inch tubes.
Two 72 in. x 18 ft., with 66 4-inch tubes.
Five 60x16 ft. high pressure boilers.
Two Sterling Water Tube Boilers, 250 H.P. each.
Two 500 H. P. Hazelton.

FERRIS WHEEL.

One 60 ft. Ferris Wheel, electrically driven.

AT A BARGAIN — A complete Edison 3-wire plant of 300 K. W. capacity.

It will be profitable to wire or write us giving requirements of machinery wanted or for sale.

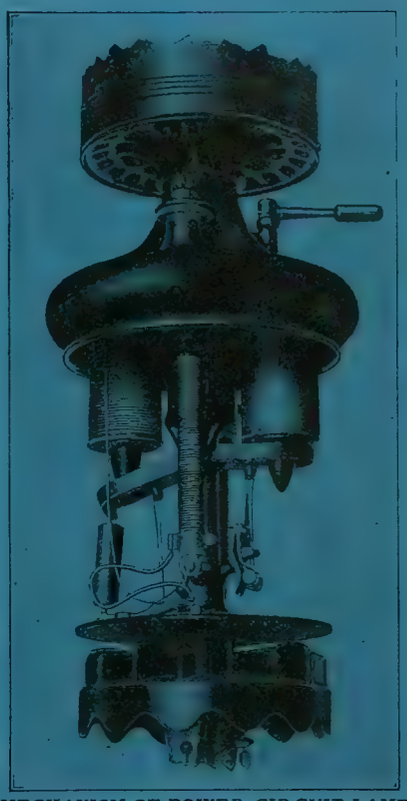
"WOOD"
ENCLOSED
ARC LAMPS
FOR POWER CIRCUITS.



MECHANISM OF POWER CIRCUIT LAMP

Inspection of the interior of an arc lamp often reveals its true worth. Flimsy devices for cheapening cost of manufacture, makeshift methods of assembling parts and the use of inferior materials betray the worthlessness of an arc lamp conclusively.

"Wood" arc lamps present the same high-grade appearance inside and outside. Every detail of construction and every detail of design is given the best attention of experienced engineers and skilled workmen. The result is a lamp that will stand inspection from suspension top to lower carbon holder, with the case on or off, and its operation is not inconsistent with its appearance.

TYPE K
TRANSFORMER

MECHANICAL
AND
ELECTRICAL DETAILS

A good design may be rendered of no avail through poor mechanical construction and workmanship, and similarly no amount of ingenuity can make amends for a design fundamentally wrong. The Type K has received the closest study with the view of perfecting its electrical as well as its mechanical features. We are confident that no other transformer is made which can claim the same painstaking thought and patient elaboration of detail exhibited by Type K. (From Catalogue C.)

SALES OFFICES

Room 85 Hartford Building, Chicago. 170 Broadway, New York.

THE SHELBY ANGULATOR

THE FIRST SUCCESSFUL INSTRUMENT FOR DETERMINING THE TRUE VALUE OF INCANDESCENT LAMPS.

SIMPLE—RELIABLE—INEXPENSIVE.

By the aid of this device the horizontal candlepower can be determined and the lamp can then be turned so that the light can be measured at any angle.

IT DETERMINES THE SPECIAL CANDLEPOWER OF YOUR LAMPS AT ONE READING.

This device has been designed by us with a view of placing at the disposal of every owner of a photometer, a method of determining the value of his lamps regardless of whether the lamps are used for general or local illumination. Fits into the socket of any standard photometer. Price $2.50.

SAINT LOUIS DENVER PHILADELPHIA

ELECTROLYSIS-PROOF
UNDERGROUND CONDUIT

OUR CONDUIT IS { Absolutely— Electrolysis-Proof, Non-Abrasive, Moisture-Proof, Non-Corrosive, Perfect Insulator. }

Insulation Test, 66,000 VOLTS.

A perfect joint which is self-aligning, making the conduit line a solid tube from manhole to manhole.

Construction simple, rapid and inexpensive, requires no skilled labor.

Cables drawn more easily and a longer distance than in any other.

Resistance strength when underground as great as any.

Life of Conduit everlasting. Asphalt never deteriorates.

FOR SALE.

GENERATORS—500 Volts.

Two T. H., 500 K. W.
Four T. H., 270 K. W., arranged to be driven with a single pulley clutch coupling on each side of pulley.
One General Electric, 250 K. W.
One Westinghouse, 175 K. W.
Two General Electric, 100 K. W., 4 pole.
Two General Electric, 100 K. W., 6 pole.
Six Edison, No. 60, 175 K. W.
Six T. H., D62.
One Edison No. 20, 60 K. W.

GENERATORS—110 Volts.

Two 210 K. W., G. E. design, 14 pole, for direct connection, at a speed of 120 R. P. M.
Four 60 K. W. Edison.
Two 46 K. W. Edison.

ALTERNATING GENERATORS.

One 750 K.W., Westinghouse 60-cycle, 2-phase, 2,200 volt generator, belted to one 24 and 48x60 cross-compound condensing Cooper Corliss engine, complete.
Two 100 K. W., G.E. 3 phase, 60 cycle generator, complete.
Two 100 K. W., G. E., 1100 volts monocyclic, complete.
One 60 K. W., Westinghouse, 1100 volts.
One 35 K. W., Westinghouse, 1100 volts, complete.

STREET CAR EQUIPMENT.

One hundred and eighty 25 H. P. motors, new and complete with pinions, gear and gear cases.
One hundred and eighty "K" Controllers.
Twenty-five K-2 Controllers.

ENGINES.

Six 36 and 60x60, Cooper cross-compound non-condensing, new, never shipped from factory.
One 30x54 St. Louis Corliss.
Two 24x60 Lane & Bodley, designed for rolling mill work.
One 28x60 Pennsylvania Iron Works Co.
One 20x48 Wheelock.
One 20x48 Double Wheelock.
One 20x42 Wheelock.
One 14x42 Hamilton Corliss.
Two 21x18 Armington & Sims.
Four 16 and 22x22 Houston, Stanwood & Gamble, cross-compound.
Five 12 and 20x16 tandem compound Ball.
Two 11 and 17x14 cross-compound Ideal.
Two 9 and 16x12 tandem compound Ball.
One 8 and 13x12 tandem compound Ball.
Three 17x18, Skinner, with air cylinders attached.
Two 16x20 Porter-Allen.
Two 15x20 Automatic Russell.
One 15½x15 Armington & Sims high speed simple automatic, 270 R. P. M.
One 15x15 Armington & Sims simple automatic, 270 R. P. M.
One 13½x15 Armington & Sims high speed simple automatic, 300 R. P. M.
One 14x17 Fisher, new.

BOILERS.

Four 66x18 with 66 4-inch tubes. A complete battery at a great bargain.
Three 66 x 14, with 66 4-inch tubes.
Two 72 in. x 18 ft., with 66 4-inch tubes.
Five 60x16 ft. high pressure boilers.
Two Sterling Water Tube Boilers, 250 H.P. each.
Two 500 H. P. Hazelton.

FERRIS WHEEL.

One 60 ft. Ferris Wheel, electrically driven.

AT A BARGAIN—A complete Edison 3-wire plant of 300 K. W. capacity.

It will be profitable to wire or write us giving requirements of machinery wanted or for sale.

M'CORMICK TURBINE.

On Vertical or Horizontal Shaft.
Especially Adapted for Electrical Work.

Gives a higher percentage of useful effect than any other water-wheel heretofore made. All sizes, right and left hand, are built from patterns perfected under systematic tests in the Holyoke Testing Flume.

Parties having power plants which are unsatisfactory, and those contemplating the improvement of powers, will find it to their interest to confer with us, as we are willing to guarantee results where others have failed, no matter what make of turbine has been in use. CEDAR
POLES AND POSTS.

Attention!

The Holcomb-Lobb Company have retired from the cedar business and we have purchased their entire stock of **cedar posts** and **poles,** also their principal yards at Marinette, Wisconsin, and Masonville, Mich.

This places us in a very advantageous position, giving us in conjunction with our own yards, local connections with all the trunk lines on the northern peninsula. We are prepared to make attractive prices on mixed carloads of posts and poles as well as in straight carload lots. Our great specialty is the pole business. Our stock is the very best. A trial order will demonstrate this fact. Let us hear from you.

Nernst Lamps

The latest development in Electric Lighting

The largest modern buildings are being equipped with Nernst Lamps.

P. R. R. Union Station, Pittsburgh, Pa.

The Farmers Bank Building, Pittsburgh, Pa.

Only the very best materials were allowed to enter into the construction and equipment of The Farmers Bank Building, Pittsburgh, Pa., the third tallest office building in the world. A careful investigation as to the best methods of lighting such a structure resulted in the following order:

2,250 Single-Glower Nernst Lamps
20 Two-Glower Nernst Lamps
20 Six-Glower Nernst Lamps

Only Nernst Lamps will be used in the building

Electrical Supply Dealers

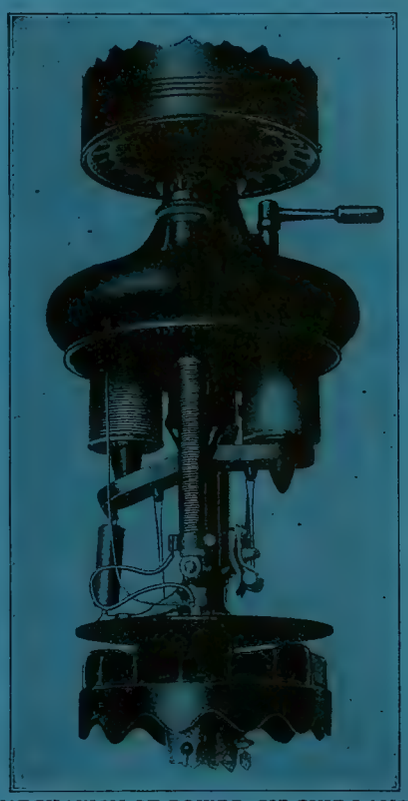
"WOOD"
ENCLOSED
ARC LAMPS
FOR POWER CIRCUITS.



MECHANISM OF POWER CIRCUIT LAMP

Inspection of the interior of an arc lamp often reveals its true worth. Flimsy devices for cheapening cost of manufacture, makeshift methods of assembling parts and the use of inferior materials betray the worthlessness of an arc lamp conclusively.

"Wood" arc lamps present the same high-grade appearance inside and outside. Every detail of construction and every detail of design is given the best attention of experienced engineers and skilled workmen. The result is a lamp that will stand inspection from suspension top to lower carbon holder, with the case on or off, and its operation is not inconsistent with its appearance.

Fort Wayne Electric Works
Manufacturer of "Wood" Systems

CHICAGO FUSE WIRE & MFG. CO.,
CHICAGO,
Manufacturers of
Fuse Wire, Fuse Links, Telephone Fuses and Supplies, Wire Joints.

We make a Specialty of FUSE WIRE and STRIP for TELEPHONE fuses, instrument fuses, and in fact anything requiring a very LOW FUSING point.

Our fine fuse wires are made with the same degree of accuracy which we have always maintained for all our product, and they have sufficient TENSILE STRENGTH to be handled without difficulty.

We are in position to take care of orders, large or small, regular or special, and can make prompt shipments.

SILVER-PLATED MIRROR REFLECTORS.
A flat Reflector, for use with any system of incandescent electric light, where it is desired to spread the light considerably. Its silver plated mirror plate lining makes it most effective and pleasing, and always as good as new.

Convex, reflecting slightly below the horizontal in all directions. Used in stores, etc., for general illumination.

GET OUR PRICES.

ELECTROLYSIS-PROOF
UNDERGROUND CONDUIT

OUR CONDUIT IS { *Absolutely—*
Electrolysis-Proof,
Non-Abrasive,
Moisture-Proof,
Non-Corrosive,
Perfect Insulator. }

Insulation Test,
66,000 VOLTS.

A perfect joint which is self-aligning, making the conduit line a solid tube from manhole to manhole.

Construction simple, rapid and inexpensive, requires no skilled labor.

Cables drawn more easily and a longer distance than in any other.

Resistance strength when underground as great as any.

Life of Conduit everlasting. Asphalt never deteriorates.

The Chip on his Shoulder.

Independent—
And we are.

The boy tells his own story. We think there is room for one independent maker, who will make lamps, not with the immediate profit alone in view, but with repeat orders as the main vantage point. We want your first order only because we know that will mean your business hereafter. There has been too much short-sightedness, because the average buyer was not equipped to test or measure what he bought. Give us your confidence and we will not betray it.

We have made a fair start in the factory line, and have invested a respectable sum in lamp making only after repeated tests had shown our product was not excelled by any lamp in the market for long life and maintained brilliancy.

Remember we make a complete line of everything and ship no sample, picked lamps. What our first lamps promise our subsequent shipments will do. That is something not carried out everywhere. Try us.

THE INDEPENDENT INCANDESCENT LAMP CO. CLEVELAND, OHIO. - FACTORY: 78-84 SENECA ST. OFFICE: ROSE BUILDING

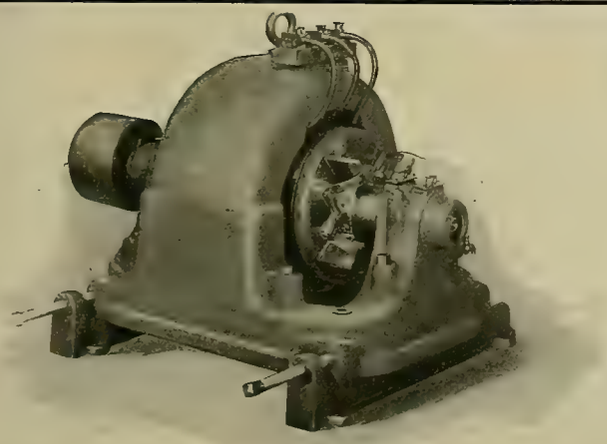
Showing Details of Mechanism. Cannot Get Out of Order.



Are You Thinking

OF TRYING TO INCREASE YOUR EARNINGS?

Probably the best way to do this is to secure a good motor load. Our motors are all single phase, self-starting, and will give equal satisfaction operated on single or multiphase circuits. Only one transformer required to operate them.

We will gladly tell you what they have done for others, and what they can be made to do for you. Have you got our latest Bulletins ?

LUNDELL FANS

ARE ACKNOWLEDGED TO BE THE BEST

Lundell Fans have always given the most satisfaction to dealers and users because of their superior design and construction. They are unequaled in efficiency, durability, appearance and commercial value. Orders should be placed now to insure prompt delivery, as the demand this year is very great. Write for new booklet No. 03307.

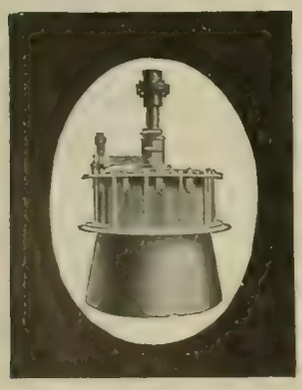
M'CORMICK TURBINE.
On Vertical or Horizontal Shaft.
Especially Adapted for Electrical Work.

Gives a higher percentage of useful effect than any other water-wheel heretofore made. All sizes, right and left hand, are built from patterns perfected under systematic tests in the Holyoke Testing Flume.

Parties having power plants which are unsatisfactory, and those contemplating the improvement of powers, will find it to their interest to confer with us, as we are willing to guarantee results where others have failed, no matter what make of turbine has been in use. STATE REQUIREMENTS AND SEND FOR CATALOGUE.

S. MORGAN SMITH CO., York, Pa.



SAMSON TURBINE

If you are contemplating the improvement of a water-power where a TURBINE will be required, we can interest you. This is especially true if you wish to use the TURBINE for driving GENERATOR or DYNAMO.

HIGH EFFICIENCY at REDUCED GATEAGE, QUICK SPEED, BALANCED GATES, are just a few of the many points of excellence embodied in the SAMSON. Write Dept. D. for catalog.

CEDAR
POLES AND POSTS.

Attention!

The Holcomb-Lobb Company have retired from the cedar business and we have purchased their entire stock of **cedar posts** and **poles,** also their principal yards at Marinette, Wisconsin, and Masonville, Mich.

This places us in a very advantageous position, giving us in conjunction with our own yards, local connections with all the trunk lines on the northern peninsula. We are prepared to make attractive prices on mixed carloads of posts and poles as well as in straight carload lots. Our great specialty is the pole business. Our stock is the very best. A trial order will demonstrate this fact. Let us hear from you.

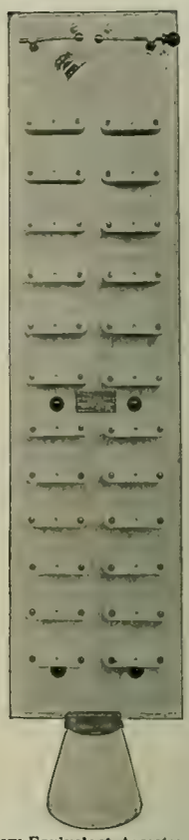
Westinghouse

Lightning Arresters

Type L Railway Arrester, Direct Current.

Type I Station Arrester, Direct Current.

Type C Line Arrester, Alternating Current.

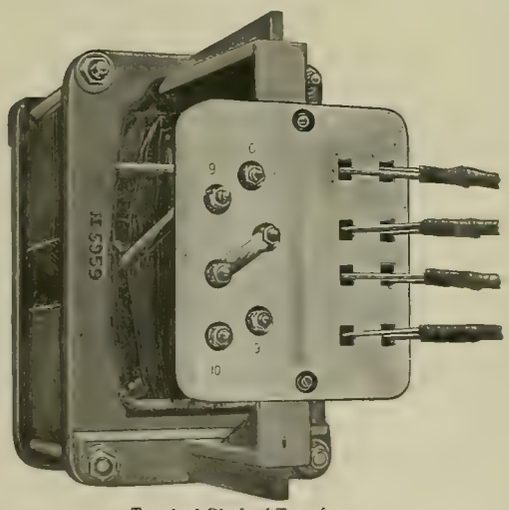


Low Equivalent Arrester for High Potential Circuits.

Built to protect all kinds of electrical apparatus at a cost insignificant as compared with the value of the protection. The effective protection they afford is attested by their use in the majority of central stations.

O. D. and Type N Transformers.

The number of secondary voltages of Westinghouse O. D. and Type N Transformers is a distinctive feature. Besides those tabulated below, other primary values will give proportional secondary voltages.



Terminal Block of Transformer.

Primary	Secondary: Class 200	Secondary: Class 400
1050	52½, 105, 210	105, 210, 420
	58, 116, 232	116, 232, 464
2100	52½, 105, 210	105, 210, 420
	55, 110, 220	110, 220, 440
	58, 116, 232	116, 232, 464

Class 200 Transformers will supply 50, 100 and 200 volt incandescent lamps, 200 volt Nernst lamps, or 200 volt power circuits.

Class 400 Transformers will supply 100 and 200 volt incandescent lamps, 200 volt Nernst lamps or 400 volt power circuits; also 400 volt 3-wire service for 200 volt Nernst and incandescent lamps.

Close adjustments of secondary voltage permit the same transformer to be used near the station where the voltage is high, or at the end of a long feeder where the voltage is low.

In the manufacture of incandescent lamps many vary slightly from standard voltages. These lamps,—of high efficiency,—are always in stock. Type N and O. D. Transformers permit their use.

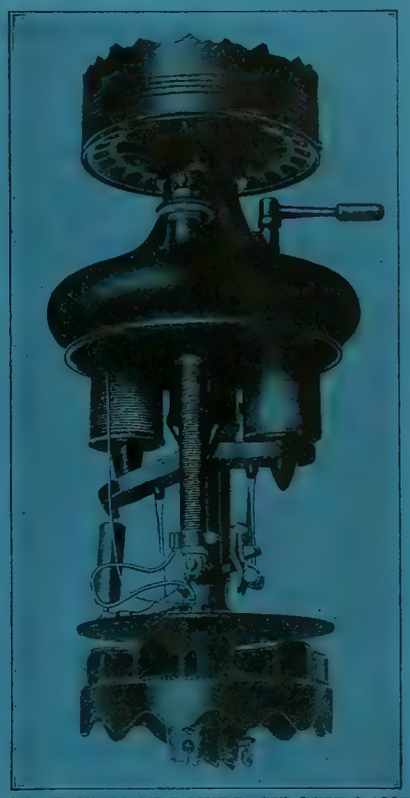
"WOOD" ENCLOSED ARC LAMPS

FOR POWER CIRCUITS.



MECHANISM OF POWER CIRCUIT LAMP

Inspection of the interior of an arc lamp often reveals its true worth. Flimsy devices for cheapening cost of manufacture, makeshift methods of assembling parts and the use of inferior materials betray the worthlessness of an arc lamp conclusively.

"Wood" arc lamps present the same high-grade appearance inside and outside. Every detail of construction and every detail of design is given the best attention of experienced engineers and skilled workmen. The result is a lamp that will stand inspection from suspension top to lower carbon holder, with the case on or off, and its operation is not inconsistent with its appearance.

THE SAFETY INSULATED WIRE & CABLE CO.,
WORKS: Bayonne, N. J. 114-116 LIBERTY STREET, N. Y.

The Franklin Gas Engine
One-Half Horsepower.
Worth $100 complete. We sell all necessary castings, materials and detail drawings for $16.50. For real work—not a toy. 450 revolutions per minute. Upright or horizontal form. Finished parts sold separately. Runs by gas or gasoline. For boys and men with a mechanical turn. Write for circular 16.
PARSELL & WEED, 129-131 W. 31st Street, New York.
The FRANKLIN Model Shop

Don't fail to take advantage of the Western Electrician's National Electric Light Convention Numbers—issues of May 23rd and May 30th

VILLARD AUTOMATIC DUCT RODS ARE THE BEST RODS—THEY STAND THE TEST.
These rods are coupled and uncoupled instantly and with ease. They will not buckle or form a zigzag line and are very light running. They are perfectly rigid when pushed, and become flexible when pulled. They cannot be uncoupled in the ducts, the rear end of a rod having to be raised to an angle of forty-five degrees to detach it. One man can push it with ease 600 feet and a hard blow can be struck with telling effect without the slightest injury to the rods. The wheels serve as duct cleaners as well as obviate friction. The castings are made of solid bronze and malleable iron as desired, with wheels of chilled iron. The rods are made of hickory well seasoned in oil to prevent decay. They are put up in sets of 200 rods or 600 feet.
With Solid Bronze Couplings. 3 FT., WHEELED. LIST PRICE, $1.35. 3 " WHEELLESS. " " 1.15. With Malleable Iron Couplings. 3 FT., WHEELED. LIST PRICE, $1.10. 3 " WHEELLESS. " " .80.
Wheeled. Discount upon application. Other lengths to order. Send for descriptive circular.
JAMES S. BARRON & CO., Sole Agents, 200-206 West Broadway, NEW YORK.

WESTON Electrical Instrument Co.,
Waverly Park, NEWARK, N. J.
Weston Standard Portable Direct Reading
Voltmeters, Millivoltmeters, Voltammeters, Ammeters, Milammeters,
Ground Detectors and Circuit Testers,
Ohmmeters. Portable Galvanometers.
Our Portable Instruments are recognized as The Standard the world over. The Semi-Portable Laboratory Standards are still better.
Our Station Voltmeters and Ammeters are unsurpassed in point of extreme accuracy and lowest consumption of energy.

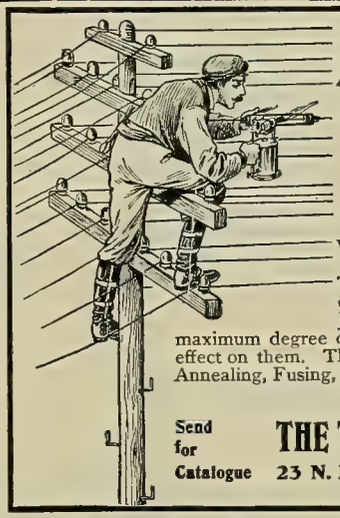
203 BROADWAY, NEW YORK CITY, N. Y., Or Your Nearest Supply House.



High In the Air Amid Storm and Wind

THE TURNER DOUBLE JET GASOLINE TORCHES

will make a lineman's work much easier.

These torches are superior to all others for electricians' and lineman's work. The Double Jet construction of the burner generates the maximum degree of mechanical heat, and the wind has little effect on them. They are unequaled for Brazing, Tempering, Annealing, Fusing, Soldering, or any work requiring heat.

The National Electric Light Convention to be held in Chicago, May 26-28, 1903, promises to be the largest and best-attended meeting ever held.

The Western Electrician of May 23rd and 30th, which will cover this important event, will prove most desirable to advertisers. A large, attractive announcement will enable you to place the merits of your product before almost every buyer.

As this will be a Western convention, the Western Electrician, of course, can best serve your interests.

Send in your order and copy now.

SCHUREMAN & HAYDEN,
140 S. Clinton St., Chicago.

"All roads lead to Rome."

And all business in New York seems to tend toward

Grand Central Station.

This great building, which covers the space of four city blocks, beginning at the corner of 4th Avenue and 42d Street, is the Metropolitan terminus of the

NEW YORK CENTRAL LINES

and is the center of the hotel, residence, club and theater district of the second city of the world. To reach it, see that your ticket reads by the NEW YORK CENTRAL.

A copy of the 40-page illustrated Catalogue of the "Four Track Series," New York Central's books of travel and education, will be sent free, post-paid, to any address on receipt of a postage stamp, by George H. Daniels, General Passenger Agent, New York Central & Hudson River Railroad, Grand Central Station, New York.

M'CORMICK TURBINE.

On Vertical or Horizontal Shaft.
Especially Adapted for Electrical Work.

Gives a higher percentage of useful effect than any other water-wheel heretofore made. All sizes, right and left hand, are built from patterns perfected under systematic tests in the Holyoke Testing Flume.

Parties having power plants which are unsatisfactory, and those contemplating the improvement of powers, will find it to their interest to confer with us, **as we are willing to guarantee results where others have failed, no matter what make of turbine has been in use. STATE REQUIREMENTS AND SEND FOR CATALOGUE.**

Two 100 K. W. General Electric, 4-pole, speed, 650 R. P. M.
One 100 K. W. Walker, 4-pole, speed, 750 R. P. M.
Two 100 K. W. Edison, bipolar, speed, 620 R. P. M.
One 90 K. W. Thomson-Houston, 4-pole, speed, 700 R. P. M.
One 80 K. W. General Electric, 4-pole, speed, 700 R. P. M.
Two 80 K. W. Detroit, bipolar, speed, 620 R. P. M.
Five 62 K. W. Thomson-Houston, type D, speed, 900 R. P. M.
One 50 K. W. Brush, type Q, speed, 1,050 R. P. M.

ALTERNATORS.

Two 250 K. W. General Electric, 2,400 volts, 50 cycles, three-phase, speed, 600 R. P. M.
One 200 K. W. General Electric, 2,300 volts, 40 cycles, three-phase, speed, 480 R. P. M.
One 180 K. W. General Electric, 2,300 volts, 60 cycles, single-phase, speed, 600 R. P. M.
One 180 K. W. Westinghouse, 2,200 volts, 60 cycles, two-phase, speed, 514 R. P. M.
One 150 K. W. Westinghouse, 2,300 volts, 60 cycles, single-phase, speed, 625 R. P. M.
One 150 K. W. Stanley, 1,100-2,200 volts, 133 cycles, two-phase, speed, 800 R. P. M.
Two 120 K. W. General Electric, 1,040 volts, 125 cycles, single-phase, speed, 1,070 R. P. M.
One 120 K. W. General Electric, 2,080 volts, 125 cycles, single-phase, speed, 1,070 R. P. M.
One 90 K. W. General Electric, 2,300 volts, 60 cycles, single-phase, speed, 900 R. P. M.
One 75 K. W. Stanley, 1,200-2,400 volts, 133 cycles, two-phase, speed, 1,000 R. P. M.
Three 35 K. W. Thomson-Houston, 1,100 volts, 125 cycles, single-phase, speed, 1,500 R. P. M.

ALTERNATING MOTORS.

Two 200 H. P. Stanley synchronous motors, 133 cycles, two-phase, 2,400 volts, speed, 1,000 R. P. M.
One 200 H. P. Westinghouse, type C, 25 cycles, two-phase, 400 volts, speed, 480 R. P. M.
One 130 H. P. Westinghouse, type C, 60 cycles, two-phase, 200 volts, speed, 850 R. P. M.
Two 30 H. P. Westinghouse, type C, 60 cycles, two-phase, 400 volts, speed, 850 R. P. M.
Two 20 H. P. Westinghouse, type C, 60 cycles, two-phase, 200 volts, speed, 840 R. P. M.
One 2 H. P. Wagner, 60 cycles, single-phase, 104 volts, speed, 1,800 R. P. M.
One ½ H. P. General Electric, 60 cycles, single-phase, 110 volts, speed, 1,800 R. P. M.

ARC GENERATORS.

One No. 12 Brush, 9.6 amperes, 125 lamps.
Two No. 12 Brush, 6.6 amperes, 170 lamps.
Two No. 11 Brush, 9.6 amperes, 120 lamps.
Four No. 9 Brush, 9.6 amperes, 80 lamps.
Two No. 9½ Brush, 6.6 amperes, 120 lamps.
One No. 9B Brush, 6.6 amperes, 120 lamps.
Five M. D. 12, Thomson-Houston, 6.8 amperes, 75 lamps.
Two M. D. 2, Thomson-Houston, 9.6 amperes, 50 lamps.
Six L. D. 12, Thomson-Houston, 6.8 amperes, 50 lamps.
One M. 12, Thomson-Houston, 6.8 amperes, 45 lamps.

A few very good Babcock and Wilcox water tube boilers. Arc lamps, both for direct and alternating current, series or multiple circuits. Transformers, General Electric "H," Thomson-Houston "F" and many other types, for 60 and 125 cycles.

GENERATORS—500 Volts.

Two T. H., 500 K. W.
Four T. H., 270 K. W., arranged to be driven with a single pulley clutch coupling on each side of pulley.
One General Electric, 250 K. W.
One Westinghouse, 175 K. W.
Two General Electric, 100 K. W., 4 pole.
Two General Electric, 100 K. W., 6 pole.
Six Edison, No. 60, 175 K. W.
Six T. H., D62.
One Edison No. 20, 60 K. W.

GENERATORS—110 Volts.

Two 210 K. W., G. E. design, 14 pole, for direct connection, at a speed of 120 R. P. M.
Four 60 K. W. Edison.
Two 46 K. W. Edison.

ALTERNATING GENERATORS.

One 750 K.W., Westinghouse 60-cycle, 2-phase, 2,200 volt generator, belted to one 24 and 48x60 cross-compound condensing Cooper Corliss engine, complete.
Two 100 K. W., G.E. 3 phase, 60 cycle generator, complete.
Two 100 K. W., G. E., 1100 volts monocyclic, complete.
One 60 K. W., Westinghouse, 1100 volts.
One 35 K. W., Westinghouse, 1100 volts, complete.

STREET CAR EQUIPMENT.

One hundred and eighty 25 H. P. motors, new and complete with pinions, gear and gear cases.
One hundred and eighty "K" Controllers.
Twenty-five K-2 Controllers.

ENGINES.

Six 36 and 60x60, Cooper cross-compound non-condensing, new, never shipped from factory.
One 30x54 St. Louis Corliss.
Two 24x60 Lane & Bodley, designed for rolling mill work.
One 28x60 Pennsylvania Iron Works Co.
One 20x48 Wheelock.
One 20x48 Double Wheelock.
One 20x42 Wheelock.
One 14x42 Hamilton Corliss.
Two 21x18 Armington & Sims.
Four 16 and 22x22 Houston, Stanwood & Gamble, cross-compound.
Five 12 and 20x16 tandem compound Ball.
Two 11 and 17x14 cross-compound Ideal.
Two 9 and 16x12 tandem compound Ball.
One 8 and 13x12 tandem compound Ball.
Three 17x18, Skinner, with air cylinders attached.
Two 16x20 Porter-Allen.
Two 15x20 Automatic Russell.
One 15½x15 Armington & Sims high speed simple automatic, 270 R. P. M.
One 15x15 Armington & Sims simple automatic, 270 R. P. M.
One 13½x15 Armington & Sims high speed simple automatic, 300 R. P. M.
One 14x17 Fisher, new.

BOILERS.

Four 66x18 with 66 4-inch tubes. A complete battery at a great bargain.
Three 66 x 14, with 66 4-inch tubes.
Two 72 in. x 18 ft., with 66 4-inch tubes.
Five 60x16 ft. high pressure boilers.
Two Sterling Water Tube Boilers, 250 H.P. each.
Two 500 H. P. Hazelton.

FERRIS WHEEL.

One 60 ft. Ferris Wheel, electrically driven.

AT A BARGAIN — A complete Edison 3-wire plant of 300 K. W. capacity.

It will be profitable to wire or write us giving requirements of machinery wanted or for sale.

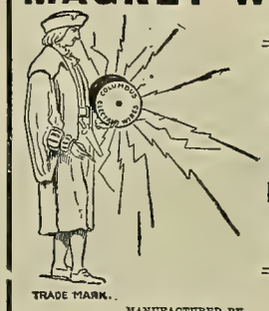
MAGNET WIRE



ROUND, SQUARE AND RECTANGULAR.

MANUFACTURED BY
Columbus Insulated Wire and Brass Co.
COLUMBUS, OHIO.

DON'T CRY OVER SPILT MILK.

If Electric Companies will install our system of Underground Steam Mains, they can sell their Exhaust Steam for enough to pay all their station expenses and interest on the investment for the Steam Mains. It also enables them to increase their electrical business.

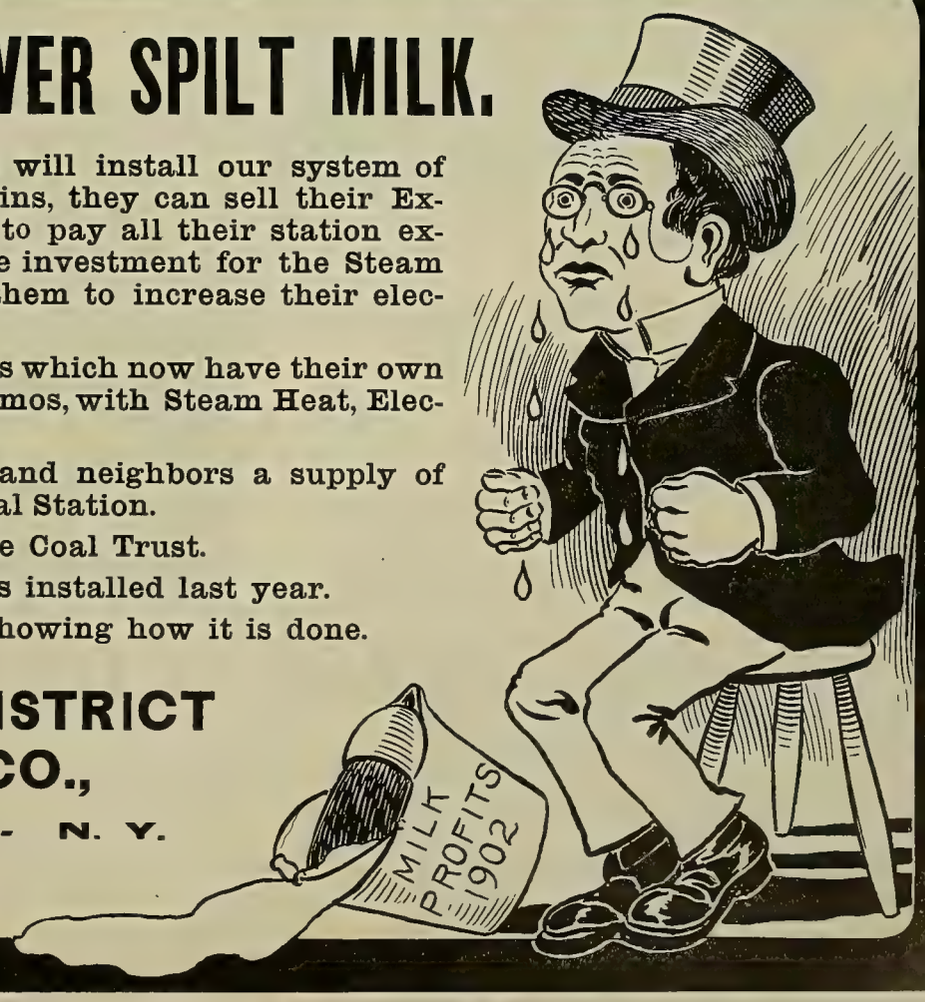
To furnish large blocks which now have their own boilers, engines and dynamos, with Steam Heat, Electric Light and Power.

To give their friends and neighbors a supply of Steam Heat from a Central Station.

They can laugh at the Coal Trust.

Thirty-five new plants installed last year.

Write for pamphlet showing how it is done.



AMERICAN DISTRICT STEAM CO.,

LOCKPORT, - N. Y.

Mention Western Electrician.

We all know the expense that scale causes the owner and the annoyance it occasions the Chief Engineer. The laboratory of this company is one of the most complete in the United States. A specialty is made of the careful and economical treatment of boiler waters.

CEDAR
POLES AND POSTS.

Attention!

The Holcomb-Lobb Company have retired from the cedar business and we have purchased their entire stock of **cedar posts** and **poles,** also their principal yards at Marinette, Wisconsin, and Masonville, Mich.

This places us in a very advantageous position, giving us in conjunction with our own yards, local connections with all the trunk lines on the northern peninsula. We are prepared to make attractive prices on mixed carloads of posts and poles as well as in straight carload lots. Our great specialty is the pole business. Our stock is the very best. A trial order will demonstrate this fact. Let us hear from you.

Dynamo Tender Becomes Superintendent Through the I. C. S.

When I enrolled in the Electric Power and Lighting Course of the International Correspondence Schools, I was employed as engineer and dynamo tender by the Walton Electric Company. After studying my Course for about six months, I showed my Certificates of Progress to the President of another company and was given a position in which I have entire charge of an electric-light plant. My salary has been almost doubled since I enrolled. I believe that I owe my advancement entirely to the I. C. S. WALTER H. DAILY, *Walton, N. Y.*

This is but one of many hundred indorsements, proving that our students succeed. Our new free booklet, "1001 Stories of Success," gives the names, addresses, and progress of over a thousand other students whom we have placed on the road to prosperity. Every student of the I. C. S. is entitled to the assistance of the Students' Aid Department in securing advancement or a new position. Our Courses cost from $10 up. Terms easy. No books to buy. Start TODAY to rise!

Fill Out and Send in the Coupon NOW!

INTERNATIONAL CORRESPONDENCE SCHOOLS,
Box 1002, SCRANTON, PA.

Please send me, free, a copy of "1001 Stories of Success," and explain how I can qualify for the position before which I have marked X.

LOWER PART OF FORM C ARC LAMPS

CONCERNING GLOBE BREAKAGE

GLOBE BREAKAGE IS CAUSED BY

1st—Careless lamp trimmers.
2nd—Defective globe holders.

IT MAY BE MINIMIZED BY

1st—Discharging the careless trimmer.
2nd—Specifying "Form C Wood Arc Lamps."

CAUSES:	REMEDIES:
Large contact of heated metal on heated glass causes discoloration and breakage due to excessive or uneven heating.	The three-point contact of the inner globe holder of Form C arc lamps eliminates this cause of globe breakage.
Changes in temperature of inner globe seat will crack a globe as surely as a dash of cold water on a hot glass.	The form of gas cap used on Form C lamps will not break globes. The globe seat remains at the temperature of the globe.
Outer globes will heat and must expand. If fastened by ordinary thumb screws they are sure to be broken when screws are tightly set.	Three leaf springs mounted on the ends of thumb screws in the outer globe holder of Form C lamps permit expansion of globe without breakage.

OUTER GLOBE HOLDER.

HABIRSHAW

Complete stock of all sizes constantly on hand and for sale at lowest market prices by

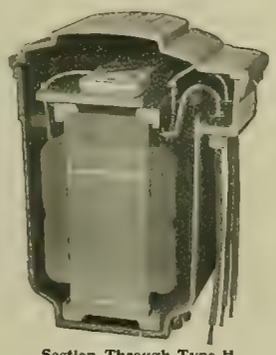
CHICAGO EDISON COMPANY,

WRITE FOR PRICES.

139 ADAMS STREET, CHICAGO.

GENERAL ELECTRIC COMPANY'S

Type H Transformers.



Section Through Type H Transformer.

CORE TYPE—OIL COOLED.

Among the refinements in construction which characterize Type H Transformers are:

The Vacuum Drying and Compound Filling Treatment of the Coils. "Separately Wound" Coils (with Subdivided Primaries) which are insulated before being placed on the core. U shaped core punchings (minimizing joints).

These features all contribute to the durability and high efficiency for which Type H Transformers are famous.

GENERAL OFFICES, SCHENECTADY, N. Y.

Chicago Office: Monadnock Block. Sales Offices in all Large Cities.

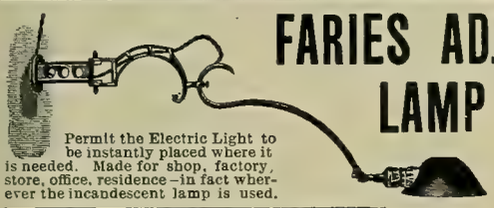
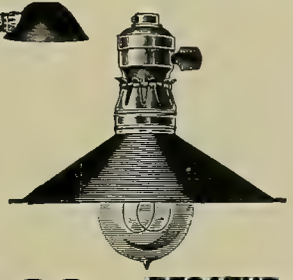
FARIES ADJUSTABLE LAMP HOLDERS



Permit the Electric Light to be instantly placed where it is needed. Made for shop, factory, store, office, residence—in fact wherever the incandescent lamp is used.

WE MANUFACTURE:
Portables, Chandeliers, Brackets, Desk Lamps, Clusters, Canopies and All Sizes and Styles of Shades and Reflectors.

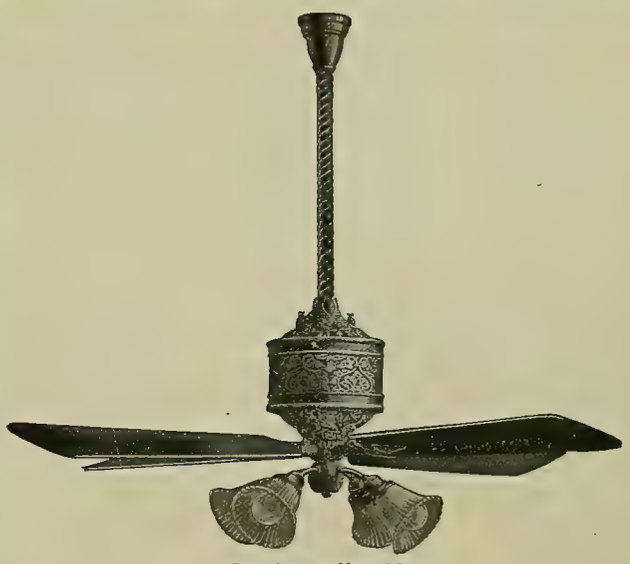
Goods carried by all principal jobbers. Send for Catalogue No. 10, just issued.



FARIES MFG. CO., DECATUR ILL.

You should be largely represented in the May 23rd and May 30th issues of the Western Electrician — the numbers to be devoted to the coming National Electric Light Convention.

Diehl Fan Motors



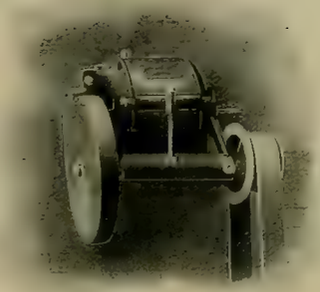
Catalogue No. 46.

THE NEW DIEHL FAN

With or without lights; 2 or 3 speeds; special Nyssa wood blades; artistic design. Our 1903 catalogue shows 14 designs of ceiling, also new desk and the Coleman device. *Send for it.*

DIEHL MANUFACTURING CO.,

BRANCHES: New York, Philadelphia, Boston. Elizabethport, N. J.



SOME OF THE REASONS WHY

OUR MOTORS ARE BECOMING SO POPULAR AND GIVING SUCH UNIVERSAL SATISFACTION

1st—They are single phase, self-starting.
2nd—The only operation necessary to start them is to close either the primary or secondary circuit of your system by means of a double pole switch located at any convenient point, however distant from the motor.
3rd—They require a minimum amount of attention.
4th—The cost of maintenance is negligible.
5th—The cost of installation is low, only requiring one transformer and two wires to supply current to the motor, whether on single or multiphase circuits.
6th—The transformer losses are less than with a multiphase motor.
7th—They are so constructed, of the best material, that they are always ready to run, and the most inexperienced can operate them with perfect results.

If you would know more of their salient features, write us

ELECTROLYSIS-PROOF

UNDERGROUND CONDUIT

OUR CONDUIT IS { *Absolutely—Electrolysis-Proof, Non-Abrasive, Moisture-Proof, Non-Corrosive, Perfect Insulator.* }

Insulation Test, **66,000 VOLTS.**

A perfect joint which is self-aligning, making the conduit line a solid tube from manhole to manhole.

Construction simple, rapid and inexpensive, requires no skilled labor.

Cables drawn more easily and a longer distance than in any other.

Resistance strength when underground as great as any.

Life of Conduit everlasting. Asphalt never deteriorates.

A REVOLUTION IN FUSES!

BETTER THAN THE BEST.

CHEAPER THAN THE CHEAPEST.

THE McBRIDE "ARKLESS"

ABSOLUTELY SAFE, EFFICIENT, NON-ARCING.

CONFORMS WITH UNDERWRITERS' REQUIREMENTS.

POPULAR AND SUCCESSFUL BECAUSE

It gives the maximum efficiency at minimum cost.
It is especially adapted to the old open-link cut outs—it makes them safe.
It is just the thing for tablet boards and fusible knife switches.
It is creating the greatest sensation in the trade.

MADE FOR 125 AND 250 VOLTS. FROM 6 TO 30 AMPERES.

McBRIDE MFG. CO.,
11 E. Woodbridge St., DETROIT, MICH.

We Did Not Build a Factory

to try and get one sample order from you. We want your business so badly for the next five, the next ten or twenty years, that we will not ship you sample lamps on a sample order but the honest, average run of the most modern factory in the United States.

You will find Independent Lamps good enough to order and re-order. We think this is the winning way. If you agree with us, try a barrel of our lamps. Remember that anything you use, we make—any size, any style, any candle-power, any efficiency.

Quick shipments always.

We have ☞
not made a ☞
big start ☞
but after a ☞
trial you'll ☞

Two 100 K. W. Edison, bipolar, speed, 620 R. P. M.
One 90 K. W. Thomson-Houston, 4-pole, speed, 700 R. P. M.
One 80 K. W. General Electric, 4-pole, speed, 700 R. P. M.
Two 80 K. W. Detroit, bipolar, speed, 620 R. P. M.
Five 62 K. W. Thomson-Houston, type D, speed, 900 R. P. M.
One 50 K. W. Brush, type Q, speed, 1,050 R. P. M.

ALTERNATORS.

Two 250 K. W. General Electric, 2,400 volts, 50 cycles, three-phase, speed, 600 R. P. M.
One 200 K. W. General Electric, 2,300 volts, 40 cycles, three-phase, speed, 480 R. P. M.
One 180 K. W. General Electric, 2,300 volts, 60 cycles, single-phase, speed, 600 R. P. M.
One 150 K. W. Westinghouse, 2,200 volts, 60 cycles, two-phase, speed, 514 R. P. M.
One 150 K. W. Westinghouse, 2,300 volts, 60 cycles, single-phase, speed, 625 R. P. M.
One 150 K. W. Stanley, 1,100-2,200 volts, 133 cycles, two-phase, speed, 800 R. P. M.
Two 120 K. W. General Electric, 1,040 volts, 125 cycles, single-phase, speed, 1,070 R. P. M.
One 120 K. W. General Electric, 2,080 volts, 125 cycles, single-phase, speed, 1,070 R. P. M.
One 90 K. W. General Electric, 2,300 volts, 60 cycles, single-phase, speed, 900 R. P. M.
One 75 K. W. Stanley, 1,200-2,400 volts, 133 cycles, two-phase, speed, 1,000 R. P. M.
Three 35 K. W. Thomson-Houston, 1,100 volts, 125 cycles, single-phase, speed, 1,500 R. P. M.

ALTERNATING MOTORS.

Two 200 H. P. Stanley synchronous motors, 133 cycles, two-phase, 2,400 volts, speed, 1,000 R. P. M.
One 200 H. P. Westinghouse, type C, 25 cycles, two-phase, 400 volts, speed, 480 R. P. M.
One 130 H. P. Westinghouse, type C, 60 cycles, two-phase, 200 volts, speed, 850 R. P. M.
Two 30 H. P. Westinghouse, type C, 60 cycles, two-phase, 400 volts, speed, 850 R. P. M.
Two 20 H. P. Westinghouse, type C, 60 cycles, two-phase, 200 volts, speed, 840 R. P. M.
One 2 H. P. Wagner, 60 cycles, single-phase, 104 volts, speed, 1,800 R. P. M.
One ½ H. P. General Electric, 60 cycles, single-phase, 110 volts, speed, 1,800 R. P. M.

ARC GENERATORS.

One No. 12 Brush, 9.6 amperes, 125 lamps.
Two No. 12 Brush, 6.6 amperes, 170 lamps.
Two No. 11 Brush, 9.6 amperes, 120 lamps.
Four No. 9 Brush, 9.6 amperes, 80 lamps.
Two No. 9½ Brush, 6.6 amperes, 120 lamps.
One No. 9B Brush, 6.6 amperes, 120 lamps.
Five M. D. 12, Thomson-Houston, 6.8 amperes, 75 lamps.
Two M. D. 2, Thomson-Houston, 9.6 amperes, 50 lamps.
Six L. D. 12, Thomson-Houston, 6.8 amperes, 50 lamps.
One M. 12, Thomson-Houston, 6.8 amperes, 45 lamps.

A few very good Babcock and Wilcox water tube boilers. Arc lamps, both for direct and alternating current, series or multiple circuits. Transformers, General Electric "H," Thomson-Houston "F" and many other types, for 60 and 125 cycles.

GENERATORS—500 Volts.

Two T. H., 500 K. W.
Four T. H., 270 K. W., arranged to be driven with a single pulley clutch coupling on each side of pulley.
One General Electric, 250 K. W.
One Westinghouse, 175 K. W.
Two General Electric, 100 K. W., 4 pole.
Two General Electric, 100 K. W., 6 pole.
Six Edison, No. 60, 175 K. W.
Six T. H., D62.
One Edison No. 20, 60 K. W.

GENERATORS—110 Volts.

Two 210 K. W., G. E. design, 14 pole, for direct connection, at a speed of 120 R. P. M.
Four 60 K. W. Edison.
Two 46 K. W. Edison.

ALTERNATING GENERATORS.

One 750 K.W., Westinghouse 60-cycle, 2-phase, 2,200 volt generator, belted to one 24 and 48x60 cross-compound condensing Cooper Corliss engine, complete.
Two 100 K. W., G.E. 3 phase, 60 cycle generator, complete.
Two 100 K. W., G. E., 1100 volts monocyclic, complete.
One 60 K. W., Westinghouse, 1100 volts.
One 35 K. W., Westinghouse, 1100 volts, complete.

STREET CAR EQUIPMENT.

One hundred and eighty 25 H. P. motors, new and complete with pinions, gear and gear cases.
One hundred and eighty "K" Controllers.
Twenty-five K-2 Controllers.

ENGINES.

Six 36 and 60x60, Cooper cross-compound non-condensing, new, never shipped from factory.
One 30x54 St. Louis Corliss.
Two 24x60 Lane & Bodley, designed for rolling mill work.
One 28x60 Pennsylvania Iron Works Co.
One 20x48 Wheelock.
One 20x48 Double Wheelock.
One 20x42 Wheelock.
One 14x42 Hamilton Corliss.
Two 21x18 Armington & Sims.
Four 16 and 22x22 Houston, Stanwood & Gamble, cross-compound.
Five 12 and 20x16 tandem compound Ball.
Two 11 and 17x14 cross-compound Ideal.
Two 9 and 16x12 tandem compound Ball.
One 8 and 13x12 tandem compound Ball.
Three 17x18, Skinner, with air cylinders attached.
Two 16x20 Porter-Allen.
Two 15x20 Automatic Russell.
One 15½x15 Armington & Sims high speed simple automatic, 270 R. P. M.
One 15x15 Armington & Sims simple automatic, 270 R. P. M.
One 13½x15 Armington & Sims high speed simple automatic, 300 R. P. M.
One 14x17 Fisher, new.

BOILERS.

Four 66x18 with 66 4-inch tubes. A complete battery at a great bargain.
Three 66 x 14, with 66 4-inch tubes.
Two 72 in. x 18 ft., with 66 4-inch tubes.
Five 60x16 ft. high pressure boilers.
Two Sterling Water Tube Boilers, 250 H.P. each.
Two 500 H. P. Hazelton.

FERRIS WHEEL.

One 60 ft. Ferris Wheel, electrically driven.

AT A BARGAIN—A complete Edison 3-wire plant of 300 K. W. capacity.

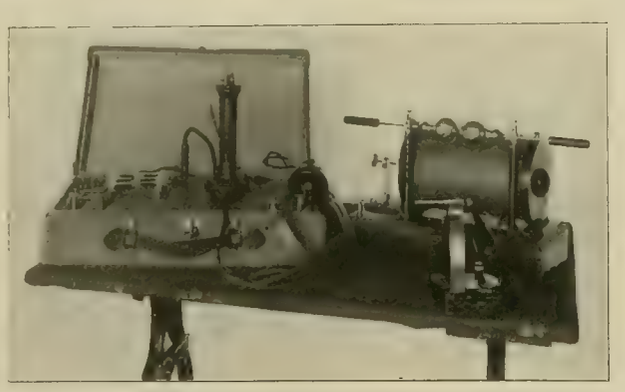
It will be profitable to wire or write us giving requirements of machinery wanted or for sale.

JOHN A. STEWART ELECTRIC CO.

Offices: 430 Sycamore St. Factory and Warehouse: LUDLOW, KY.

CINCINNATI, OHIO.

WE MANUFACTURE WIRELESS TELEGRAPH APPARATUS



THIS SET COSTS $50.00 F. O. B. FACTORY. Comprises special Clark high-frequency sending coil, giving heavy quantity spark, Clark multiple microphonic responder, with telephonic receiver for the ear, local primary batteries, necessary retardation coils; in fact every thing to make it complete wireless telegraph station, including sender and responder, except of course the aerial overhead wire, and the coil battery, which will have to be furnished by the buyer unless he can connect with local lighting service.

LIQUID INTERRUPTER. Should buyer desire a liquid interrupter instead of usual vibrator which is attached to the Clark coil of this outfit, it will cost additional price, which will be quoted on application. With Clark liquid interrupter a quantity of liquid is included, additional supply can be obtained at reasonable cost. As a caution, it should be understood that a coil, when furnished *without* the liquid interrupter, *should not* be connected direct to the 110 or 500-volt lighting circuit, unless through a suitable resistance coil. The Clark interrupter and sending coil, however, are connected directly to the lighting circuit, say 110 volts, no additional resistance being required, like in the case where a vibrator is used. This is an important and valuable feature.

WE DO NOT BUILD WIRELESS STATIONS any more than a manufacturer of dynamos contracts to build the central stations. WE ONLY SELL YOU THE APPARATUS AT SO MUCH PER SET; but we furnish you with full information, which will enable you to set up this apparatus, and to build your overhead aerial wire, connect with the ground, etc.

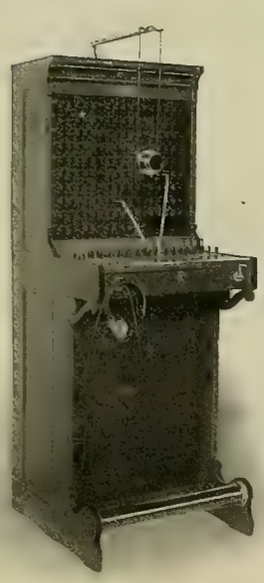
SWEDISH-AMERICAN TELEPHONE COMPANY, CHICAGO
SEE THE POINT?

AS YET UNRIVALED.



The exterior of this 150-line switchboard—the mere cabinet—may be successfully imitated, but the life of it—the inner workings, the last final touch that makes a Kellogg Switchboard work as if by magic—that point has never been reached by any other manufacturer.

No other board on the market has so many real points of merit as this has, with its self-restoring drops, its positively reliable night alarm, its perfect wiring, its perfect plugs and cords—yet after all it's the inimitable ***tout ensemble*** that places the Kellogg Switchboard alone and far above all others.

SUBSCRIPTIONS.

With January 1st began the thirty-second volume of the WESTERN ELECTRICIAN, and during 1903 it will complete its sixteenth and the first half of its seventeenth year, the paper having been founded July 2, 1887, and continued under the present management for this entire period. We offer the past as a guaranty of the future, and in addition pledge the best efforts of an experienced and competent staff to the constant improvement of the paper.

The WESTERN ELECTRICIAN is published for the purpose of assisting everyone interested in the art. It is a general electrical and scientific paper, and gives to its readers all the latest news and keeps them thoroughly informed of everything that is going on in all the different departments of the electrical and allied fields. Its technical and scientific articles cover all the latest inventions and improvements and keep the reader thoroughly informed of all that is new in the art. Its special articles, written by the most prominent authorities, as well as its general articles, are of the highest order, and no interested person can afford to be without the paper.

Every Lighting man should have one.

ELECTRICIAN PUBLISHING CO.,
Suite 510 Marquette Bldg., CHICAGO.

Don't Chase a Bubble When You Can Get a Sure Thing

LOWER PRICE OF COAL

MONEY SAVED

Electric companies should install our system of Exhaust Steam Heating Mains at once, and be in a position to increase their electrical business.

To pay their coal and labor bills, and interest on the investment for the steam mains from the sale of their exhaust steam.

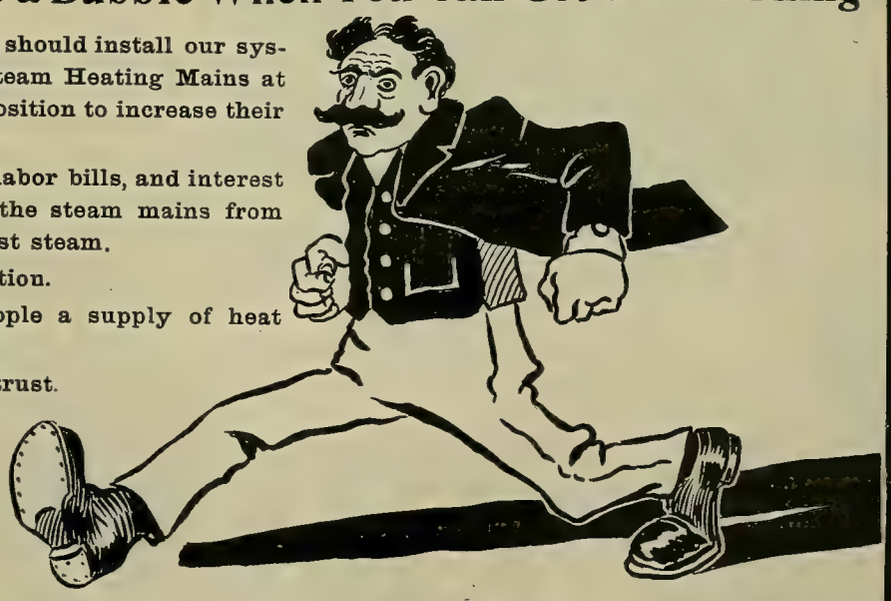
They can defy competition.

They can give the people a supply of heat from a central station.

They can laugh at the coal trust.

Thirty-five plants installed last year.

Write for pamphlet showing how it is done.



Mention Western Electrician.

AMERICAN DISTRICT STEAM CO.
LOCKPORT, N. Y.

We all know the expense that scale causes the owner and the annoyance it occasions the Chief Engineer. The laboratory of this company is one of the most complete in the United States. A specialty is made of the careful and economical treatment of boiler waters.

DEARBORN DRUG & CHEMICAL WORKS,
27-34 RIALTO BUILDING, CHICAGO, ILL. WM. H EDGAR, President Telephone: Harrison 3930 and 3931.

COMMUTATORS, after two or three years' usage with Dixon's Graphite Brushes, show surprising freedom from wear on account of the perfect smoothness of the Dixon Graphite. Ask for booklet 125-m.

CEDAR
POLES AND POSTS.

Attention!

The Holcomb-Lobb Company have retired from the cedar business and we have purchased their entire stock of **cedar posts** and **poles,** also their principal yards at Marinette, Wisconsin, and Masonville, Mich.

This places us in a very advantageous position, giving us in conjunction with our own yards, local connections with all the trunk lines on the northern peninsula. We are prepared to make attractive prices on mixed carloads of posts and poles as well as in straight carload lots. Our great specialty is the pole business. Our stock is the very best. A trial order will demonstrate this fact. Let us hear from you.

LOWER PART OF FORM C ARC LAMPS

CONCERNING GLOBE BREAKAGE

GLOBE BREAKAGE IS CAUSED BY

1st—Careless lamp trimmers.
2nd—Defective globe holders.

IT MAY BE MINIMIZED BY

1st—Discharging the careless trimmer.
2nd—Specifying "Form C Wood Arc Lamps."

CAUSES:	REMEDIES:
Large contact of heated metal on heated glass causes discoloration and breakage due to excessive or uneven heating.	The three-point contact of the inner globe holder of Form C arc lamps eliminates this cause of globe breakage.
Changes in temperature of inner globe seat will crack a globe as surely as a dash of cold water on a hot glass.	The form of gas cap used on Form C lamps will not break globes. The globe seat remains at the temperature of the globe.
Outer globes will heat and must expand. If fastened by ordinary thumb screws they are sure to be broken when screws are tightly set.	Three leaf springs mounted on the ends of thumb screws in the outer globe holder of Form C lamps permit expansion of globe without breakage.

OUTER GLOBE HOLDER.

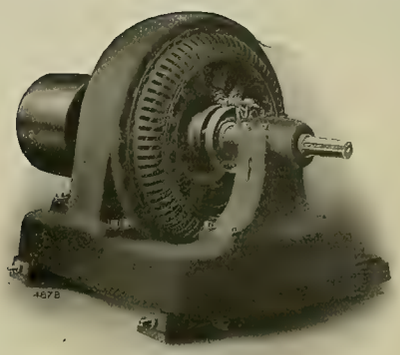
"Ceco"

Alternators

37 to 1,500 K. W.

Write for Detailed Description.



250 K. W. 3-Phase "Ceco" Alternator.

Christensen Engineering Co.

Chicago: Old Colony Bldg.
Pittsburg: Gellatly & Co., Times Bldg.

Milwaukee

San Francisco, Seattle, } Kilbourne & Clark Co.

We always carry a large stock of

WEATHERPROOF WIRE

for prompt shipments. Samples and prices on application.

AMERICAN INSULATED WIRE & CABLE CO.

Main Office and Factory:
241-247 S. Jefferson St., CHICAGO, ILL.

CARBONS

CONSUMERS CARBON CO.

LANCASTER, OHIO, U. S. A.

Carbons of all kinds and for all purposes.

An INCANDESCENT LAMP represents a large investment of capital, ingenuity and skilled workmanship, it is sold at a price so low as to necessitate eternal vigilance in cutting costs to a minimum. A successful lamp manufacturer can not afford to experiment with poor materials. This explains the popularity of

BAKER & CO.'S PLATINUM

408 N. J. R. R. Ave., NEWARK, N. J. 120 LIBERTY ST., NEW YORK.

We buy and Refine Platinum Scrap also.

ALWAYS IN STOCK.

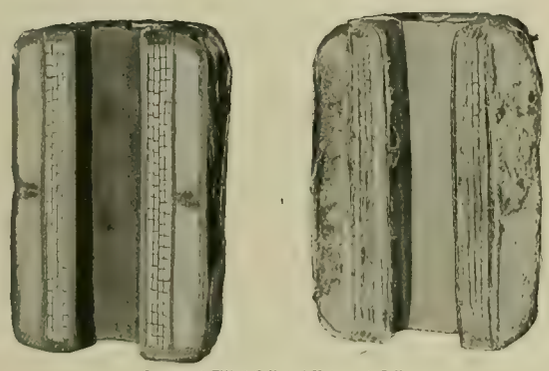
MANUFACTURED BY

G. I. Co.

CHICAGO EDISON COMPANY, 139 Adams Street, CHICAGO.

GENERAL ELECTRIC COMPANY'S

Type H Transformer Coils



Compound Filled Coil and Untreated Coils.

For over four years have been subjected to the vacuum drying and compound filling treatment. This process produces a solid mass of perfect insulating material in which conductors are firmly embedded; all moisture having been extracted and replaced by a non-absorbent insulating compound forced into every pore and crevice of the coil.

This treatment has caused these coils to successfully withstand the mechanical and electrical strains incident to intermittent or continued usage under the most severe conditions.

GENERAL OFFICES: SCHENECTADY, N. Y.

Chicago Office: Monadnock Block. Sales Offices in all Large Cities.

DUNCAN INTEGRATING WATTMETER

ELECTROLYSIS-PROOF
UNDERGROUND CONDUIT

OUR CONDUIT IS { *Absolutely— Electrolysis-Proof, Non-Abrasive, Moisture-Proof, Non-Corrosive, Perfect Insulator.* }

Insulation Test, **66,000 VOLTS.**

A perfect joint which is self-aligning, making the conduit line a solid tube from manhole to manhole.
Construction simple, rapid and inexpensive, requires no skilled labor.
Cables drawn more easily and a longer distance than in any other.
Resistance strength when underground as great as any.
Life of Conduit everlasting. Asphalt never deteriorates.

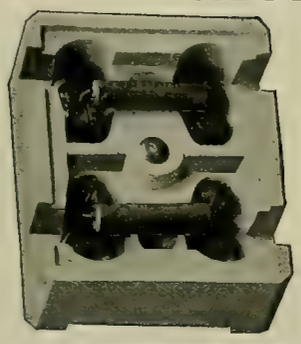
BETTER THAN THE BEST.

CHEAPER THAN THE CHEAPEST.

THE McBRIDE "ARKLESS"

ABSOLUTELY SAFE, EFFICIENT, NON-ARCING.



CONFORMS WITH UNDERWRITERS' REQUIREMENTS.

POPULAR AND SUCCESSFUL BECAUSE

It gives the maximum efficiency at minimum cost.
It is especially adapted to the old open-link cut outs—it makes them safe.
It is just the thing for tablet boards and fusible knife switches.
It is creating the greatest sensation in the trade.

MADE FOR 125 AND 250 VOLTS. FROM 6 TO 30 AMPERES.

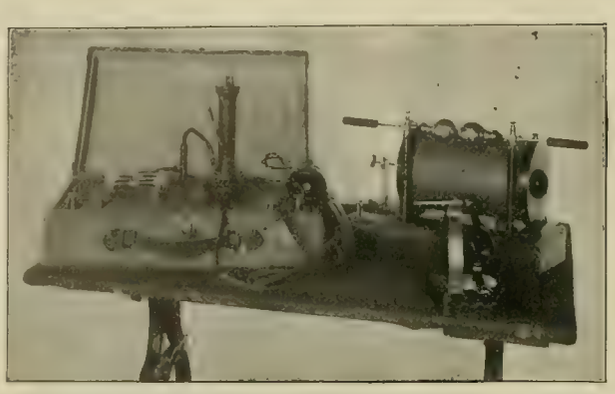
Manufactured by

General Incandescent Arc Light Co.

NEW YORK, U. S. A.

CHICAGO. CLEVELAND. CINCINNATI. ST. LOUIS. DENVER. BOSTON. SAN FRANCISCO. PHILADELPHIA.

WE MANUFACTURE
WIRELESS
TELEGRAPH APPARATUS



THIS SET COSTS $50.00 F. O. B. FACTORY. Comprises special Clark high-frequency sending coil, giving heavy quantity spark, Clark multiple microphonic responder, with telephonic receiver for the ear, local primary batteries, necessary retardation coils; in fact every thing to make it complete wireless telegraph station, including sender and responder, except of course the aerial overhead wire, and the coil battery, which will have to be furnished by the buyer unless he can connect with local lighting service.

LIQUID INTERRUPTER. Should buyer desire a liquid interrupter instead of usual vibrator which is attached to the Clark coil of this outfit, it will cost additional price, which will be quoted on application. With Clark liquid interrupter a quantity of liquid is included; additional supply can be obtained at reasonable cost. As a caution, it should be understood that a coil. when furnished *without* the liquid interrupter, *should not* be connected direct to the 110 or 500-volt lighting circuit, unless through a suitable resistance coil. The Clark interrupter and sending coil, however, are connected directly to the lighting circuit, say 110 volts, no additional resistance being required, like in the case where a vibrator is used. This is an important and valuable feature.

WE DO NOT BUILD WIRELESS STATIONS any more than a manufacturer of dynamos contracts to build the central stations. WE ONLY SELL YOU THE APPARATUS AT SO MUCH PER SET; but we furnish you with full information, which will enable you to set up this apparatus, and to build your overhead aerial wire, connect with the ground, etc.

CHARACTERISTICS.

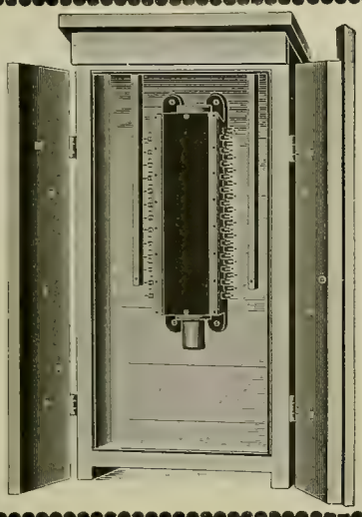
WE don't write Chinese, but we think if the above were translated, it would say something about "EVER-BEST" electrical supplies and apparatus. Anyway, we want to thoroughly impress you with the significance of our trade-mark — "EVER-BEST" not only applies to the goods we handle but to the method of handling them. Our combination of experienced men will soon show you that for anything electrical, from wire to a power plant, "EVER-BEST" should be your grounding point.

"Look it up in the Green Book."

Ewing-Merkle Electric Co.,
ST. LOUIS.

For all special lighting purposes use "Electra" Flame Light Carbons.

Ask for special list on High Grade Battery Carbons.



BUY DIRECT FROM THE MANUFACTURER

OUR CABLE BOXES

are made of 1⅛-inch finished lumber, all joints tongued, grooved and white leaded, doors framed, hinges and locking device bolted and riveted.

Painted two coats of asbestos paint inside, two coats of white lead outside; can be furnished with any make of terminal head.

Lock nut cable terminals, lightning arresters or combination cable terminals and protectors.

TELEPHONE OPERATORS' CHAIRS.

Oak and Birch, cane seat.
Oak and Birch, perforated leather seat.
These chairs finished in golden oak or mahogany.
Can furnish office chairs of all descriptions.

Order our CALPA insulator pins, substitute for locust. We make special insulator pins for high voltage transmission lines.

The R. E.-A. L. Monitor Bell.
(Patented.)

Hammer rod supported in two places and thrown straight out and in by the armature, striking gong on inside, near edge, thus giving a full, clear tone.

All springs made of Phosphor Bronze and so formed that there is least possible strain.

Contacts are platinized, adjustment is made by pressure on the standard which supports one contact. No screws or nuts being used in the adjustment, bell does not get out of order by operation.

Ordinarily the weak point is the pivot, the unreliable one the adjusting screw and nut. As these defects have been eliminated, this bell will stand hard usage and operate under adverse conditions.

The hammer entirely concealed by gong and cannot be tampered with.

It is especially adapted for use on street cars, as, in addition to the advantages mentioned, it is dust, insect and moisture proof.

NEW YORK N.Y.

DIRECT CONNECTED UNITS.

One 200 K. W. Westinghouse, 8-pole, 500-550-volt generator, with 18-30x16 Westinghouse compound engine.
One 187½ K. W. Westinghouse, 8-pole, 125-volt generator, with 18-30x16 Westinghouse compound engine.
One 130 K. W. General Electric, 8-pole, 125-volt generator, with 12-20x16 Erie Ball tandem compound engine.
One 60 K. W. Eddy, 4-pole, 125-volt generator, with 13x12 Buffalo Forge engine. Brand new.
One 50 K. W. Commercial, 6-pole, 125-volt generator, with 8½-13x12 Armington & Sims tandem compound engine.
One 50 K. W. Eddy, 4-pole, 125-volt generator, with 13x12 Harrisburg Ideal engine.
One 50 K. W. unit, consisting of two 25 K. W. General Electric, 4-pole, 125-volt generators, with one triple expansion vertical engine.
One 25 K. W. General Electric, 6-pole, 125-volt generator, with 9½x10 Armington & Sims engine.
Two 25 K. W. Westinghouse, 6-pole, 250-volt generators, each with 9x10 Ball and Wood engine.

ENGINES.

One 80 K. W. General Electric, 4-pole, speed, 700 R. P. M.
Two 80 K. W. Detroit, bipolar, speed, 620 R. P. M.
Five 62 K. W. Thomson-Houston, type D, speed, 900 R. P. M.
One 50 K. W. Brush, type Q, speed, 1,050 R. P. M.

ALTERNATORS.

Two 250 K. W. General Electric, 2,400 volts, 50 cycles, three-phase, speed, 600 R. P. M.
One 200 K. W. General Electric, 2,300 volts, 40 cycles, three-phase, speed, 480 R. P. M.
One 180 K. W. General Electric, 2,300 volts, 60 cycles, single-phase, speed, 600 R. P. M.
One 180 K. W. Westinghouse, 2,200 volts, 60 cycles, two-phase, speed, 514 R. P. M.
One 150 K. W. Westinghouse, 2,300 volts, 60 cycles, single-phase, speed, 625 R. P. M.
One 150 K. W. Stanley, 1,100-2,200 volts, 133 cycles, two-phase, speed, 800 R. P. M.
Two 120 K. W. General Electric, 1,040 volts, 125 cycles, single-phase, speed, 1,070 R. P. M.
One 120 K. W. General Electric, 2,080 volts, 125 cycles, single-phase, speed, 1,070 R. P. M.
One 90 K. W. General Electric, 2,300 volts, 60 cycles, single-phase, speed, 900 R. P. M.
One 75 K. W. Stanley, 1,200-2,400 volts, 133 cycles, two-phase, speed, 1,000 R. P. M.
Three 35 K. W. Thomson-Houston, 1,100 volts, 125 cycles, single-phase, speed, 1,500 R. P. M.

ALTERNATING MOTORS.

Two 200 H. P. Stanley synchronous motors, 133 cycles, two-phase, 2,400 volts, speed, 1,000 R. P. M.
One 200 H. P. Westinghouse, type C, 25 cycles, two-phase, 400 volts, speed, 480 R. P. M.
One 130 H. P. Westinghouse, type C, 60 cycles, two-phase, 200 volts, speed, 850 R. P. M.
Two 30 H. P. Westinghouse, type C, 60 cycles, two-phase, 400 volts, speed, 850 R. P. M.
Two 20 H. P. Westinghouse, type C, 60 cycles, two-phase, 200 volts, speed, 840 R. P. M.
One 2 H. P. Wagner, 60 cycles, single-phase, 104 volts, speed, 1,800 R. P. M.
One ½ H. P. General Electric, 60 cycles, single-phase, 110 volts, speed, 1,800 R. P. M.

ARC GENERATORS.

One No. 12 Brush, 9.6 amperes, 125 lamps.
Two No. 12 Brush, 6.6 amperes, 170 lamps.
Two No. 11 Brush, 9.6 amperes, 120 lamps.
Four No. 9 Brush, 9.6 amperes, 80 lamps.
Two No. 9½ Brush, 6.6 amperes, 120 lamps.
One No. 9B Brush, 6.6 amperes, 120 lamps.
Five M. D. 12, Thomson-Houston, 6.8 amperes, 75 lamps.
Two M. D. 2, Thomson-Houston, 9.6 amperes, 50 lamps.
Six L. D. 12, Thomson-Houston, 6.8 amperes, 50 lamps.
One M. 12, Thomson-Houston, 6.8 amperes, 45 lamps.

A few very good Babcock and Wilcox water tube boilers. Arc lamps, both for direct and alternating current, series or multiple circuits. Transformers, General Electric "H," Thomson-Houston "F" and many other types, for 60 and 125 cycles.

GENERATORS—500 Volts.

Two T. H., 500 K. W.
Four T. H., 270 K. W., arranged to be driven with a single pulley clutch coupling on each side of pulley.
One General Electric, 250 K. W.
One Westinghouse, 175 K. W.
Two General Electric, 100 K. W., 4 pole.
Two General Electric, 100 K. W., 6 pole.
Six Edison, No. 60, 175 K. W.
Six T. H., D62.
One Edison No. 20, 60 K. W.

GENERATORS—110 Volts.

Two 210 K. W., G. E. design, 14 pole, for direct connection, at a speed of 120 R. P. M.
Four 60 K. W. Edison.
Two 46 K. W. Edison.

ALTERNATING GENERATORS.

One 750 K.W., Westinghouse 60-cycle, 2-phase, 2,200 volt generator, belted to one 24 and 48x60 cross-compound condensing Cooper Corliss engine, complete.
Two 100 K. W., G.E. 3 phase, 60 cycle generator, complete.
Two 100 K. W., G. E., 1100 volts monocyclic, complete.
One 60 K. W., Westinghouse, 1100 volts.
One 35 K. W., Westinghouse, 1100 volts, complete.

STREET CAR EQUIPMENT.

One hundred and eighty 25 H. P. motors, new and complete with pinions, gear and gear cases.
One hundred and eighty "K" Controllers.
Twenty-five K-2 Controllers.

ENGINES.

Six 36 and 60x60, Cooper cross-compound non-condensing, new, never shipped from factory.
One 30x54 St. Louis Corliss.
Two 24x60 Lane & Bodley, designed for rolling mill work.
One 28x60 Pennsylvania Iron Works Co.
One 20x48 Wheelock.
One 20x48 Double Wheelock.
One 20x42 Wheelock.
One 14x42 Hamilton Corliss.
Two 21x18 Armington & Sims.
Four 16 and 22x22 Houston, Stanwood & Gamble, cross-compound.
Five 12 and 20x16 tandem compound Ball.
Two 11 and 17x14 cross-compound Ideal.
Two 9 and 16x12 tandem compound Ball.
One 8 and 13x12 tandem compound Ball.
Three 17x18, Skinner, with air cylinders attached.
Two 16x20 Porter-Allen.
Two 15x20 Automatic Russell.
One 15½x15 Armington & Sims high speed simple automatic, 270 R. P. M.
One 15x15 Armington & Sims simple automatic, 270 R. P. M.
One 13½x15 Armington & Sims high speed simple automatic, 300 R. P. M.
One 14x17 Fisher, new.

BOILERS.

Four 66x18 with 66 4-inch tubes. A complete battery at a great bargain.
Three 66 x 14, with 66 4-inch tubes.
Two 72 in. x 18 ft., with 66 4-inch tubes.
Five 60x16 ft. high pressure boilers.
Two Sterling Water Tube Boilers, 250 H.P. each.
Two 500 H. P. Hazelton.

FERRIS WHEEL.

One 60 ft. Ferris Wheel, electrically driven.

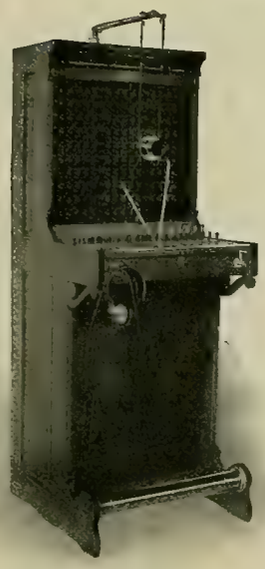
OVER 150,000 PHONES IN DAILY SERVICE
SWEDISH-AMERICAN TELEPHONE COMPANY, CHICAGO
SEE THE POINT?

AS YET UNRIVALED.



The exterior of this 150-line switchboard—the mere cabinet—may be successfully imitated, but the life of it—the inner workings, the last final touch that makes a Kellogg Switchboard work as if by magic—that point has never been reached by any other manufacturer.

No other board on the market has so many real points of merit as this has, with its self-restoring drops, its positively reliable night alarm, its perfect wiring, its perfect plugs and cords—yet after all it's the inimitable ***tout ensemble*** that places the Kellogg Switchboard alone and far above all others.

High In the Air
Amid Storm and Wind

THE TURNER DOUBLE JET GASOLINE TORCHES
will make a lineman's work much easier.

These torches are superior to all others for electricians' and lineman's work. The Double Jet construction of the burner generates the maximum degree of mechanical heat, and the wind has little effect on them. They are unequaled for Brazing, Tempering, Annealing, Fusing, Soldering, or any work requiring heat.

CHICAGO FUSE WIRE & MFG. CO.,

Manufacturers of

Fuse Wire, Fuse Links, Telephone Fuses and Supplies, Wire Joints.

We make a Specialty of FUSE WIRE and STRIP for TELEPHONE fuses, instrument fuses, and in fact anything requiring a very LOW FUSING point.

Our fine fuse wires are made with the same degree of accuracy which we have always maintained for all our product, and they have sufficient TENSILE STRENGTH to be handled without difficulty.

We are in position to take care of orders, large or small, regular or special, and can make prompt shipments.

358 Dearborn St., Chicago. 187 Pratt St., Buffalo. 853 Broadway, New York.

IT'S YOUR MOVE.

Fuel and labor are higher and dividends are less. With present high price of fuel electric companies should install one of our exhaust steam heating plants, and sell their steam for heating purposes, instead of throwing it away. By so doing,

They can increase their electric business.

They can increase their receipts.

They can defy competition.

They can furnish large blocks which now have their own boilers, engines and dynamos, with steam heat, electric light and power.

We have the only meter system in use.

Two hundred fifty heating plants in successful operation.

Write for our pamphlet showing how it is done.

M'CORMICK TURBINE.

On Vertical or Horizontal Shaft.
Especially Adapted for Electrical Work.

Gives a higher percentage of useful effect than any other water-wheel heretofore made. All sizes, right and left hand, are built from patterns perfected under systematic tests in the Holyoke Testing Flume.

Parties having power plants which are unsatisfactory, and those contemplating the improvement of powers, will find it to their interest to confer with us, as we are willing to guarantee results where others have failed, no matter what make of turbine has been in use. Announcement

The Westinghouse Air Brake Company

have developed an ENTIRELY NEW system for controlling and operating electric motors on railway trains.

This new Westinghouse System of Automatic Unit control is simpler, surer, safer than any other.

The simplicity is so great that the contrast both in appearance and reliability between this new form and any other kind of control apparatus as attached to a car, commands the instant attention of railway men who have heretofore regarded unit control apparatus as excessively complicated.

It is lighter, thus saving train weight; it is much more compact, thus saving space; it is simpler to install and operate; it uses less current, thus it is more economical than any other system. These several economies will more than pay the interest on the cost of purchase and installation.

This new system is combined with the Air Brake in such manner that it secures absolute safety with a minimum of mechanism.

The Westinghouse Air Brake Co. have also perfected a new Automatic Car Coupling which unites in a single operation the electric and brake pipe connections between each car. This gives safety to employes, quickens the making-up of trains, and greatly facilitates train operation.

Railway officers now operating electric trains, or contemplating the conversion of steam lines to electric systems are invited to inspect these new Westinghouse inventions at Pittsburg.

Protection *vs.* Efficiency

Protection of human life from the dangerous voltages of primary circuits is *usually* obtained in the design of transformers by sacrificing efficiency.

Insulation-filled space in the windings of a transformer is like column-filled floor space in a sky-scraper. It increases safety, but decreases working area.

Cross-section of Core and Coils.

Type A Transformer Windings are as safe as it is possible to make them—practically lightning-proof—and the space sacrificed to obtain this safety does not affect their high efficiencies.

It is really not "Protection *vs.* Efficiency," with Type A Transformers, but

Protection *and* Efficiency

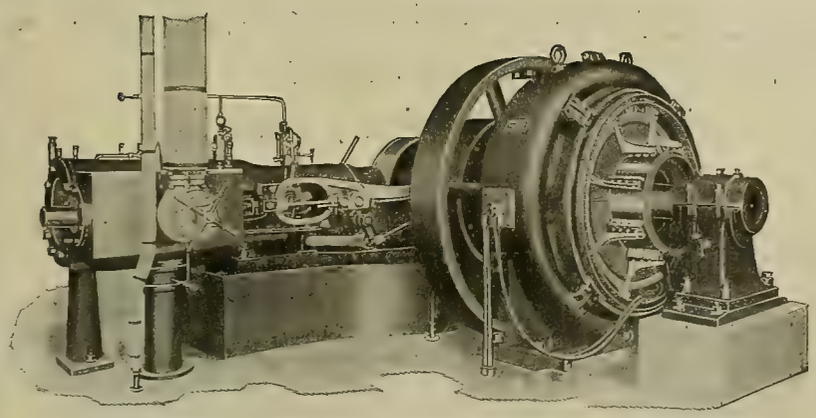
Triumph Generators and Motors Are the Standard of Excellence.



200 K. W. Triumph Generator, Direct-Connected to Buckeye Engine.

Our machines are constructed to give their maximum output without undue strain on any part. The design is simple, and embodies all the latest improvements. All parts are readily accessible and easily adjusted.

We employ the highest engineering talent, and use only the best workmanship and materials, which is a substantial guarantee that our machines are both efficient and durable.

It will pay you to investigate. Ask for Bulletin "W E."

SEE THE NERNST LAMPS

in St. Louis at the next Convention in 1904

(We are not in possession of advance information, but acting the role of prophet.)

The Nernst Lamp

GIVES MORE LIGHT FOR LESS MONEY

Is cheapest to burn, and therefore cheapest to buy, and will pay for itself in a short time

A FEW ADVANTAGES OVER OTHER KINDS

1—Requires only about one-half as much current as the incandescent.

2—Gives a natural white light, like the sun's rays, bringing out the true color of fabrics, etc.

3—75 per cent. of the light is thrown downward without any shadows.

4—Does not flicker, hum nor make any noise, being an absolutely steady light.

5—The power factor is 100 per cent.

Announcement

The constantly increasing demand for Christensen Air Brakes and "Ceco" Electrical Machinery has made a change of our organization necessary. To accomplish this result, the owners of the stock of this company have organized the National Electric Company, and the assets, good-will, etc., of this company have this day been transferred to the National Electric Company. The purposes, ownership, management and control of the new company are identical with those of the old.

We desire and solicit a continuance under our new name of the satisfactory relations which have heretofore existed between us and the trade.

Yours very truly,

CHRISTENSEN ENGINEERING COMPANY.

THE

General Electric Company's

Thomson High Torque Induction Meter

Has torque of 80 millimeter grammes at full load. Compare this with the torque of other meters. Losses in field at full load less than one watt. Losses in potential circuit less than two watts.

Total losses at full load in field and potential circuits about 2½ watts.

Torque of 32 millimeter grammes per watt loss at full load; weigh the importance of this fact.

GENERAL OFFICES: Schenectady, N. Y.

Chicago Office, Monadnock Block.

Sales Offices in all Large Cities.

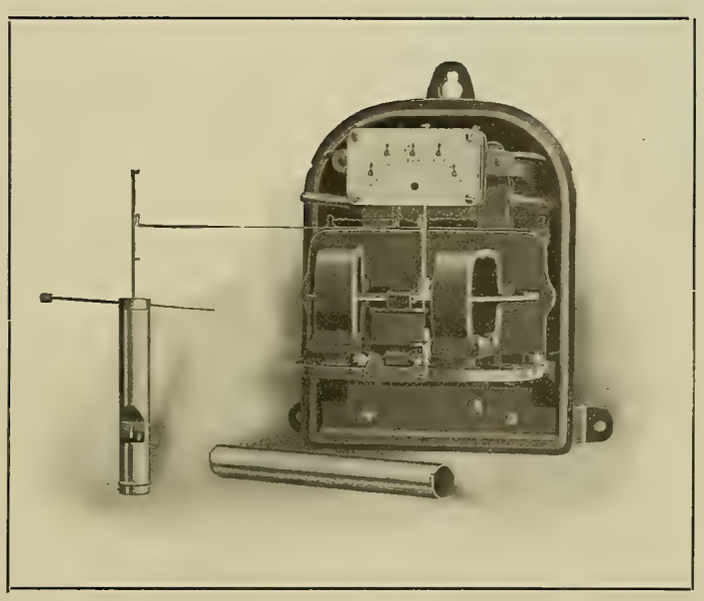
THE

General Electric Company's

Portable Torque Balance

The value of a meter is determined by its ability to maintain accuracy in use.

Permanent accuracy depends upon torque.



The General Electric Company's Portable Torque Balance will accurately measure the absolute torque of any motor meter.

Measure the torque of the meters you are using and propose to use.

This device will prove invaluable to all Central Stations.

GENERAL OFFICES: Schenectady, N. Y.

Chicago Office, Monadnock Block.

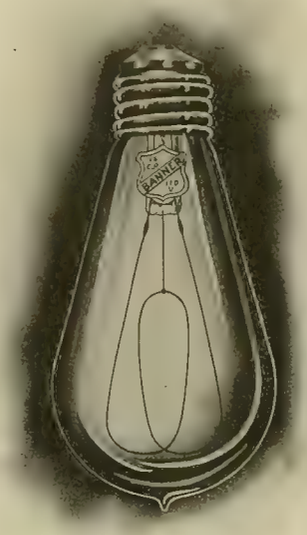
Sales Offices in all Large Cities.

BANNER LOGIC.

Banner Lamps—"Not thrown together" but carefully assembled by workmen who know the pride of doing good work and will do no other kind.

There is said to be a "Lamp Trust" selling "cheap" lamps. Undoubtedly the people who want that kind of lamps have to be catered to by someone. Why not a Trust? Certainly!

If we cannot make Banner Lamps as well as we know how, we'll quit making them.



It is easier to find a four-leaf clover at midnight than to come across a "Banner" that won't deliver the goods.

Is'nt it funny? A "low grade" lamp outside the Trust is a "high grade" one the moment it joins hands with the Magic Circle.

Put your "Trust" in "Banners" and you get the lamp that's trustworthy.

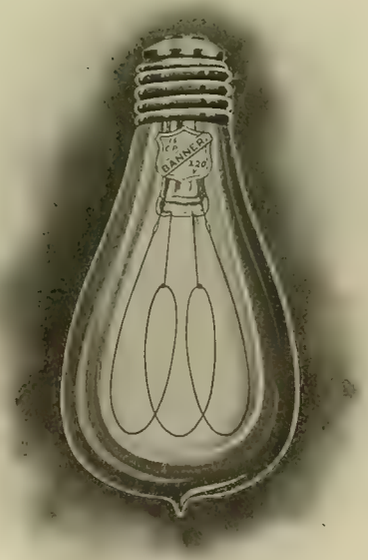
"Banner" Betterness is no more an accident than the St. Louis Exposition will be. Here are some of the "Wise Whys":

Management:
Awake and Enthusiastic.
Employes:
Skilful and ditto.
Material:
Bought right. Kept right. Handled right.
Machinery:
Plant Equipment '03 and next year '04.
You bet!

Banner Lamps—Not made but envied by the "Trust."

"Banners" live long, work well, shine bright and die hard.

When you want "Banner Brilliancy" from a "Banner" that is just exactly the time you can get it.



When you sell Banner Lamps you do not need to offer up a prayer that they'll stay sold.

All that human brains, human skill, human enthusiasm and earth's proudest product can contribute towards making a perfect Electric Lamp, will be found in the first of any 100 "Banners" you come across—and also the other 99.

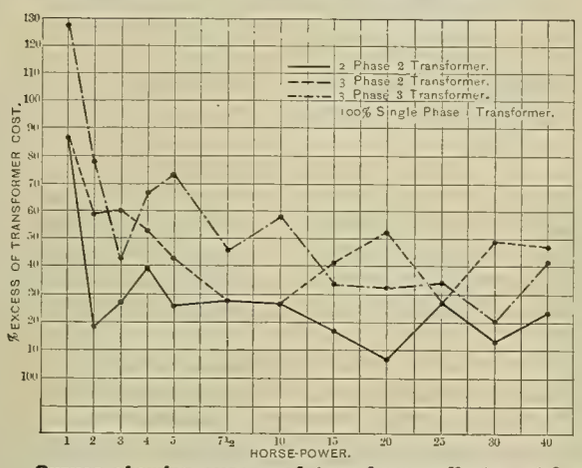
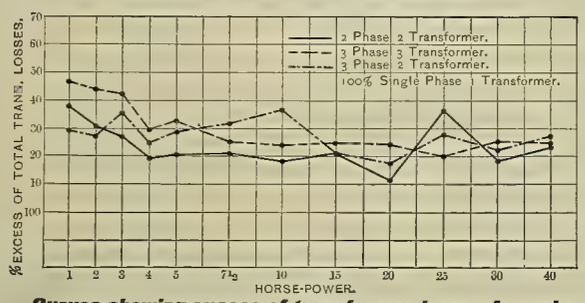
Why Multiphase Plants Use Single Phase Motors



Curves showing excess of transformer first cost for polyphase motors as compared with Single Phase.



Curves showing excess of transformer losses for polyphase motors as compared with Single Phase.

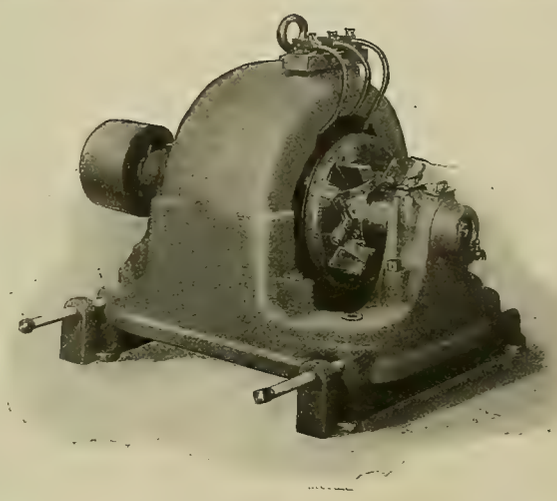
1—Because first cost of transformers is 25 to 50 per cent. less than for polyphase motors.

2—Because transformer losses are 25 to 50 per cent. less than for polyphase motors.

3—Because line construction costs 50 per cent. less than for polyphase motors.

4—Because Wagner Single Phase Motors do everything polyphase motors will do, and effect all the above economies.

And for many other reasons of less importance.



Will Single Phase Motors Operate Satisfactorily on Small Generators?

This question is effectually answered by the following data.

MUNICIPAL ELECTRIC LIGHT PLANT
HENDERSON, KENTUCKY

Generators...1—75 K. W., 60 cycles.
1—150 K. W., 60 cycles.
Wagner Motors...1—10 H. P., operating buggy factory.
1—7½ H. P., operating passenger elevator.
2—4 H. P., operating meat grinders.
Wagner Motors...1—4 H. P., operating printing office.
2—3 H. P., operating printing office.
1—2 H. P., operating bottling works.
1—1 H. P., operating job printing office.
1—½ H. P., operating six ceiling fans.
TOTAL CAPACITY WAGNER MOTORS, 100 H. P.

WHITEHALL ELECTRIC COMPANY
WHITEHALL, ILLINOIS

Generators. .1—75 K. W. 60 cycles.
Wagner Motors...1—25 H. P., operating city pumping plant.
1—25 H. P., " clay crusher in jug factory.
1—10 H. P., operating pottery factory.
Wagner Motors...10 motors, miscellaneous sizes, operating printing offices, elevators, pumping water for stock farm, grinding feed, etc.
TOTAL CAPACITY IN WAGNER MOTORS, 100 H. P.

LAUREL IMPROVEMENT COMPANY
LAUREL, MISS.

Generators...2—90 K. W., 60 cycles.
Wagner Motors...1—30 H. P., operating wagon factory.
1—30 H. P., operating railway machine shop.
1—30 H. P., operating cross-arm factory.
1—15 H. P., operating knitting mill.
Wagner Motors...1—10 H. P., 2— 4 H. P., 1— 3 H. P., 2— 2 H. P., operating miscellaneous plants
TOTAL CAPACITY IN WAGNER MOTORS, 100 H. P.

CRESCO LIGHT, HEAT AND POWER CO.
CRESCO, IOWA.

Generators...1—75 K. W. 60 cycles.
Wagner Motors...1—15 H. P., operating wood-working shop.
1—10 H. P., operating grain elevator.
1—10 H. P., installed on farm, operating feed cutters, deep well pump, cream sep't'rs, etc.
Wagner Motors...1—7½ H. P., operating machine shop.
3—1 H. P., operating printing presses and ice cream freezers.
TOTAL CAPACITY IN WAGNER MOTORS, 45 H. P.

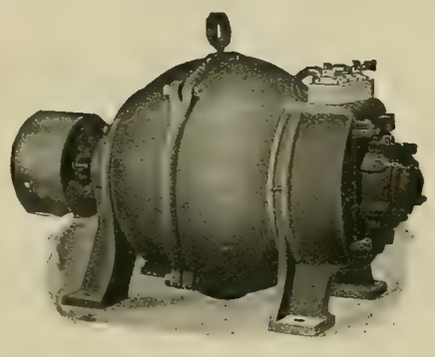
DIRECT-CURRENT ELECTRIC

MOTORS



THE SPRAGUE ELECTRIC COMPANY

for many years has been closely identified with the principal achievements in the design and construction of direct-current electric motors, and is recognized as an authority upon the installation of power plants. Long experience in this class of work has resulted in the accumulation of a vast amount of valuable data, thus enabling the Sprague Company to produce the very best possible results to the customer. The Sprague Electric Company's motors are unequaled for efficiency and durability. Write for bulletins Nos. 03206 and 03207.

THE STERLING SPECIAL.

Side	16	Candle Power.
Angle	16	" "
Tip	16	" "
Average	16	" "

DEAR SIR:

I am a young lady of 37 and in love with a gentleman of about the same age. I have met him several times, always at my home and in the evening, but the lights are so poor I can't get a good look at him. How can I arrange to see what he looks like?

U. D. F.

U. D. F.:

Get a few Sterling Special Lamps. They give 128% more candlepower for the same current.

NEXT.

DEAR MR. EDITOR:

I am a young orphan girl, aged 29, living with my parents and have been keeping company with a young man who says he loves me. We quarreled last night because I said the Sterling Special gave more light for the same money or the same light for less money. What shall I do, write him or let him go?

P. D. Q.

Let him go P. D. Q., he is a chump. The Sterling Special gives 128% more light for the same money or gives the same light and saves 56.25%.

Never write when you are not wrong.

Any further Information gladly given. Write, telegraph or call.

Special Announcement

WE HAVE JUST BOUGHT the immense manufacturing property corner of Sixteenth and Lincoln Streets, Chicago, situated on the C. B. & Q. R. R. tracks, occupying the entire block and improved with modern steel construction, truss roof buildings, electric power transmission, electric traveling cranes, railroad tracks running right into the building, etc., freight depots for all railroads within one quarter of a mile—ideally located for quick handling and quick shipments, either in car lots or less. At this new location we shall handle, overhaul and repair the larger size dynamos and motors exclusively, having outgrown the capacity of our present works. **To save the expense of moving these large machines to the new warehouse we are naming special low prices for immediate orders.** Come to the National Electric Convention and inspect these machines, or write at once if you can't come and are interested in any machines. General offices and sales department as heretofore at 54-62 S. Clinton Street, Chicago.

APPARATUS

For Central Station and Power House Equipment

A three hundred kilowatt alternating unit, consisting of one 300 K. W. Stanley, two-phase, 60-cycle, 2,400-volt alternator, directly connected to a 16-32x24 McIntosh, Seymour & Co. vertical cross-compound engine.

ALTERNATORS.

One 250 K. W. General Electric, 2,400 volts, 50 cycles, three-phase.
One 200 K. W. General Electric, 2,300 volts, 40 cycles, three-phase.
One 180 K. W. General Electric, 2,300 volts, 60 cycles, single-phase.
One 180 K. W. Westinghouse 2,200 volts, 60 cycles two-phase.
One 150 K. W. Westinghouse, 2,300 volts, 60 cycles, single-phase.
One 150 K. W. Stanley, 1,100-2,200 volts, 133 cycles, two-phase.
Two 120 K. W. General Electric, 1,040 volts, 125 cycles, single-phase.
One 120 K. W. General Electric, 2,080 volts, 125 cycles, single-phase.
One 90 K. W. General Electric, 2,300 volts, 60 cycles, single-phase.
One 75 K. W. Stanley, 1,200-2,400 volts, 133 cycles, two-phase.
One 60 K. W. Westinghouse, 2,200 volts, 60 cycles, two-phase.
One 60 K. W. Westinghouse, 2,200 volts, 60 cycles, single-phase.
One 45 K. W. Westinghouse, 2,200 volts, 60 cycles, single-phase.
Three 35 K. W. Thomson-Houston, 1,100 volts, 125 cycles, single-phase.

RAILWAY GENERATORS 500-550 VOLTS.

Two 500 K. W. General Electric, 6-pole, speed, 300 R. P. M.
Two 300 K. W. General Electric, 4-pole, speed, 400 R. P. M.
Two 225 K. W. General Electric, 6-pole, speed, 465 R. P. M.
One 200 K. W. Westinghouse, 6-pole, speed, 510 R. P. M.
Two 200 K. W. General Electric, 4-pole, speed, 425 R. P. M.
Two 180 K. W. Westinghouse, 4-pole, speed, 535 R. P. M.
One 110 K. W. Eddy, 4-pole speed, 600 R. P. M.
Two 100 K. W. General Electric, 4-pole, speed, 650 R. P. M.
One 100 K. W. Walker, 4-pole, speed, 750 R. P. M.
Two 100 K. W. Edison, bi-polar, speed, 620 R. P. M.
One 90 K. W. Thomson-Houston, 4-pole, speed, 700 R. P. M.
One 80 K. W. General Electric, 4-pole, speed, 700 R. P. M.
Two 80 K. W. Detroit, bi-polar, speed, 620 R. P. M.
Five 62 K. W. Thomson-Houston, type D, speed, 900 R. P. M.
One 50 K. W. Brush, type Q, speed, 1,050 R. P. M.

DIRECT CONNECTED UNITS.

One 200 K. W. Westinghouse, 8-pole, 500-550-volt generator, with 18-30x16 Westinghouse compound engine.
One 130 K. W. General Electric, 8-pole, 125-volt generator, with 12-20x16 Erie Ball tandem compound engine.
One 60 K. W. Eddy, 4-pole, 125-volt generator, with 13x12 Buffalo Forge engine. Brand new.
One 50 K. W. Commercial, 6-pole, 125-volt generator, with 8½-13x12 Armington & Sims tandem compound engine.
One 50 K. W. Eddy, 4-pole, 125-volt generator, with 13x12 Harrisburg Ideal engine.
One 50 K. W. unit, consisting of two 25 K. W. General Electric, 4-pole, 125-volt generators, with one triple expansion vertical engine.
One 30 K. W. Eddy, 4-pole, 125-volt generator, with 10x12 Watertown engine.
One 25 K. W. General Electric, 6-pole, 125-volt generator, with 9½x10 Armington & Sims engine.
Two 25 K. W. Westinghouse 6-pole, 250-volt generators, each with 9x10 Ball and Wood engine.

ENGINES.

One 26x48 Harris Corliss, 500 H. P.
One 18-34x48 Cooper Corliss, cross compound, 500 H. P.
One 23x48 Harris Corliss, 400 H. P.
One 20x36 Hewes & Phillips, 200 H. P.
One 18x48 George H. Corliss, 250 H. P
One 16x42 Providence Greene, 200 H. P.
Two 18-30x16 Westinghouse compound, 250 H. P. each.
Three 18½x18 Armington & Sims, 250 H. P. each.
One 18½x18 New York Safety, 250 H. P.
Two 10-18x20 Payne tandem compound, 150 H. P. each.
One 13-19x15 McIntosh, Seymour & Co. tandem, 175 H. P.
Two 14x13 Armington & Sims, 150 H. P.
One 14x14 Rice automatic, 125 H. P.
One 13x12 Armington & Sims, 125 H. P.
One 12-20x12 Westinghouse compound, 100 H. P.
One 12x12 New York Safety, 100 H. P.
One 10½-16½x12 Armington & Sims cross compound, 100 H. P.
One 9x16 Rice automatic, 75 H. P.
One 12x10 Westinghouse Junior, 75 H. P.
One 8x10 B. F. Sturtevant, 40 H. P.
One 7x8 Payne, 20 H. P.
Three 6x5 Westinghouse Junior, 12 H. P. each,
Two 5x4 Westinghouse Junior, 6 H. P. each.

Direct current generators and motors, 110, 220 and 500 volts.
Alternating-current motors, 60 and 125 cycles.
Brush and Thomson-Houston arc generators—all sizes.
Babcock & Wilcox and water tube boilers.
Transformers, arc lamps, street railway motor equipments.

Six T. H., D62.
One Edison No. 20, 60 K. W.

GENERATORS—110 Volts.

Two 210 K. W., G. E. design, 14 pole, for direct connection, at a speed of 120 R. P. M.
Four 60 K. W. Edison.
Two 46 K. W. Edison.

ALTERNATING GENERATORS.

One 750 K.W., Westinghouse 60-cycle, 2-phase, 2,200 volt generator, belted to one 24 and 48x60 cross-compound condensing Cooper Corliss engine, complete.
Two 100 K. W., G.E. 3 phase, 60 cycle generator, complete.
Two 100 K. W., G. E., 1100 volts monocyclic, complete.
One 60 K. W., Westinghouse, 1100 volts.
One 35 K. W., Westinghouse, 1100 volts, complete.

STREET CAR EQUIPMENT.

One hundred and eighty 25 H. P. motors, new and complete with pinions, gear and gear cases.
One hundred and eighty "K" Controllers.
Twenty-five K-2 Controllers.

ENGINES.

Six 36 and 60x60, Cooper cross-compound non-condensing, new, never shipped from factory.
One 30x54 St. Louis Corliss.
Two 24x60 Lane & Bodley, designed for rolling mill work.
One 28x60 Pennsylvania Iron Works Co.
One 20x48 Wheelock.
One 20x48 Double Wheelock.
One 20x42 Wheelock,
One 14x42 Hamilton Corliss.
Two 21x18 Armington & Sims.
Four 16 and 22x22 Houston, Stanwood & Gamble, cross-compound.
Five 12 and 20x16 tandem compound Ball.
Two 11 and 17x14 cross-compound Ideal.
Two 9 and 16x12 tandem compound Ball.
One 8 and 13x12 tandem compound Ball.
Three 17x18, Skinner, with air cylinders attached.
Two 16x20 Porter-Allen.
Two 15x20 Automatic Russell.
One 15½x15 Armington & Sims high speed simple automatic, 270 R. P. M.
One 15x15 Armington & Sims simple automatic, 270 R. P. M.
One 13½x15 Armington & Sims high speed simple automatic, 300 R. P. M.
One 14x17 Fisher, new.

BOILERS.

Four 66x18 with 66 4-inch tubes. A complete battery at a great bargain.
Three 66 x 14, with 66 4-inch tubes.
Two 72 in. x 18 ft., with 66 4-inch tubes.
Five 60x16 ft. high pressure boilers
Two Sterling Water Tube Boilers, 250 H.P. each.
Two 500 H. P. Hazelton.

FERRIS WHEEL.

One 60 ft. Ferris Wheel, electrically driven.

HYLO
Self-Flashing SIGN LAMPS

fit any Edison socket. They have concealed within the ordinary Edison base a wonderful mechanism which flashes the lamp up and down from 1 to 16 candlepower at irregular intervals. Each lamp is an independent unit, and runs on its own timecard. The effect is startling. "Each lamp has a skedoodle of its own," as Pat Murphy says.

The mechanism is waterproof, foolproof, non-get-atable and non-adjustable, and guaranteed for a year.

TRANSFORMERS

FOR VALUE RECEIVED. We hereby guarantee Transformer No....., Capacity..... Watts.....Volts Primary..... Volts Secondary, against loss by burn-out from any cause, lightning included, for two years, after which we will repair at the cost of Magnet wire per pound. **This Transformer is sent subject to approval after 30 days' trial** from date of shipment. If not returned in 30 days it is considered accepted.

We will extend this guarantee for three years more, or five years in all, on the condition that you give us your entire transformer trade.

There is no condition on our regular two years' guarantee; on the five years' guarantee a bill for all repairs made after the two years will be rendered, but will be cancelled upon a statement from your company that all purchases of transformers by your company since the date of the original invoice have been made from the Kuhlman Electric Co.

☞ Terms of payment..... days from date of invoice. We retain the ownership of the goods until the account or any note given in settlement thereof has been fully paid.

"NEW STANDARD" DRY BATTERIES

Are the Standard of

OUR NAVY AND THE WORLD.

An experience of many years in dry battery manufacture has given this battery the supremacy it holds over all others.

It is the best dry cell ever made.

They are made in all standard and special sizes.

THE "AUTOGAS" DRY BATTERY

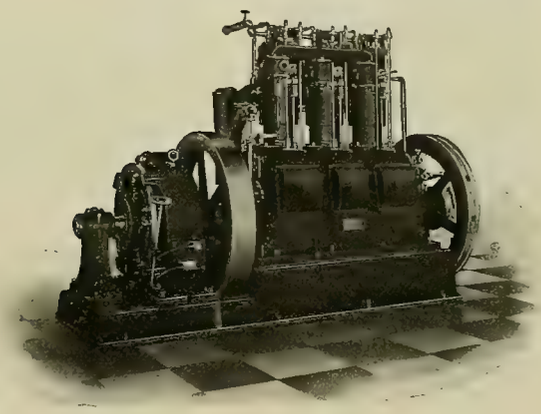
For Portable Service is the Best Made.

For Automobiles, Launches, and all Ignition work where compactness is a requisite.

WM. ROCHE, INVENTOR AND SOLE MANUFACTURER, 42 VESEY STREET, NEW YORK.

ARE YOU LOOKING FOR MONEY

The quicker way to get it, is to install a WALRATH gas or gasoline engine.



The WALRATH is strictly high grade in every respect, and speaks for itself. As a result of its high merit, our factory is crowded with orders.

It is made in one, two and three cylinders, with throttling governor, vertical type. Well adapted to all power purposes, and especially designed for electric lighting service, either municipal or private lines, and will produce as good a commercial light as that of an automatic steam engine.

One of our customers who recently installed an outfit, as shown by this cut, states it costs them only one cent per Kilowatt Hour, whereas city current usually costs from seven to fifteen cents per Kilowatt Hour.

If interested send for catalog "W" and prices.

The Convention Report.

Every electric light man will be interested in the proceedings of the annual meeting of the National Electric Light Association which will be held in Chicago next week. The **Western Electrician** of May 30th will contain the report of this important meeting, which will not only be the **most complete**, but will be **out first**, as well.

Advertisers will, therefore, find this number a particularly desirable one in which to place the merits of their goods before the buyers of the world.

Copy should reach us before May 28th.

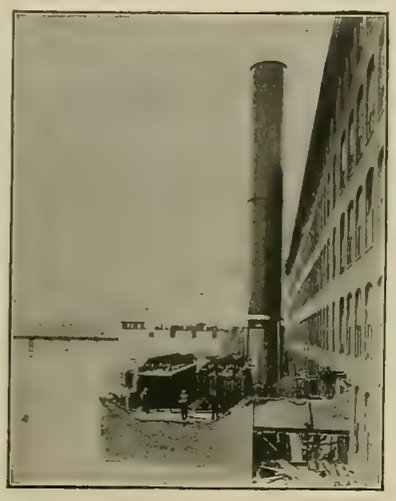
EDWARD GREEN, in 1845, recognizing that hot water going into the boilers would save repairs, and that hot gases escaping through the chimney could be made to heat that water, originated a device that is now known to the world of boiler users as the

GREEN'S ECONOMIZER.



Successful from the start, we find fifty-eight years after, over 350,000 boilers equipped with this Economizer. Takes the water from the hot well at 110°, heats it above the evaporative point, and returns it as feed water to the boilers—all through the waste gases—and saves from 10 to 20 per cent in fuel in every one of the plants so installed. What it may mean in the ELECTRIC LIGHT and ELECTRIC POWER PLANTS may be understood by reading the following

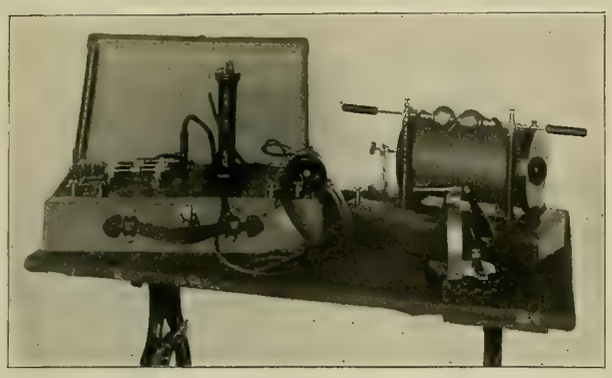
WE MANUFACTURE WIRELESS TELEGRAPH APPARATUS



THIS SET COSTS $50.00 F. O. B. FACTORY. Comprises special Clark high-frequency sending coil, giving heavy quantity spark, Clark multiple microphonic responder, with telephonic receiver for the ear, local primary batteries, necessary retardation coils; in fact, everything to make it complete wireless telegraph station, including sender and responder, except, of course, the aerial overhead wire and the coil battery, which will have to be furnished by the buyer unless he can connect with local lighting service.

LIQUID INTERRUPTER. Should buyer desire a liquid interrupter instead of usual vibrator which is attached to the Clark coil of this outfit, it will cost additional price, which will be quoted on application. With Clark liquid interrupter a quantity of liquid is included; additional supply can be obtained at reasonable cost. As a caution, it should be understood that a coil when furnished *without* the liquid interrupter *should not* be connected direct to the 110 or 500-volt lighting circuit, unless through a suitable resistance coil. The Clark interrupter and sending coil, however, are connected directly to the lighting circuit, say 110 volts, no additional resistance being required, like in the case where a vibrator is used. This is an important and valuable feature.

WE DO NOT BUILD WIRELESS STATIONS

any more than a manufacturer of dynamos contracts to build the central stations. WE ONLY SELL YOU THE APPARATUS AT SO MUCH PER SET; but we furnish you with full information, which will enable you to set up this apparatus, and to build your overhead aerial wire, connect with the ground, etc.

Office, Factory and Laboratory :: :: 67-69-71 Michigan Avenue, DETROIT, MICHIGAN, U. S. A.

Important Telephone Books.

THE TELEPHONE HANDBOOK. By Herbert Laws Webb. 16mo, 150 pp. Price $1.00.
This handbook is a complete treatise on telephony, and a practical book on telephone working and management, based entirely on standard American practice. It is extremely useful to telephone inspectors and operators.

PATENTED TELEPHONY. A Review of the Patents Pertaining to Telephones and Telephonic Apparatus. Published by the American Electrical Engineering Association. Cloth bound; fully illustrated. Price $1.50.

THE ELECTRIC TELEPHONE. By E. J. Houston, Ph. D., and A. E. Kennelly, Sc. D.; 12mo, cloth, 422 pp., 142 illustrations. Price $1.00.
This book describes the construction of the various forms of transmitting and receiving devices, the signaling mechanisms, and the switchboard apparatus at the central station. It is written by two well-known electricians, and has the merit of being the latest work on the subject.

THE PRACTICAL TELEPHONE HANDBOOK. By Joseph Poole, A. I. E. E. Second edition, revised and enlarged. 360 pp. 283 illustrations. Price $1.50.
In this work the writer has endeavored to produce a manual of moderate size and cost, but thoroughly practical, and detailing, as far as space will allow, the most recent methods of telephone working. While the requirements of telephone employes have been kept constantly in view, it is fully intended also that the book shall be of service as a source of information on telephonic matters to users of the telephone and to the public generally.

TELEPHONE TROUBLES AND HOW TO FIND THEM. A complete handbook for telephone inspectors. By W. Hyde and J. H. McManman, edited by Prof. C. H. Haskins. Sixth edition. 16mo, 50 pp. Price 25 cents.
This little volume is an extremely practical work for telephone employes, written in a popular style and devoid of technicalities.

TELEPHONE LINES AND THEIR PROPERTIES. By Wm. J. Hopkins. Second edition. 272 pp. Illustrated. Price $1.50.

A MANUAL OF TELEPHONY. A new and large edition. By W. H. Preece, F. R. S., and A. J. Stubbs. 508 pages. 333 illustrations. Price $4.50.

HOW TO MAKE AND USE THE TELEPHONE. By Geo. H. Cary. The purpose for which this book is written is to furnish information to those who may desire to construct or use telephone apparatus or lines on a small scale. Price $1.00.

TELEPHONES, THEIR CONSTRUCTION AND FITTING. A Practical Manual on the Fitting Up and Maintenance of Telephone and Auxiliary Apparatus. By F. C. Allsop. 191 pp., 168 illustrations. Price $2.00.

TELEPHONE SYSTEMS ON THE CONTINENT OF EUROPE. By Bennett. 436 pages. 169 illustrations. Price $4.50.

TELEPHONING OF GREAT CITIES. By Bennett. Paper. Price 35 cents.

MAGNETO HAND TELEPHONE. Its Construction, Fitting Up and Adaptability to Everyday Use. By Hughes. 80 pages. 23 illustrations. Price $1.00.

BELL'S ELECTRIC SPEAKING TELEPHONE. Its Invention, Construction, Application, Modification and History. By Prescott. New edition, revised and enlarged 795 pages. 516 illustrations. Price $4.00.

PHILIPP REIS, INVENTOR OF THE TELEPHONE. A Biographical Sketch with Documentary Testimony. By Thompson. Translation of the original papers of the inventor and contemporary publications. 182 pages. 2 plates and 48 engravings. Price $3.00.

ELECTRICAL TRANSMISSION OF INTELLIGENCE AND OTHER ADVANCED PRIMERS OF ELECTRICITY, treating on the telegraph, telephone, etc. By E. J. Houston. 330 pages. 88 illustrations. Price $1.00.

The Above, or Any Other Electrical Works Published, Sent on Receipt of Price.

New Dynamo Tenders' Hand-Book.
By F. B. BADT.
226 Pages, 140 Illustrations. Flexible Cloth Binding. Size of Type Page 5 1-2x3 inches. Price $1.00.

This is, as the name indicates, a NEW BOOK, much more complete than the old one, with all the information, instructions and rules which are required by practical men, as Dynamo Tenders, Linemen, Stationary Engineers and owners and operators of all kinds of Electric Plants. It is the only book of the kind published in the English language. 9,000 copies of the old Dynamo Tenders' Hand-Book sold, and over 10,000 of the new.

ELECTRICITY FOR ENGINEERS.

Latest Edition, Now Published in One Complete Volume, 424 Pages, Profusely Illustrated. Just the Work for Engineers, Electricians, Dynamo Tenders, etc.

PART I. CONTENTS.—CHAPTER I: Electricity; Positive and Negative; Conductors, Non-Conductors and Insulators; Electro-Motive Force; Volts; Resistance; Ohms; Current; Amperes.—CHAPTER II: Dynamos; Magnets; Field Coils; Electro Magnets; Permanent Magnets.—CHAPTER III: Armatures, Construction of, Different Kinds of; Commutators, How Made and Connected; Heating of Armatures; Eddy Currents.—CHAPTER IV: The Current; How Produced; Induction; Series Wound Dynamos; Shunt Wound Dynamos; Exciting the Fields; Constant Current and Constant Potential Dynamos; Series and Parallel; Parallel or Multiple Arc System.—CHAPTER V: Incandescent Lamps; Filaments; Connections; Flashing; Exhausting; Testing; Candle Power; Operated in Series; Automatic Cut-Out; In Multiple Arc or Parallel; Multiple Series; Multiple Series Cut-Out; Three Wire System.—CHAPTER VI: The Arc Light; How Formed; Causes of Unsteadiness; Remedy; Effect of Shades or Globes; Shape of Carbons Under Different Conditions of Burning; Arc Lamps; Regulating and Cut-Out Mechanism; Action of Current; Clutch Lamps; Clockwork Lamps; Double Lamps; Troubles in Lamps.—CHAPTER VII: Commutators and Brushes; The Brush Commutators; Brushes; Different Styles of Brushes; Double Brushes; Single Brushes; Troubles with Commutators and Brushes; Correct Position of Brushes; Sparking at Brushes; Care of Brushes and Commutators; Flashing.—CHAPTER VIII: Current Regulation; Hand Regulation; By Position of Brushes; Resistance Box; Resistance Coils.—CHAPTER IX: American System of Automatic Current Regulation; The Dynamo; Regulator; Action of Regulator.—CHAPTER X: Brush System of Automatic Current Regulation; Brush Armature; Diagram of Circuits through Dynamo, Regulator and Lamps; Dial or Regulator; Care and Adjustment of Dial; Dial Controller; Circuits and Connections of No. 8 Brush Dynamo; Circuits of Compound Wound Constant Potential Brush Dynamo.—CHAPTER XI: The Edison System; Automatic Regulator; Circuits of Regulator: Circuits of Dynamo; Action of Regulator; Howell Pressure Indicator; Diagram of Circuits; Description of Parts and Operation.—CHAPTER XII: Excelsior System of Automatic Current Regulation; Dynamo; Armature; Diagram of Circuits; The Regulator and Motor; Action of Regulator.—CHAPTER XIII: Schuyler System of Automatic Current Regulation; Dynamo; Armature, Commutator and Brushes; Diagram of Circuits in Armature and Field; Regulator; Circuits in Regulator.—CHAPTER XIV: Thomson-Houston System of Automatic Current Regulation; Dynamo; Armature; Commutator and Brushes; Controlling Magnet; Wall Controller; Diagram of Circuits; Air Blast.—CHAPTER XV: Waterhouse System of Three-Brush Automatic Current Regulation; Dynamo; Extra Brush; Resistance Coils and Regulator. CHAPTER XVI: Ampere Meters; Tangential Scale; Solenoid Meters.—CHAPTER XVII: Voltmeters; Pressure and Potential Indicators.—CHAPTER XVIII: Testing; Galvanometers; Astatic Needle; Differential Apparatus.—CHAPTER XIX: Wheatstone Bridge or Electrical Balance; Diagram of Circuits and Methods of use; Bridge and Rheostat; Round Form; Square Form.—CHAPTER XX: The Magneto as a Testing Instrument; Armature; Field; Bell; Diagram of Circuits.—CHAPTER XXI: Coupling Dynamos Together; In Series; In Shunt; Series, Shunt and Compound Wound Machines.—CHAPTER XXII: Switches and Switchboards; Loop Switch; Plug and Socket; Change Over Plug and Socket; Conclusion. CHAPTER XXXIII: Electric Motors; General Principles the Same as in Dynamos; Types; Shunt and Series Motors Suitable for all General Purposes; Regulation of Shunt Motors; Of Series Motors; Counter E. M. F.; Direction of Rotation and Direction of Current; Starting Motors; Diagram of Connection.

PART II. CONTENTS.—CHAPTER I: Alternate Current Dynamos; Principles of the Field; Field Current Armature; Winding; Connections; Lamination; Different Types of Alternators; Regulation; Leading Systems; The Brush Generators; Magnets; Armature; Principles of Induction.—CHAPTER II: Dynamos, Continued; The Mordey Alternator; Stationary Armatures; Field Magnets; Ferranti Armature; Field Magnets; Winding; Collectors.—CHAPTER III: Dynamos Concluded; Siemens Dynamo; Best Magnetic Circuits; Stanley Constant Current Dynamo; The Armature; Self Induction; Regulation.—CHAPTER IV: Induction Coils; Converters; Transformers; Economy of Distribution; An Electrical H. P.; Losses in Conductor; Induction Coils; Effect of Induction; Transformers.—CHAPTER V: Transformers Continued; Induction Coils; Converters; Transforming Up and Down; Design of Transformers; The Static Charge; Protection Against; Grounding the Secondary; Other Devices; The Foil Protector; Different Types of Transformers.—CHAPTER VI: Transformers, Concluded; Fuses; Regulation; Winding of Transformers; Connecting to Circuit; Regulation; Safety Fuses.—CHAPTER VII: Parallel System; Series Arc Light System; Diagram of Circuits; Parallel System; Primary Circuit; Secondary Circuit; Placing of Transformers; Fuses; Diagram of Series Arc Light Circuit.—CHAPTER VIII: Lines of Force; Hysteresis; Magnetic Penetration; The Circuit of Lines of Force; Experiments with Magnet; Rapidity of Reversals and Hysteresis.—CHAPTER IX: Arc Lamps; In Series; The Westinghouse Arc Lamp; Diagram of Circuits in Lamp; Action of the Mechanism; Flat Carbons.—CHAPTER X: Arc Lamps, in Multiple; Slattery Differential Lamp; Mechanism of Lamp; Its Operation.—CHAPTER XI: Measuring and Indicating Apparatus; Instruments for Use with Alternating Currents Differ from those used with Continuous Currents; Ammeters; Voltmeters; Description of Several Forms of Instruments.—CHAPTER XII: Measuring Instruments, Continued; Hot Wire Instruments; The Cardew Voltmeter; Details of the Instrument; Low Potential Voltmeter.—CHAPTER XIII: Voltmeters; Double Coil Voltmeter; Two Types.—CHAPTER XIV: Spring Meters; Curled Spring Meter.—CHAPTER XV: Twisted Strip Instruments; Diagram of Connections and Operation of Instrument.—CHAPTER XVI: Recording Meters; Stanley Meter; Construction and Principles of Operation; Diagrams of Parts; Slattery Induction Meter; Description of Parts and Principles of Operation; Watt Meter; Thomson Meter.—CHAPTER XVII: Generators in Parallel, Difficulties in Operating; Alternate Current Generators in Parallel; Arrangements of Circuits and Machines for Operating in Parallel; Diagram of Common Arrangement of Machines and Circuits.—CHAPTER XVIII: Ohm's Law; Strength of Current; Formulas and Examples; Power and Heating Effects of Currents.—CHAPTER XIX: Ground Alarms and Leak Detectors.

PRICE, $2.50.

Orders for above book, or any electrical work published promptly sent on receipt of price, postage prepaid.

Nernst Lamps

The latest development in Electric Lighting

The largest modern buildings are being equipped with Nernst Lamps.

P. R. R. Union Station, Pittsburgh, Pa.
Equipped with Nernst Lamps.

The Farmers Bank Building, Pittsburgh, Pa.
Equipped with Nernst Lamps.

Only the very best materials entered into the construction and equipment of The Farmers Bank Building, Pittsburgh, Pa., the third tallest office building in the world. A careful investigation as to the best methods of lighting such a structure resulted in the following order:

2,250 Single-Glower Nernst Lamps
20 Two-Glower Nernst Lamps
20 Six-Glower Nernst Lamps

Only Nernst Lamps will be used in the building

Electrical Supply Dealers

will forward Booklet No. 6 upon application

or write nearest Sales Office of Nernst Lamp Co.

Pittsburgh: Fayette St. and Garrison Place; New York: Equitable Bldg.; Boston: Board of Trade Bldg.; Philadelphia: Real Estate Trust Bldg.; Chicago: National Life Bldg.

Announcement

The Westinghouse Air-Brake Co.

call attention to the fact that only one-seventh of the electric power used by any other system is needed for operating their new system of Electric Train Control.

The weight of this new Westinghouse apparatus, for a car equipped with two 200 H. P. motors, is nearly **one ton less** than any other system.

The extreme simplicity and reliability of this new Multiple Unit Control attract the immediate attention of the men who pay for apparatus for driving electric trains, of the men who install it, and the men who operate it.

The Westinghouse Automatic Coupler couples, in one instantaneous operation, the drawheads of the cars, the air-brake hose, the lighting and heating connections, and the connections of the Multiple Unit Control.

Railway men are invited to inspect these new Westinghouse inventions at the Works at Pittsburg.

ELECTROLYSIS-PROOF

UNDERGROUND CONDUIT

OUR CONDUIT IS { *Absolutely— Electrolysis-Proof, Non-Abrasive, Moisture-Proof, Non-Corrosive, Perfect Insulator.* }

Insulation Test, **66,000 VOLTS.**

A perfect joint which is self-aligning, making the conduit line a solid tube from manhole to manhole.

Construction simple, rapid and inexpensive, requires no skilled labor.

Cables drawn more easily and a longer distance than in any other.

Resistance strength when underground as great as any.

Life of Conduit everlasting. Asphalt never deteriorates.

35 FT. CABIN LAUNCH, 1,500.00

Send 10 cents for 80-page illustrated catalogue giving the truth in detail about the best boats built.

Expert design

and skilled workmanship with only the best materials make Type A "Wood" Transformers

as good as the best

and far better than the average.

All iron is aged and tested and all coils are treated by the

vacuum drying and substitution process.

Aging of iron and deterioration of insulation in service is reduced to the lowest limit. The result is a transformer that can be depended upon any time and every time.

Ask for Pamphlet No. 5002. It describes the vacuum drying and substitution process of treating coils.

The Simplest, Most Practical and Economical Turn-down Electric Lamp ever Invented.

The ECONOMICAL

Style 1—Pull string for bright or dim. Style 2—For variation in light turn bulb one way or the other. Write for booklet and prices. All voltages and bases.

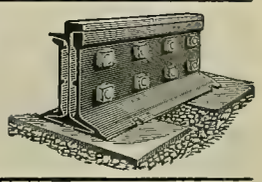
ECONOMICAL ELECTRIC LAMP CO., 123 Liberty St., New York.

CONTINUOUS RAIL JOINT CO. OF AM.

GENERAL OFFICES: CENTURY BUILDING.

NEWARK, N. J.

Over FIFTEEN THOUSAND (15,000) miles in use. Received the highest award in its class at Paris Exposition, 1900 and Pan-American, Buffalo, 1901.



H. N. FENNER, President — J. F. BLAUVELT, Agent — RUSSELL W. KNIGHT, Treasurer

NEW ENGLAND BUTT COMPANY

MANUFACTURERS OF

Machinery for Insulating Electrical Wires

Braiding, Taping, Winding, Twinning, Cabling, Stranding, Polishing and Measuring Machines. Cable Covering Braiders

FINE CASTINGS A SPECIALTY

304 PEARL STREET, - - - PROVIDENCE, R. I., U. S. A.

We always carry a large stock of

WEATHERPROOF WIRE

for prompt shipments. Samples and prices on application.

AMERICAN INSULATED WIRE & CABLE CO.

Main Office and Factory: 241-247 S. Jefferson St., CHICAGO, ILL.

CARBONS

CONSUMERS CARBON CO.

LANCASTER, OHIO, U. S. A.

Carbons of all kinds and for all purposes.

An INCANDESCENT LAMP represents a large investment of capital, ingenuity and skilled workmanship, It is sold at a price so low as to necessitate eternal vigilance in cutting costs to a minimum. A successful lamp manufacturer can not afford to experiment with poor materials. This explains the popularity of

BAKER & CO.'S PLATINUM

408 N. J. R. R. Ave., NEWARK, N. J. 120 LIBERTY ST., NEW YORK.

TYPE C INDICATING FUSE BEFORE BLOWING

TYPE C INDICATING FUSE AFTER BLOWING

D. & W. FUSES

HAVE INDICATING BULL'S EYE.

This indicator far surpasses any upon the market, as there is no wire upon the outside to cause a flash in blowing or to become broken in handling. Before blowing, the circle upon the label is clear, as you see in the accompanying cut, but when the fuse blows, the center of the circle becomes black.

SOME REASONS WHY

NERNST LAMPS are becoming so popular.

1st They contain no cog wheels, chains, sliding rods nor clock work of any kind.

2nd They can be used on any alternating current circuit

3rd The efficiency is from 1.32 to 1.76 watts per candle-power.

4th They require a minimum amount of attention, and are positive in operation.

5th The cost of maintenance is low.

6th They require no carbons whatever.

7th They are substantially constructed of only the very best material.

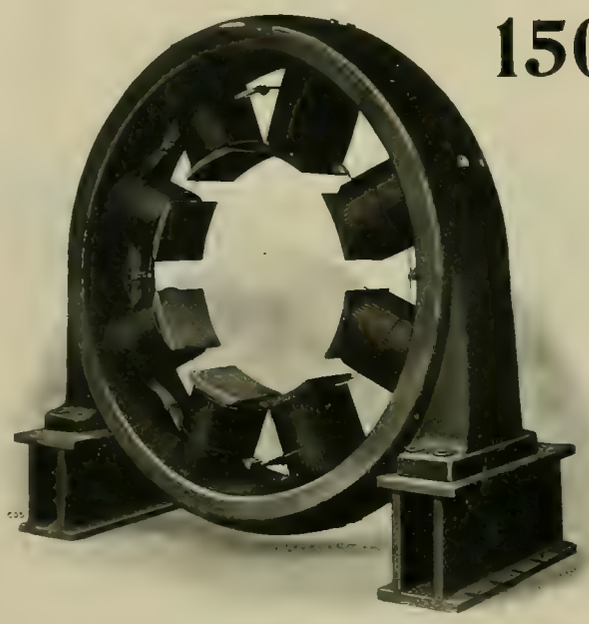
Direct and Alternating Current

Generators

Built in Capacities up to

1500 K. W.



Frame for 200 K. W. Generator.
Engine Type.

Frame and Poles.

The magnet yokes are made of cast iron and divided horizontally.

The poles are of cast steel with laminated steel pole shoes, thereby eliminating losses due to eddy currents.

Poles and field coils can be removed without disturbing the armature.

Armatures.

Laminated discs, separately insulated, are built up on a cast iron spider which is keyed to the shaft.

Both radial and axial ventilating ducts are provided in the core.

Our method of constructing large armatures insures perfect ventilation.

Armature for Engine Type Generator.

The Chip on his Shoulder

Independent—
And we are.

WE INTEND TO SUCCEED BY DESERVING SUCCESS

JUDGING from the support that has been given us, consumers are tired of the rash claims of some makers, and appreciate not only our independent position, but our conservative claims, which we can carry out to the letter.

Remember that we can furnish you everything in incandescent lamps, we ship no sample, picked lamps. If our lamps do not suit you, send them back—if they do, they are the kind you can always depend on getting from us.

Our 220-volt lamps in 10, 16 or 32 c. p. will please you as well as our regular line. We know, and we want the chance of proving to you, that we are the people you have been looking for. Just give us the chance. Address,

HYLO
Self-Flashing SIGN LAMPS

fit any Edison socket. They have concealed within the ordinary Edison base a wonderful mechanism which flashes the lamp up and down from 1 to 16 candlepower at irregular intervals. Each lamp is an independent unit, and runs on its own timecard. The effect is startling. "Each lamp has a skedoodle of its own," as Pat Murphy says.

The mechanism is waterproof, foolproof, non-get-atable and non-adjustable, and guaranteed for a year.

Dynamos and Motors.

We invite correspondence with those wishing to buy or sell.

SCHUREMAN & HAYDEN,
140 S. Clinton St., Chicago.

NOTICE.

COMPTROLLER'S OFFICE.
CITY OF NEW ORLEANS.

NEW ORLEANS, May 18th, 1903.

Pursuant to Ordinance No. 1717 N. C. S. Sealed proposals will be received at this office until the hour of 2:30 p. m., Monday, June 8th, 1903, for the construction of an electric lighting and power system for the City of New Orleans in accordance with plans and specifications on file in the office of the City Engineer. Deposit $10,000 with the City Treasurer, and his receipt enclosed with bid. Bond $100,000. Hon. W. J. Hardee, City Engineer, will furnish bidders with a blank form of proposal; no proposal will be considered unless submitted on such form. The City reserves the right to reject any and all bids.

V. TUJAGUE,
Comptroller.

ELECTRICAL BOOKS.

All Kinds.

ELECTRICIAN PUBLISHING COMPANY,
Suite 510 Marquette Bldg., CHICAGO

"All roads lead to Rome."

And all business in New York seems to tend toward

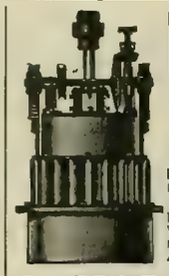
Grand Central Station.

This great building, which covers the space of four city blocks, beginning at the corner of 4th Avenue and 42d Street, is the Metropolitan terminus of the

NEW YORK CENTRAL LINES

and is the center of the hotel, residence, club and theater district of the second city of the world. To reach it see that your ticket reads by the NEW YORK CENTRAL.

A copy of the 40-page illustrated catalogue of the "Four Track Series," New York Central's books of travel and education, will be sent free, post-paid, to any address on receipt of a postage stamp, by George H. Daniels, General Passenger Agent, New York Central & Hudson River Railroad, Grand Central Station, New York.



M'CORMICK TURBINE.

On Vertical or Horizontal Shaft.
Especially Adapted for Electrical Work.

Gives a higher percentage of useful effect than any other water-wheel heretofore made. All sizes, right and left hand, are built from patterns perfected under systematic tests in the Holyoke Testing Flume.

Parties having power plants which are unsatisfactory, and those contemplating the improvement of powers, will find it to their interest to confer with us, **as we are willing to guarantee results where others have failed, no matter what make of turbine has been in use. STATE REQUIREMENTS AND SEND FOR CATALOGUE.**

APPARATUS

For Central Station and Power House Equipment

A three hundred kilowatt alternating unit, consisting of one 300 K. W. Stanley, two-phase, 60-cycle, 2,400-volt alternator, directly connected to a 16-32x24 McIntosh, Seymour & Co. vertical cross-compound engine.

ALTERNATORS.

One 250 K. W. General Electric, 2,400 volts, 50 cycles, three-phase.
One 200 K. W. General Electric, 2,300 volts, 40 cycles, three-phase.
One 180 K. W. General Electric, 2,300 volts, 60 cycles, single-phase.
One 180 K. W. Westinghouse 2,200 volts, 60 cycles two-phase.
One 150 K. W. Westinghouse, 2,300 volts, 60 cycles, single-phase.
One 150 K. W. Stanley, 1,100-2,200 volts, 133 cycles, two-phase.
Two 120 K. W. General Electric, 1,040 volts, 125 cycles, single-phase.
One 120 K. W. General Electric, 2,080 volts, 125 cycles, single-phase.
One 90 K. W. General Electric, 2,300 volts, 60 cycles, single-phase.
One 75 K. W. Stanley, 1,200-2,400 volts, 133 cycles, two-phase.
One 60 K. W. Westinghouse, 2,200 volts, 60 cycles, two-phase.
One 60 K. W. Westinghouse, 2,200 volts, 60 cycles, single-phase.
One 45 K. W. Westinghouse, 2,200 volts, 60 cycles, single-phase.
Three 35 K. W. Thomson-Houston, 1,100 volts, 125 cycles, single-phase.

RAILWAY GENERATORS 500-550 VOLTS.

Two 500 K. W. General Electric, 6-pole, speed, 300 R. P. M.
Two 300 K. W. General Electric, 4-pole, speed, 400 R. P. M.

Two 200 K. W. General Electric, 4-pole, speed, 425 R. P. M.
Two 180 K. W. Westinghouse, 4-pole, speed, 535 R. P. M.
One 110 K. W. Eddy, 4-pole speed, 600 R. P. M.
Two 100 K. W. General Electric, 4-pole, speed, 650 R. P. M.
One 100 K. W. Walker, 4-pole, speed, 750 R. P. M.
Two 100 K. W. Edison, bi-polar, speed, 620 R. P. M.
One 90 K. W. Thomson-Houston, 4-pole, speed, 700 R. P. M.
One 80 K. W. General Electric, 4-pole, speed, 700 R. P. M.
Two 80 K. W. Detroit, bi-polar, speed, 620 R. P. M.
Five 62 K. W. Thomson-Houston, type D, speed, 900 R. P. M.
One 50 K. W. Brush, type Q, speed, 1,050 R. P. M.

DIRECT CONNECTED UNITS.

One 200 K. W. Westinghouse, 8-pole, 500-550-volt generator, with 18-30x16 Westinghouse compound engine.
One 130 K. W. General Electric, 8-pole, 125-volt generator, with 12-20x16 Erie Ball tandem compound engine.
One 60 K. W. Eddy, 4-pole, 125-volt generator, with 13x12 Buffalo Forge engine. Brand new.
One 50 K. W. Commercial, 6-pole, 125-volt generator, with 8½-13x12 Armington & Sims tandem compound engine.
One 50 K. W. Eddy, 4-pole, 125-volt generator, with 13x12 Harrisburg Ideal engine.
One 50 K. W. unit, consisting of two 25 K. W. General Electric, 4-pole, 125-volt generators, with one triple expansion vertical engine.
One 30 K. W. Eddy, 4-pole, 125-volt generator, with 10x12 Watertown engine.
One 25 K. W. General Electric, 6-pole, 125-volt generator, with 9½x10 Armington & Sims engine.
Two 25 K. W. Westinghouse 6-pole, 250-volt generators, each with 9x10 Ball and Wood engine.

ENGINES.

One 26x48 Harris Corliss, 500 H. P.
One 18-34x48 Cooper Corliss, cross compound, 500 H. P.
One 23x48 Harris Corliss, 400 H. P.

Two 210 K. W., G. E. design, 14 pole, for direct connection, at a speed of 120 R. P. M.
Four 60 K. W. Edison.
Two 46 K. W. Edison.

ALTERNATING GENERATORS.

One 750 K.W., Westinghouse 60-cycle, 2-phase, 2,200 volt generator, belted to one 24 and 48x60 cross-compound condensing Cooper Corliss engine, complete.
Two 100 K. W., G.E. 3 phase, 60 cycle generator, complete.
Two 100 K. W., G. E., 1100 volts monocyclic, complete.
One 60 K. W., Westinghouse, 1100 volts.
One 35 K. W., Westinghouse, 1100 volts, complete.

STREET CAR EQUIPMENT.

One hundred and eighty 25 H. P. motors, new and complete with pinions, gear and gear cases.
One hundred and eighty "K" Controllers.
Twenty-five K-2 Controllers.

ENGINES.

Six 36 and 60x60, Cooper cross-compound non-condensing, new, never shipped from factory.
One 30x54 St. Louis Corliss.
Two 24x60 Lane & Bodley, designed for rolling mill work.
One 28x60 Pennsylvania Iron Works Co.
One 20x48 Wheelock.
One 20x48 Double Wheelock.
One 20x42 Wheelock.
One 14x42 Hamilton Corliss.
Two 21x18 Armington & Sims.
Four 16 and 22x22 Houston, Stanwood & Gamble, cross-compound.
Five 12 and 20x16 tandem compound Ball.
Two 11 and 17x14 cross-compound Ideal.
Two 9 and 16x12 tandem compound Ball.
One 8 and 13x12 tandem compound Ball.
Three 17x18, Skinner, with air cylinders attached.
Two 16x20 Porter-Allen.
Two 15x20 Automatic Russell.
One 15½x15 Armington & Sims high speed simple automatic, 270 R. P. M.
One 15x15 Armington & Sims simple automatic, 270 R. P. M.
One 13½x15 Armington & Sims high speed simple automatic, 300 R. P. M.
One 14x17 Fisher, new.

BOILERS.

Four 66x18 with 66 4-inch tubes. A complete battery at a great bargain.
Three 66 x 14, with 66 4-inch tubes.
Two 72 in. x 18 ft., with 66 4-inch tubes.
Five 60x16 ft. high pressure boilers
Two Sterling Water Tube Boilers, 250 H.P. each.
Two 500 H. P. Hazelton.

FERRIS WHEEL.

One 60 ft. Ferris Wheel, electrically driven.

AT A BARGAIN — A complete Edison 3-wire plant of 300 K. W. capacity.

It will be profitable to wire or write us giving requirements of machinery wanted or for sale.

510 Marquette Building, CHICAGO.

A LONG-FELT WANT.

THE HANDY ELECTRICAL DICTIONARY

BY W. L. WEBER, M. E.

225 PAGES, SIZE 2½ x 6 INCHES.

Price: { **Cloth Binding, - - - - 25c.**
Flexible Leather Binding, 50c.

This is a practical book in a convenient vest pocket size; alike suitable for workman, student or anyone employed or interested in the electrical science. It contains clear, concise definitions of every used electrical term or phrase and is sold at a price within the reach of all.

Promptly Mailed on Receipt of Price.

ELECTRICIAN PUBLISHING CO., 510 Marquette Bldg., Chicago.

"The Recognized Authority on Wiring and Construction."

The universally adopted National Electrical Code explained and illustrated in this year's edition of the hand-book.

STANDARD WIRING

For Electric Light and Power.

By H. C. CUSHING, Jr., A. I. E. E., Electrical Engineer and Inspector.

ADOPTED

By the Fire Underwriters of the United States.
By Cornell University, Stanford University and other Technical Colleges and Schools.
By over 27,000 Electrical Engineers, Central Station Managers and Wiremen.

BECAUSE

It is the only book on Wiring and Construction kept strictly up to date.
It contains all the necessary Tables, Rules, Formulas and Illustrations.
It settles disputes, and if referred to before wiring will prevent disputes.

Flexible Leather Cover (pocket size), $1.00.

Sent post paid upon receipt of price, by

GET **ALLEN** LUSTRE GIVING COMMUTATOR COMPOUND

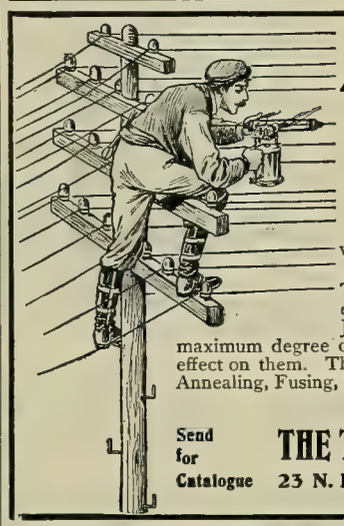
SAVE YOUR COMMUTATOR.

"My overloaded motor commutator is in excellent condition, thanks to the ALLEN Stick Lubricant. Commutator and brushes are nicely polished with that deep brown lustre." No. 931.

Big sample stick free.

Price: Small stick, 35c. each, $3.75 doz.; Large stick, 50c, each, $5.50 doz.

L. B. ALLEN CO., INC., Sole Manufacturers, See page 1.
1334 Columbia Avenue, Chicago.



High In the Air
Amid Storm and Wind

THE TURNER DOUBLE JET GASOLINE TORCHES

will make a lineman's work much easier.

These torches are superior to all others for electricians' and lineman's work. The Double Jet construction of the burner generates the maximum degree of mechanical heat, and the wind has little effect on them. They are unequaled for Brazing, Tempering, Annealing, Fusing, Soldering, or any work requiring heat.

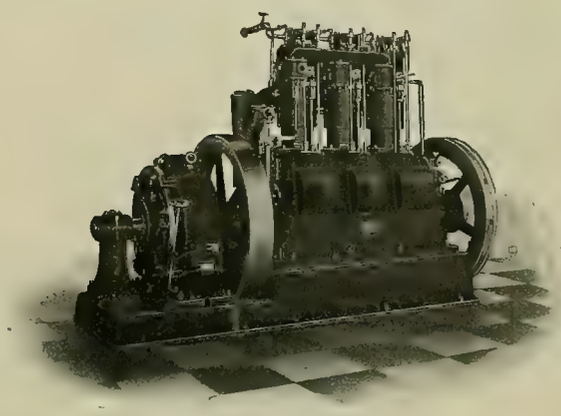
ELECTRICIAN PUBLISHING CO.

SUITE 510 MARQUETTE BUILDING, CHICAGO.

ARE YOU LOOKING FOR MONEY

The quicker way to get it, is to install a WALRATH gas or gasoline engine.



The WALRATH is strictly high grade in every respect, and speaks for itself. As a result of its high merit, our factory is crowded with orders.

It is made in one, two and three cylinders, with throttling governor, vertical type. Well adapted to all power purposes, and especially designed for electric lighting service, either municipal or private lines, and will produce as good a commercial light as that of an automatic steam engine.

One of our customers who recently installed an outfit, as shown by this cut, states it costs them only one cent per Kilowatt Hour, whereas city current usually costs from seven to fifteen cents per Kilowatt Hour.

If interested send for catalog "W" and prices.

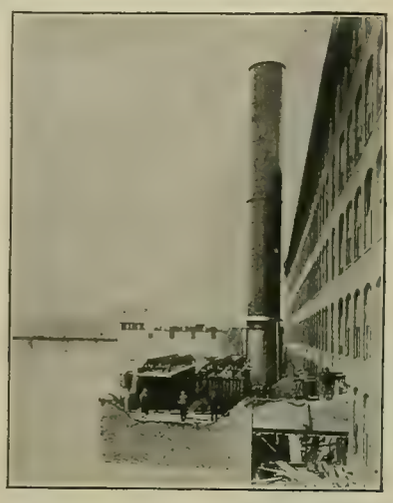
EDWARD GREEN, in 1845, recognizing that hot water going into the boilers would save repairs, and that hot gases escaping through the chimney could be made to heat that water, originated a device that is now known to the world of boiler users as the

GREEN'S ECONOMIZER.



Successful from the start, we find fifty-eight years after, over 350,000 boilers equipped with this Economizer. Takes the water from the hot well at 110°, heats it above the evaporative point, and returns it as feed water to the boilers—all through the waste gases—and saves from 10 to 20 per cent in fuel in every one of the plants so installed. What it may mean in the ELECTRIC LIGHT and ELECTRIC POWER PLANTS may be understood by reading the following

A Square Inch of Scale Prevented is Worth More Than a Square Foot Removed.

INTERNATIONAL BOILER COMPOUND
In Liquid Powder or Brick Forms

Attacks the mineral contained in the water, destroys the hardening qualities and prevents them from forming into scale. It removes rust, prevents corrosions and pitting, and preserves the iron. It is free from acids or anything that can destroy the iron.
It is death to scale and scale formers. It is a pure compound, and is worth much in reduction of fuel cost. It is sent on trial and approval.
May we send our treatise?

PRICE, $1.00. Sent anywhere prepaid on receipt of price.

ELECTRICIAN PUBLISHING COMPANY,
510 Marquette Bldg., Chicago.

SUBSCRIPTIONS.

With January 1st began the thirty-second volume of the WESTERN ELECTRICIAN, and during 1903 it will complete its sixteenth and the first half of its seventeenth year, the paper having been founded July 2, 1887, and continued under the present management for this entire period. We offer the past as a guaranty of the future, and in addition pledge the best efforts of an experienced and competent staff to the constant improvement of the paper.

The WESTERN ELECTRICIAN is published for the purpose of assisting everyone interested in the art. It is a general electrical and scientific paper, and gives to its readers all the latest news and keeps them thoroughly informed of everything that is going on in all the different departments of the electrical and allied fields. Its technical and scientific articles cover all the latest inventions and improvements and keep the reader thoroughly informed of all that is new in the art. Its special articles, written by the most prominent authorities, as well as its general articles, are of the highest order, and no interested person can afford to be without the paper.

SUBSCRIPTION PRICE PER YEAR OF FIFTY-TWO NUMBERS

In the United States $3.00
In Foreign Countries 5.00

ELECTRICITY FOR ENGINEERS.

Latest Edition, Now Published in One Complete Volume, 424 Pages, Profusely Illustrated. Just the Work for Engineers, Electricians, Dynamo Tenders, etc.

PART I. CONTENTS.—CHAPTER I: Electricity; Positive and Negative; Conductors, Non-Conductors and Insulators; Electro-Motive Force; Volts; Resistance; Ohms; Current; Amperes.—CHAPTER II: Dynamos; Magnets; Field Coils; Electro Magnets; Permanent Magnets.—CHAPTER III: Armatures, Construction of, Different Kinds of; Commutators, How Made and Connected; Heating of Armatures; Eddy Currents.—CHAPTER IV: The Current; How Produced; Induction; Series Wound Dynamos; Shunt Wound Dynamos; Exciting the Fields; Constant Current and Constant Potential Dynamos; Series and Parallel; Parallel or Multiple Arc System.—CHAPTER V: Incandescent Lamps; Filaments; Connections; Flashing; Exhausting; Testing; Candle Power; Operated in Series; Automatic Cut-Out; In Multiple Arc or Parallel; Multiple Series; Multiple Series Cut-Out; Three Wire System.—CHAPTER VI: The Arc Light; How Formed; Causes of Unsteadiness; Remedy; Effect of Shades or Globes; Shape of Carbons Under Different Conditions of Burning; Arc Lamps; Regulating and Cut-Out Mechanism; Action of Current; Clutch Lamps; Clockwork Lamps; Double Lamps; Troubles in Lamps.—CHAPTER VII: Commutators and Brushes; The Brush Commutators; Brushes; Different Styles of Brushes; Double Brushes; Single Brushes; Troubles with Commutators and Brushes; Correct Position of Brushes; Sparking at Brushes; Care of Brushes and Commutators; Flashing.—CHAPTER VIII: Current Regulation; Hand Regulation; By Position of Brushes; Resistance Box; Resistance Coils.—CHAPTER IX: American System of Automatic Current Regulation; The Dynamo; Regulator; Action of Regulator.—CHAPTER X: Brush System of Automatic Current Regulation; Brush Armature; Diagram of Circuits through Dynamo, Regulator and Lamps; Dial or Regulator; Care and Adjustment of Dial; Dial Controller; Circuits and Connections of No. 8 Brush Dynamo; Circuits of Compound Wound Constant Potential Brush Dynamo.—CHAPTER XI: The Edison System; Automatic Regulator; Circuits of Regulator: Circuits of Dynamo; Action of Regulator; Howell Pressure Indicator; Diagram of Circuits; Description of Parts and Operation.—CHAPTER XII: Excelsior System of Automatic Current Regulation; Dynamo; Armature; Diagram of Circuits; The Regulator and Motor; Action of Regulator.—CHAPTER XIII: Schuyler System of Automatic Current Regulation; Dynamo; Armature, Commutator and Brushes; Diagram of Circuits in Armature and Field; Regulator; Circuits in Regulator.—CHAPTER XIV: Thomson-Houston System of Automatic Current Regulation; Dynamo; Armature; Commutator and Brushes; Controlling Magnet; Wall Controller; Diagram of Circuits; Air Blast.—CHAPTER XV: Waterhouse System of Three-Brush Automatic Current Regulation; Dynamo; Extra Brush; Resistance Coils and Regulator. CHAPTER XVI: Ampere Meters; Tangential Scale; Solenoid Meters.—CHAPTER XVII: Voltmeters; Pressure and Potential Indicators.—CHAPTER XVIII: Testing; Galvanometers; Astatic Needle; Differential Apparatus.—CHAPTER XIX: Wheatstone Bridge or Electrical Balance; Diagram of Circuits and Methods of use; Bridge and Rheostat; Round Form; Square Form.—CHAPTER XX: The Magneto as a Testing Instrument; Armature; Field; Bell; Diagram of Circuits.—CHAPTER XXI: Coupling Dynamos Together; In Series; In Shunt; Series, Shunt and Compound Wound Machines.—CHAPTER XXII: Switches and Switchboards; Loop Switch; Plug and Socket; Change Over Plug and Socket; Conclusion. CHAPTER XXXIII: Electric Motors; General Principles the Same as in Dynamos; Types; Shunt and Series Motors Suitable for all General Purposes; Regulation of Shunt Motors; Of Series Motors; Counter E. M. F.; Direction of Rotation and Direction of Current; Starting Motors; Diagram of Connection.

PART II. CONTENTS.—CHAPTER I: Alternate Current Dynamos; Principles of the Field; Field Current Armature; Winding; Connections; Lamination; Different Types of Alternators; Regulation; Leading Systems; The Brush Generators; Magnets; Armature; Principles of Induction.—CHAPTER II: Dynamos, Continued; The Mordey Alternator; Stationary Armatures; Field Magnets; Ferranti Armature; Field Magnets; Winding; Collectors.—CHAPTER III: Dynamos Concluded; Siemens Dynamo; Best Magnetic Circuits; Stanley Constant Current Dynamo; The Armature; Self Induction; Regulation.—CHAPTER IV: Induction Coils; Converters; Transformers; Economy of Distribution; An Electrical H. P.; Losses in Conductor; Induction Coils; Effect of Induction; Transformers.—CHAPTER V: Transformers Continued; Induction Coils; Converters; Transforming Up and Down; Design of Transformers; The Static Charge; Protection Against; Grounding the Secondary; Other Devices; The Foil Protector; Different Types of Transformers.—CHAPTER VI: Transformers, Concluded; Fuses; Regulation; Winding of Transformers, Connecting to Circuit; Regulation; Safety Fuses.—CHAPTER VII: Parallel System; Series Arc Light System; Diagram of Circuits; Parallel System; Primary Circuit; Secondary Circuit; Placing of Transformers; Fuses; Diagram of Series Arc Light Circuit.—CHAPTER VIII: Lines of Force; Hysteresis; Magnetic Penetration; The Circuit of Lines of Force; Experiments with Magnet; Rapidity of Reversals and Hysteresis.—CHAPTER IX: Arc Lamps; In Series; The Westinghouse Arc Lamp; Diagram of Circuits in Lamp; Action of the Mechanism; Flat Carbons.—CHAPTER X: Arc Lamps, in Multiple; Slattery Differential Lamp; Mechanism of Lamp; Its Operation.—CHAPTER XI: Measuring and Indicating Apparatus; Instruments for Use with Alternating Currents Differ from those used with Continuous Currents; Ammeters; Voltmeters; Description of Several Forms of Instruments.—CHAPTER XII: Measuring Instruments, Continued; Hot Wire Instruments; The Cardew Voltmeter; Details of the Instrument; Low Potential Voltmeter.—CHAPTER XIII: Voltmeters; Double Coil Voltmeter; Two Types.—CHAPTER XIV: Spring Meters; Curled Spring Meter.—CHAPTER XV: Twisted Strip Instruments; Diagram of Connections and Operation of Instrument.—CHAPTER XVI: Recording Meters; Stanley Meter; Construction and Principles of Operation; Diagrams of Parts; Slattery Induction Meter; Description of Parts and Principles of Operation; Watt Meter; Thomson Meter.—CHAPTER XVII: Generators in Parallel, Difficulties in Operating; Alternate Current Generators in Parallel; Arrangements of Circuits and Machines for Operating in Parallel; Diagram of Common Arrangement of Machines and Circuits.—CHAPTER XVIII: Ohm's Law; Strength of Current; Formulas and Examples; Power and Heating Effects of Currents.—CHAPTER XIX: Ground Alarms and Leak Detectors.

PRICE, $2.50.

Orders for above book, or any electrical work published promptly sent on receipt of price, postage prepaid.

Sales Offices: Pittsburgh, Fayette Street and Garrison Place; New York, Equitable Bldg.; Boston, Board of Trade Bldg.; Philadelphia, Real Estate Trust Building; Chicago, National Life Building.

Announcement

The Westinghouse Air Brake Co.

Claim that their New Multiple Unit System of Electric Train Control is the simplest, the safest, the most reliable, the most economical of all in use. All other systems are cumbrous and complicated. Compare ours with them.

Observe how little space our system occupies on the Interborough Railway Car, New York.

Now you see why we speak of the "Turret" Controller.

Our new Controller is in the little turret under the car.

The circuit-breaking power of our turret controller is three times greater than that of any other controller.

Our turret system has other advantages—greater strength than any other; greater blow-out capacity; higher uniformity of action; unequaled arrangement of contacts; an automatic accelerating device. There are more advantages than can be told on this page.

Another new Westinghouse invention is the Automatic Coupler, which in one operation couples the air-brake hose, the Multiple Unit connections, and the lighting and heating connections.

We invite Railway Officials to inspect these inventions at our Pittsburg works.

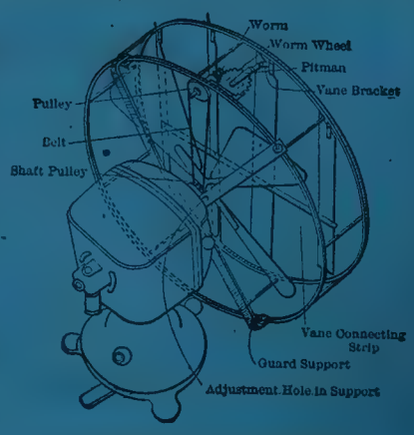
NEW YORK, BOSTON, PHILADELPHIA.



SHOWING DETAILS OF MECHANISM COLEMAN GUARD AND DEFLECTOR.

SOME REASONS WHY

NERNST LAMPS are becoming so popular.

1st They contain no cog wheels, chains, sliding rods nor clock work of any kind.

2nd They can be used on any alternating current circuit.

3rd The efficiency is from 1.32 to 1.76 watts per candle-power.

4th They require a minimum amount of attention, and are positive in operation.

5th The cost of maintenance is low.

6th They require no carbons whatever.

7th They are substantially constructed of only the very best material.

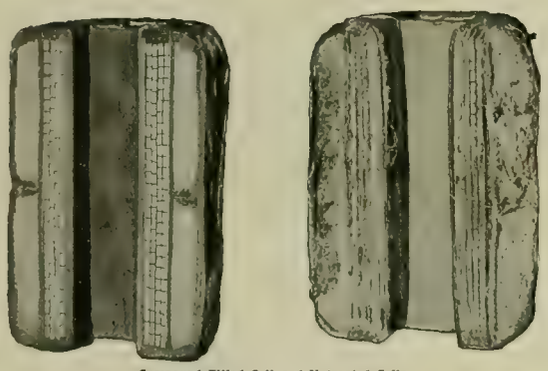
CHICAGO EDISON COMPANY, 139 Adams St., CHICAGO.

GENERAL ELECTRIC COMPANY'S

Type H Transformer Coils



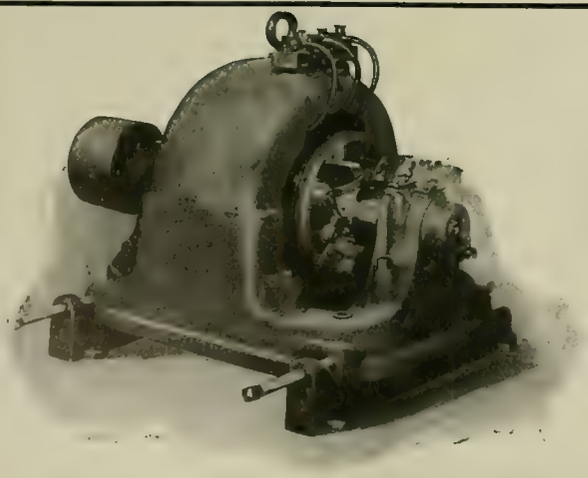
Compound Filled Coil and Untreated Coils.

For over four years have been subjected to the vacuum drying and compound filling treatment. This process produces a solid mass of perfect insulating material in which conductors are firmly embedded; all moisture having been extracted and replaced by a non-absorbent insulating compound forced into every pore and crevice of the coil.

This treatment has caused these coils to successfully withstand the mechanical and electrical strains incident to intermittent or continued usage under the most severe conditions.

GENERAL OFFICES: SCHENECTADY, N. Y.

Chicago Office: Monadnock Block. Sales Offices in all Large Cities.



Are You Thinking

OF TRYING TO INCREASE YOUR EARNINGS?

Probably the best way to do this is to secure a good motor load. Our motors are all single phase, self-starting, and will give equal satisfaction operated on single or multiphase circuits. Only one transformer required to operate them.

We will gladly tell you what they have done for others, and what they can be made to do for you. Have you got our latest Bulletins ?

APPARATUS
For Central Station and Power House Equipment

A three hundred kilowatt alternating unit, consisting of one 300 K. W. Stanley, two-phase, 60-cycle, 2,400-volt alternator, directly connected to a 16-32x24 McIntosh, Seymour & Co. vertical cross-compound engine.

ALTERNATORS.
One 250 K. W. General Electric, 2,400 volts, 50 cycles, three-phase.
One 200 K. W. General Electric, 2,300 volts, 40 cycles, three-phase.
One 180 K. W. General Electric, 2,300 volts, 60 cycles, single-phase.
One 180 K. W. Westinghouse 2,200 volts, 60 cycles two-phase.
One 150 K. W. Westinghouse, 2,300 volts, 60 cycles, single-phase.
One 150 K. W. Stanley, 1,100-2,200 volts, 133 cycles, two-phase.
Two 120 K. W. General Electric, 1,040 volts, 125 cycles, single-phase.
One 120 K. W. General Electric, 2,080 volts, 125 cycles, single-phase.
One 90 K. W. General Electric, 2,300 volts, 60 cycles, single-phase.
One 75 K. W. Stanley, 1,200-2,400 volts, 133 cycles, two-phase.
One 60 K. W. Westinghouse, 2,200 volts, 60 cycles, two-phase.
One 60 K. W. Westinghouse, 2,200 volts, 60 cycles, single-phase.
One 45 K. W. Westinghouse, 2,200 volts, 60 cycles, single-phase.
Three 35 K. W. Thomson-Houston, 1,100 volts, 125 cycles, single-phase.

RAILWAY GENERATORS 500-550 VOLTS.
Two 500 K. W. General Electric, 6-pole, speed, 300 R. P. M.
Two 300 K. W. General Electric, 4-pole, speed, 400 R. P. M.
Two 225 K. W. General Electric, 6-pole, speed, 465 R. P. M.
One 200 K. W. Westinghouse, 6-pole, speed, 510 R. P. M.
Two 200 K. W. General Electric, 4-pole, speed, 425 R. P. M.
Two 180 K. W. Westinghouse, 4-pole, speed, 535 R. P. M.
One 110 K. W. Eddy, 4-pole speed, 600 R. P. M.
Two 100 K. W. General Electric, 4-pole, speed, 650 R. P. M.
One 100 K. W. Walker, 4-pole, speed, 750 R. P. M.
Two 100 K. W. Edison, bi-polar, speed, 620 R. P. M.
One 90 K. W. Thomson-Houston, 4-pole, speed, 700 R. P. M.
One 80 K. W. General Electric, 4-pole, speed, 700 R. P. M.
Two 80 K. W. Detroit, bi-polar, speed, 620 R. P. M.
Five 62 K. W. Thomson-Houston, type D, speed, 900 R. P. M.
One 50 K. W. Brush, type Q, speed, 1,050 R. P. M.

DIRECT CONNECTED UNITS.
One 200 K. W. Westinghouse, 8-pole, 500-550-volt generator, with 18-30x16 Westinghouse compound engine.
One 130 K. W. General Electric, 8-pole, 125-volt generator, with 12-20x16 Erie Ball tandem compound engine.
One 60 K. W. Eddy, 4-pole, 125-volt generator, with 13x12 Buffalo Forge engine. Brand new.
One 50 K. W. Commercial, 6-pole, 125-volt generator, with 8½-13x12 Armington & Sims tandem compound engine.
One 50 K. W. Eddy, 4-pole, 125-volt generator, with 13x12 Harrisburg Ideal engine.
One 50 K. W. unit, consisting of two 25 K. W. General Electric, 4-pole, 125-volt generators, with one triple expansion vertical engine.
One 30 K. W. Eddy, 4-pole, 125-volt generator, with 10x12 Watertown engine.
One 25 K. W. GeneralElectric, 6-pole, 125-volt generator, with 9½x10 Armington & Sims engine.
Two 25 K. W. Westinghouse 6-pole, 250-volt generators, each with 9x10 Ball and Wood engine.

ENGINES.
One 26x48 Harris Corliss, 500 H. P.
One 18-34x48 Cooper Corliss, cross compound, 500 H. P.
One 23x48 Harris Corliss, 400 H. P.
One 20x36 Hewes & Phillips, 200 H. P.
One 18x48 George H. Corliss, 250 H. P.
One 16x42 Providence Greene, 200 H. P.
Two 18-30x16 Westinghouse compound, 250 H. P. each.
Three 18½x18 Armington & Sims, 250 H. P. each.
One 18½x18 New York Safety, 250 H. P.
Two 10-18x20 Payne tandem compound, 150 H. P. each.
One 13-19x15 McIntosh, Seymour & Co. tandem, 175 H. P.
Two 14x13 Armington & Sims, 150 H. P.
One 14x14 Rice automatic, 125 H. P.
One 13x12 Armington & Sims, 125 H. P.
One 12-20x12 Westinghouse compound, 100 H. P.
One 12x12 New York Safety, 100 H. P.
One 10½-16½x12 Armington & Sims cross compound, 100 H. P.
One 9x16 Rice automatic, 75 H. P.
One 12x10 Westinghouse Junior, 75 H. P.
One 8x10 B. F. Sturtevant, 40 H. P.
One 7x8 Payne, 20 H. P.
Three 6x5 Westinghouse Junior, 12 H. P. each,
Two 5x4 Westinghouse Junior, 6 H. P. each.

Direct current generators and motors, 110, 220 and 500 volts.
Alternating-current motors, 60 and 125 cycles.
Brush and Thomson-Houston arc generators—all sizes.
Babcock & Wilcox and water tube boilers.
Transformers, arc lamps, street railway motor equipments.

GENERATORS—500 Volts.
Two T. H., 500 K. W.
Four T. H., 270 K. W., arranged to be driven with a single pulley clutch coupling on each side of pulley.
One General Electric, 250 K. W.
One Westinghouse, 175 K. W.
Two General Electric, 100 K. W., 4 pole.
Two General Electric, 100 K. W., 6 pole.
Six Edison, No. 60, 175 K. W.
Six T. H., D62.
One Edison No. 20, 60 K. W.

GENERATORS—110 Volts.
Two 210 K. W., G. E. design, 14 pole, for direct connection, at a speed of 120 R. P. M.
Four 60 K. W. Edison.
Two 46 K. W. Edison.

ALTERNATING GENERATORS.
One 750 K.W., Westinghouse 60-cycle, 2-phase, 2,200 volt generator, belted to one 24 and 48x60 cross-compound condensing Cooper Corliss engine, complete.
Two 100 K. W., G.E. 3 phase, 60 cycle generator, complete.
Two 100 K. W., G. E., 1100 volts monocyclic, complete.
One 60 K. W., Westinghouse, 1100 volts.
One 35 K. W., Westinghouse, 1100 volts, complete.

STREET CAR EQUIPMENT.
One hundred and eighty 25 H. P. motors, new and complete with pinions, gear and gear cases.
One hundred and eighty "K" Controllers.
Twenty-five K-2 Controllers.

ENGINES.
Six 36 and 60x60, Cooper cross-compound non-condensing, new, never shipped from factory.
One 30x54 St. Louis Corliss.
Two 24x60 Lane & Bodley, designed for rolling mill work.
One 28x60 Pennsylvania Iron Works Co.
One 20x48 Wheelock.
One 20x48 Double Wheelock.
One 20x42 Wheelock.
One 14x42 Hamilton Corliss.
Two 21x18 Armington & Sims.
Four 16 and 22x22 Houston, Stanwood & Gamble, cross-compound.
Five 12 and 20x16 tandem compound Ball.
Two 11 and 17x14 cross-compound Ideal.
Two 9 and 16x12 tandem compound Ball.
One 8 and 13x12 tandem compound Ball.
Three 17x18, Skinner, with air cylinders attached.
Two 16x20 Porter-Allen.
Two 15x20 Automatic Russell.
One 15½x15 Armington & Sims high speed simple automatic, 270 R. P. M.
One 15x15 Armington & Sims simple automatic, 270 R. P. M.
One 13½x15 Armington & Sims high speed simple automatic, 300 R. P. M.
One 14x17 Fisher, new.

BOILERS.
Four 66x18 with 66 4-inch tubes. A complete battery at a great bargain.
Three 66 x 14, with 66 4-inch tubes.
Two 72 in. x 18 ft., with 66 4-inch tubes.
Five 60x16 ft. high pressure boilers.
Two Sterling Water Tube Boilers, 250 H.P. each.
Two 500 H. P. Hazelton.

FERRIS WHEEL.
One 60 ft. Ferris Wheel, electrically driven.

AT A BARGAIN — A complete Edison 3-wire plant of 300 K. W. capacity.

Doubled His Salary Through the I. C. S.

With such an institution as the I. C. S. in existence, there is no excuse for a man remaining at the bottom of the ladder. Any one with ambition enough to study a few hours each day can rise. When I enrolled in the I. C. S., I was a lamp-trimmer in our City Electric Light Plant. I was soon appointed electrician, and in less than two years from the date of enrolment, **was elected chief engineer** of the same plant—a position I would be unable to hold were it not for my Course in the I. C. S. Although I have been a student but two years, the Course has increased my salary one hundred per cent.

STOKLEY D. ROWAN, *McMinnville, Tenn.*

This is but one of many hundred indorsements proving that our students succeed. Our new free booklet, "1001 Stories of Success," gives the names, addresses, and advancement of over a thousand other students whom we have placed on the road to progress and prosperity. To those inquiring **now** it will be sent free. Every student of the I. C. S. is entitled to the assistance of the Students' Aid Department in securing advancement or a new position. Start TODAY to rise!

Fill Out and Send in the Coupon NOW!

Announcement

The Westinghouse Air Brake Co.'s

New Multiple Unit System of Electric Train Control cuts off current when brakes are applied.

Brakes are applied and current cut off if motorman removes his hand.

Circuit breaker on every car opened and closed at will by motorman. This provides independent emergency method for instantly cutting off current from all motors.

All these operations automatically take place on each car if train breaks apart.

Fire risk reduced. Fourteen volt storage battery current used. There is no control cable carrying heavy motor current through the train at line pressure.

The new system combines elements long proved superior for this work.

It is electro-pneumatic.

It is operated by compressed air controlled by storage battery magnets. It is independent of line current. It is not affected by sleet, snow, ice, defective contact with third rail, or by fluctuating voltage.

Instead of blowing fuses, any excessive current will open circuit breaker.

Circuit breaker closed again instantly by motorman without leaving his cab.

A long break made with very great power prevents any freezing shut of contractors. The method employed is fifty times more reliable than any contractor built by other makers.

Trains accelerated automatically at just the right speed with just the right amount of current. All trains work exactly alike. A road using any non-automatic system requires between 10% to 20% additional power to move the same train tonnage.

Our automatic system uses much less power than any all-electric system for operating the controller.

Weight is less than any other system.

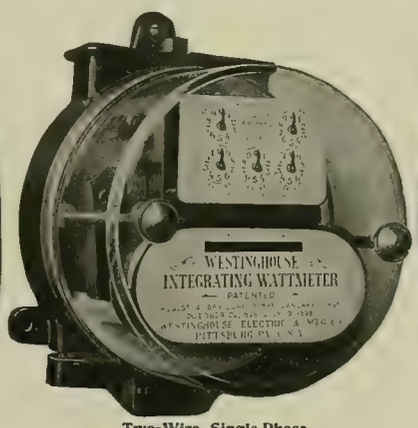
Then there is the new Westinghouse Automatic Coupler, which in one operation couples the air brake hose, the multiple unit connections, and the lighting and heating connections.

We invite railway officials to inspect these inventions at our Pittsburg Works.

Westinghouse

Integrating Wattmeters

Three-Wire, Single Phase.



Two-Wire, Single Phase, Glass Covered.

Two-Wire, Single Phase, Metal Covered.

Polyphase.

Accurate from two per cent. of full load to fifty per cent. overload.
Accurate on inductive loads of any power factor.

Send 10 cents for 80-page illustrated catalogue giving the truth in detail about the best boats built.

CONCERNING
WATTMETERS

HONESTY

Honesty is the best quality that a good recording wattmeter can possess. To record all the energy that a consumer is using—no more, no less—that is the prime requisite. But the possession of this quality implies the presence of others without which a wattmeter is not rated very high in the estimation of those to whom it is useful.

An honest and faithful employe who lacks ability and adaptability cannot command as high salary as one who has these qualities. Likewise an honest wattmeter that can accurately record light loads or overloads with fluctuating voltage and various frequencies, is worth more than an honest meter that is unable to do these things.

NOTE—Type K integrating induction wattmeters will accurately record heavy overload, non-inductive or inductive, without injury. Voltage variations do not induce "creeping" and altering one connection and readjusting changes a 60 cycle meter into a 140 cycle meter. These and other features of Type K wattmeters are explained in Bulletin No. 1017.

SOME REASONS WHY

NERNST LAMPS are becoming so popular.

1st They contain no cog wheels, chains, sliding rods nor clock work of any kind.

2nd They can be used on any alternating current circuit.

3rd The efficiency is from 1.32 to 1.76 watts per candle-power.

4th They require a minimum amount of attention, and are positive in operation.

5th The cost of maintenance is low.

6th They require no carbons whatever.

7th They are substantially constructed of only the very best material.

Our methods are right
We are right, and our products—
Everything electrical—
They are right,
Now to be right see,
Ewing-Merkle Electric Co.,
St. Louis, Mo.

ELECTROLYSIS-PROOF

UNDERGROUND CONDUIT

OUR CONDUIT IS { *Absolutely— Electrolysis-Proof, Non-Abrasive, Moisture-Proof, Non-Corrosive, Perfect Insulator.* }

Insulation Test, **66,000 VOLTS.**

A perfect joint which is self-aligning, making the conduit line a solid tube from manhole to manhole.

Construction simple, rapid and inexpensive, requires no skilled labor.

Cables drawn more easily and a longer distance than in any other.

Resistance strength when underground as great as any.

Life of Conduit everlasting. Asphalt never deteriorates.

THE BOY STOOD ON THE BURNING DECK

IT WAS—
AND IS—
PRETTY HOT,
BUT
HE IS GOING
TO STAY
RIGHT
THERE

Pick up one of our lamps and compare it with any other lamp of ours. You will find they are as alike as a paper of pins. That is why we don't have to send you picked lamps on your sample order.

Regularity in lamp manufacture means a good deal to you. Perhaps you have never noticed the little points in lamp manufacture—how the tips differ; some long, some short, some crooked, some blackened. Then, again, did you ever look at the seals, where the platinum passes through the glass? Some lamps have large lumps where the copper wire joins the platinum. Many lamps have irregular shaped seals. All this means something, at least to the expert.

If the little things you can see are bad, what about the important points you can't see, such as initial candlepower and watts, maintained candlepower, life and regularity of performance?

You can depend upon Independent lamps in every one of these particulars.

THE INDEPENDENT INCANDESCENT LAMP COMPANY CLEVELAND, OHIO

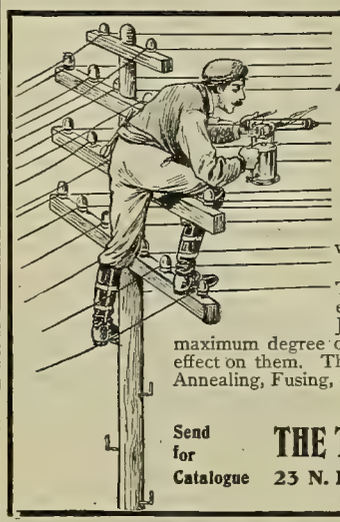
CHICAGO OFFICE: FISHER BUILDING.



High In the Air
Amid Storm and Wind

THE TURNER DOUBLE JET GASOLINE TORCHES

will make a lineman's work much easier.

These torches are superior to all others for electricians' and lineman's work. The Double Jet construction of the burner generates the maximum degree of mechanical heat, and the wind has little effect on them. They are unequaled for Brazing, Tempering, Annealing, Fusing, Soldering, or any work requiring heat.

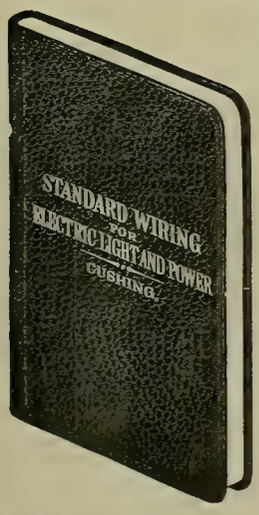
THE TURNER BRASS WORKS
23 N. Franklin Street, CHICAGO



"The Recognized Authority on Wiring and Construction."

The universally adopted National Electrical Code explained and illustrated in this year's edition of the hand-book.

STANDARD WIRING

For Electric Light and Power.

By H. C. CUSHING, Jr., A. I. E. E., Electrical Engineer and Inspector.

ADOPTED

By the Fire Underwriters of the United States.
By Cornell University, Stanford University and other Technical Colleges and Schools.
By over 27,000 Electrical Engineers, Central Station Managers and Wiremen.

BECAUSE

It is the only book on Wiring and Construction kept strictly up to date.
It contains all the necessary Tables, Rules, Formulas and Illustrations.
It settles disputes, and if referred to before wiring will prevent disputes.

Flexible Leather Cover (pocket size), $1.00.
Sent post paid upon receipt of price, by

Twenty-five K-2 Controllers.

ENGINES.

Six 36 and 60x60, Cooper cross-compound, non-condensing, new, never shipped from factory.
One 30x54 St. Louis Corliss.
Two 24x60 Lane & Bodley, designed for rolling mill work.
One 28x60 Pennsylvania Iron Works Co.
One 20x48 Wheelock.
One 20x48 Double Wheelock.
One 20x42 Wheelock.
One 14x42 Hamilton Corliss.
Two 21x18 Armington & Sims.
Four 16 and 22x22 Houston, Stanwood & Gamble, cross-compound.
Five 12 and 20x16 tandem compound Ball.
Two 11 and 17x14 cross-compound Ideal.
Two 9 and 16x12 tandem compound Ball.
One 8 and 13x12 tandem compound Ball.
Three 17x18, Skinner, with air cylinders attached.
Two 16x20 Porter-Allen.
Two 15x20 Automatic Russell.
One 15½x15 Armington & Sims high speed simple automatic, 270 R. P. M.
One 15x15 Armington & Sims simple automatic, 270 R. P. M.
One 13½x15 Armington & Sims high speed simple automatic, 300 R. P. M.
One 14x17 Fisher, new.

BOILERS.

Four 66x18 with 66 4-inch tubes. A complete battery at a great bargain.
Three 66 x 14, with 66 4-inch tubes.
Two 72 in. x 18 ft., with 66 4-inch tubes.
Five 60x16 ft. high pressure boilers.
Two Sterling Water Tube Boilers, 250 H.P. each.
Two 500 H. P. Hazelton.

FERRIS WHEEL.

One 60 ft. Ferris Wheel, electrically driven.

AT A BARGAIN — A complete Edison 3-wire plant of 300 K. W. capacity.

It will be profitable to wire or write us giving requirements of machinery wanted or for sale.

YOUR VACATION IN COLORADO.

Consider Colorado as a place to spend your summer vacation and you will find that it meets the requirements. Colorado has been brought nearer the East by our fast train service—only one night on the road from Chicago or St. Louis to Denver.

The railroad fare is low during the summer—about one-half the regular fare, and on certain days less than half.

Colorado has hundreds of moderate-priced hotels and boarding houses—more perhaps than any summer resort country. The prices range from $8 per week upward.

Nowhere can be found such a glorious combination of climate and scenery as in Colorado. The air invigorates, strengthens, revives—it is Nature's own tonic. All the outdoor sports that can be enjoyed anywhere are possible in Colorado. Plenty of golf courses and the finest kind of trout fishing.

Just consider these facts for a minute and then write me for a copy of the Burlington's "Handbook of Colorado." It does not attempt a description of Colorado's charms, but it does tell facts about 200 or more hotels and boarding houses—shows the location, how reached, name and address of proprietor, rates by the week and month, principal attractions, etc. No charge for a copy. Will be glad to send copies to your friends.

SUBSCRIPTIONS.

With January 1st began the thirty-second volume of the WESTERN ELECTRICIAN, and during 1903 it will complete its sixteenth and the first half of its seventeenth year, the paper having been founded July 2, 1887, and continued under the present management for this entire period. We offer the past as a guaranty of the future, and in addition pledge the best efforts of an experienced and competent staff to the constant improvement of the paper.

The WESTERN ELECTRICIAN is published for the purpose of assisting everyone interested in the art. It is a general electrical and scientific paper, and gives to its readers all the latest news and keeps them thoroughly informed of everything that is going on in all the different departments of the electrical and allied fields. Its technical and scientific articles cover all the latest inventions and improvements and keep the reader thoroughly informed of all that is new in the art. Its special articles, written by the most prominent authorities, as well as its general articles, are of the highest order, and no interested person can afford to be without the paper.

Announcement

The Westinghouse Air Brake Co.

New Multiple Unit System of Electric Train Control cuts off current when brakes are applied.

Brakes are applied and current cut off if motorman removes his hand.

Circuit breaker on every car opened and closed at will by motorman providing independent emergency method for instantly cutting off current from all motors.

All these operations automatically take place on each car if train breaks apart.

Fire risks reduced. Fourteen volt storage battery current used. There is no heavy motor current carried through the train at line pressure.

The new system is electro-pneumatic.

It is operated by compressed air controlled by storage battery magnets. It is independent of line current. It is not affected by sleet, snow, ice, defective contact with third-rail, or by fluctuating voltage.

Instead of blowing fuses, any excessive current will open circuit breaker.

Circuit breaker closed again instantly by motorman without leaving his cab.

A long break made with very great power prevents any freezing shut of contactors. The method employed is fifty times more reliable than any contactor built by other makers.

Trains accelerated automatically at just the right speed with just the right amount of current. All trains work exactly alike. A road using any non-automatic system requires between 10% and 20% additional power to move the same train tonnage.

Our automatic system uses much less power than any all-electric system for operating the controller.

Weight is less than any other system.

Then there is the new Westinghouse Automatic Coupler, which in one operation couples the air brake hose, the multiple unit connections, and the lighting and heating connections.

We invite Railway Officials to inspect these inventions at our Pittsburg works.

Elevator Vestibule of Frick Building, Pittsburgh, Pa.

Illuminated by Nernst Lamps

These illustrations show interior views of one of the finest office buildings in the world. The effective illumination of the extensive corridors and vestibules of such a structure, was an important question. Nernst lamps were selected for the purpose.

Electrical Supply Dealers

will send illustrated Booklet No 2, describing he efficiency and economy of The Nernst Lamp

or address any Sales Office of Nernst Lamp Co.

Pittsburgh, Fayette St. and Garrison Place; New York, Equitable Bldg.; Boston, Board of Trade Bldg.; Philadelphia, Real Estate Trust Bldg.; Chicago, National Life Bldg.

ELECTRICAL BOOKS

Make your book purchases from the only large stock of electrical books carried in the West. Prompt shipments guaranteed. If you do not find what you want in the following list, write for complete and up-to-date book catalogue.

	Price.
Webb's Telephone Hand Book, cloth binding	$1.00
Badt's New Dynamo Tender's Hand Book, cloth binding	1.00
Badt's Incandescent Wiring Hand Book, cloth binding	1.00
Badt's Bell Hanger's Hand Book, cloth binding	1.00
Badt's Electric Transmission Hand Book, cloth binding	1.00
Dobb's The Inspector and Trouble Man, cloth binding	1.00
Steven's Mechanical Catechism, cloth binding	1.00
Hawkins' Catechism of Electricity, leather binding	2.00
Practical Electricity, leather binding	2.00
Thompson's Polyphase Electric Currents, cloth binding	3.50
Varley's Electro-Magnet, cloth binding	1.00
Buckley's Electric Lighting Plants, cloth binding	2.00
Haskins' Electricity Made Simple, cloth binding	1.00
Haskins' Transformer, cloth binding	1.25
Houston's 2-volume Electrical Dictionary, half leather, very cheap, half price	6.00
Watson's Electrician's Handy Book, cloth binding	2.50
Trevert's Armature and Magnet Winding, cloth binding	1.50
Trevert's How to Build Dynamo Electric Machinery, cloth binding	2.50
Trevert's Experimental Electricity, cloth binding	1.00
Trevert's Electricity for Students, cloth binding	1.00
Trevert's Electric Railway Engineering, cloth binding	2.00
Allsop's Bell Construction, cloth binding	1.25

	Price.
Trevert's Electrical Measurements for Amateurs, cloth binding	$1.00
Allsop's Telephones, Their Construction and Fitting, cloth binding	1.25
Allsop's Bell Fitting, cloth binding	1.25
Allsop's Induction Coils, cloth binding	1.25
Bell's Electric Power Transmission, cloth binding	3.00
Bell's Distribution for Electric Railroads, cloth binding	2.50
Cushing's Standard Wiring for Electric Light and Power, leather binding	1.00
Hanchett's Modern Electric Railway Motors, cloth binding	2.00
Houston & Kennelly's Electric Transmission of Intelligence, cloth binding	1.00
Houston & Kennelly's Electrical Measurements, cloth binding	1.00
Houston & Kennelly's Electric Heating, cloth binding	1.00
Houston & Kennelly's Electric Arc Lighting, cloth binding	1.00
Houston & Kennelly's Electric Motor, cloth binding	1.00
Houston & Kennelly's Electric Street Railways, cloth binding	1.00
Houston & Kennelly's Electric Telegraphy, cloth binding	1.00
Houston & Kennelly's Electro Therapeutics, cloth binding	1.00
Houston & Kennelly's Electricity Made Easy, cloth binding	1.50
Merill's Electric Light Specifications, cloth binding	1.50
Wiener's Dynamo Electric Machines, cloth binding	3.00

LAUNCHES

When figuring on your summer outing, we know you will be in want of a boat of some description, so you can enjoy yourself and obtain the benefit of your vacation.

SO LET US FIT YOU OUT.

RACINE BOAT
MANUFACTURING COMPANY

BOX 13, RACINE, WIS., U. S. A.

The ideal gentleman's pleasure craft. The finest launch that floats. Speedy, safe, simple and reliable.

15 FT. FISHING LAUNCH, $150.00
16 FT. FAMILY LAUNCH, 200.00
35 FT. CABIN LAUNCH, 1,500.00

Send 10 cents for 80-page illustrated catalogue giving the truth in detail about the best boats built.

FORM C "WOOD"
ARC LAMPS
are

Easy to trim
Easy to adjust
Easy to repair
Easy to sell
Easy to buy

A single lifting twist of the wrist releases globe or case

A single shifting of two clamps does the adjusting

Repairs are rarely necessary because the lamps are made for years of service — not for one season only.

Their selling qualities begin to talk as soon as the lamps are seen, and do not vanish with hard usage.

And to buy them is quite as easy as to sell them. Write the home office and learn more.

WESTON Electrical Instrument Co.,
Waverly Park, NEWARK, N. J.

Illuminated Dial Station Instruments.

These instruments are constructed upon the same general principle as our regular Standard Portable Direct Current Voltmeters and Ammeters, but are much larger, and the working parts are inclosed in a neatly designed, dust-proof cast-iron case which effectively shields the instruments from disturbing influences of external magnetic fields.

Weston Standard Illuminated Dial Potential Indicator, Style B. "Flush Type."

Weston Standard

Portable Direct Reading Voltmeters and Millivoltmeters, Ammeters and Milliammeters, Wattmeters and Voltmeters, for Alternating and Direct Current Circuits.

Our portable instruments are recognized as standards throughout the civilized world.

Our Semi-Portable Laboratory Standard Voltmeters and Ammeters are still better.

They are the most reliable, absolute standards for Laboratory use.

ELECTROLYSIS-PROOF

UNDERGROUND CONDUIT

OUR CONDUIT IS { *Absolutely— Electrolysis-Proof, Non-Abrasive, Moisture-Proof, Non-Corrosive, Perfect Insulator.* }

Insulation Test, 66,000 VOLTS.

A perfect joint which is self-aligning, making the conduit line a solid tube from manhole to manhole.

Construction simple, rapid and inexpensive, requires no skilled labor.

Cables drawn more easily and a longer distance than in any other.

Resistance strength when underground as great as any.

Life of Conduit everlasting. Asphalt never deteriorates.

Announcement

Owing to various rumors recently circulated by competitors relative to the control of this company as to its ability and willingness to carry out future contracts for Independent telephone apparatus, we feel that the Independent telephone interests which are our present and prospective customers are entitled to some statement from us.

Suit was begun by minority stockholders in this company June 5th, which will be contested and which relates to matters of no material interest to our customers as long as the company continues in business along the same satisfactory lines as formerly. We desire to assure our present and prospective customers that the business of this company will be continued in the future as in the past.

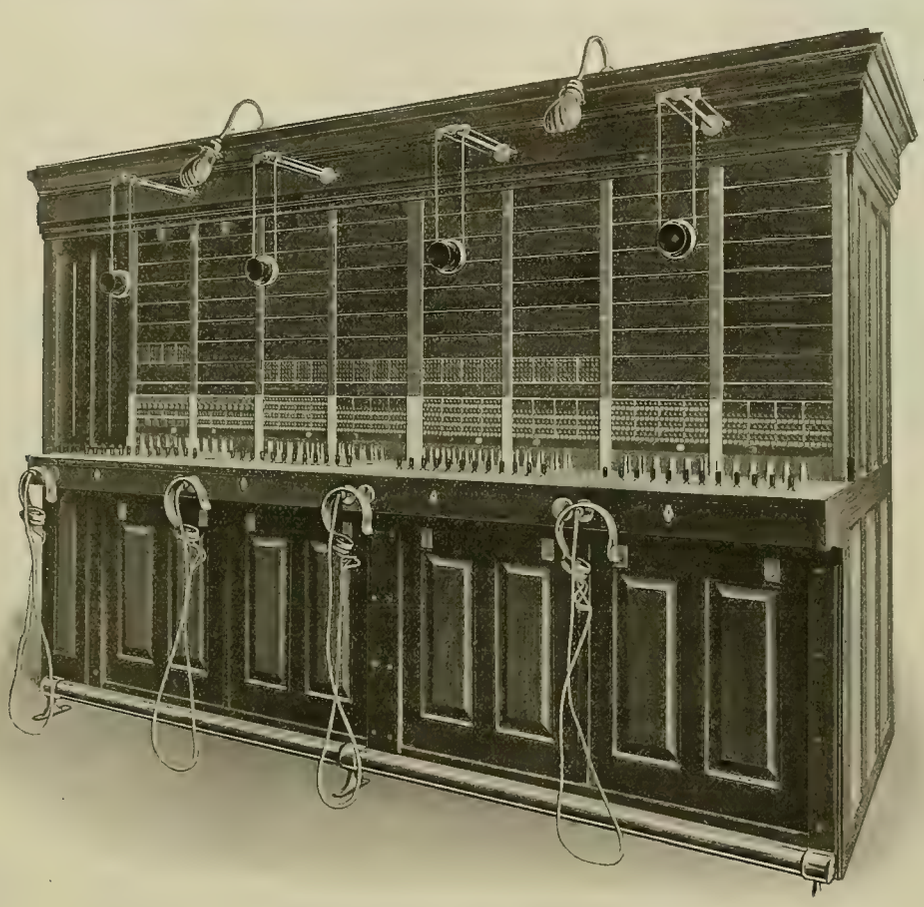
To assure customers of our entire good faith and intentions to continue in business as heretofore, we will furnish bonds to customers insuring the fulfillment of our contracts for new apparatus or for the furnishing of extensions of existing exchanges for a period of five years. Our customers will be as fully protected as ever.

Kellogg Switchboard & Supply Company

CHICAGO

THE KELLOGG SYSTEM NO EXPERIMENT

It is not necessary for the purchaser to carry on experimental work for the manufacturer when operating Kellogg systems. These systems have remained standard for over 2 ½ years, during which time the largest exchanges in this country have been equipped and show the highest efficiency in operation and lowest cost of maintenance.



STANDARD COMMON BATTERY SWITCHBOARD

The KELLOGG COMPANY is prepared to furnish complete equipment for any size exchange, large or small.

The Kellogg telephones have also long since passed the experimental stage and are now actually used as a standard of excellence.

PHILADELPHIA

The Superiority

OF

Stromberg-Carlson Apparatus

No. 292 Cabinet

is proven when it comes to that test of all tests—service. Take the switchboards for example (our No. 292 cabinet, shown in illustration), the cabinet work (made in our own factory) is so much better finished and put together than the average board on the market that we sometimes hear the remark, "Guess you put most of your money in the cabinet."

The best evidence that we put money enough in the equipment as well is proven by the number of boards we have in use, the time they have been in use and the service they are giving.

The jacks are made of hard rubber, brass and german silver and provided with platinum contacts.

Lamp jacks, made of hard rubber, brass and german silver, mounted 5 or 10 per strip.

Keys have german silver springs and platinum contacts.

Plug shelf covered with heavy belt leather.

Relays mounted in upper part of cabinet, easily accessible.

There is nothing left undone that would tend to increase the efficiency or appearance.

Write for Bulletins.

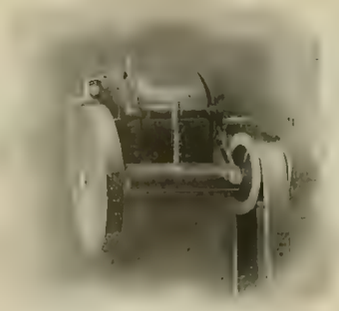
SOME OF THE REASONS WHY

OUR MOTORS ARE BECOMING SO POPULAR AND GIVING SUCH UNIVERSAL SATISFACTION



1st—They are single phase, self-starting.
2nd—The only operation necessary to start them is to close either the primary or secondary circuit of your system by means of a double pole switch located, at any convenient point, however distant from the motor.
3rd—They require a minimum amount of attention.
4th—The cost of maintenance is negligible.
5th—The cost of installation is low, only requiring one transformer and two wires to supply current to the motor, whether on single or multiphase circuits.
6th—The transformer losses are less than with a multiphase motor.
7th—They are so constructed, of the best material, that they are always ready to run, and the most inexperienced can operate them with perfect results.

If you would know more of their salient features, write us

The Automatic Electric Company invites you, while in Chicago during the Convention of the Independent Telephone Association, to visit its new factory corner of Morgan and Van Buren Streets. Through the courtesy of the Illinois Telephone and Telegraph Company, you are also promised an inspection of the tunnels which that company has completed under Chicago, and the ten thousand station automatic telephone exchange which will soon be ready for service. A line of automobile swill be placed at your disposal by the Automatic Electric Company to convey you to its factory, to the tunnels and the exchange.

New Standard Specialties.

DRY CELL.

If kept out of the sun, in a cool dry place, this cell will not run down on the shelf in two years, and at the end of that time will be as good as other makes fresh from the factory. To maintain its superiority to all others, no expense is spared, and only the best materials and chemicals are used in its manufacture

This cell will save the consumer money, because a fewer number will perform a given amount of work four times as long as any other cell of equal size.

ELECTROMOTIVE FORCE, 1.52 VOLTS.

GOOD BOOKS.

AUTHORITIES ON SUBJECTS MENTIONED.

The Pocket Electrical Dictionary. Containing all of the words and definitions in the science. A new work. Indispensable to the electrician, student and professor. Over 11,000 words and about 15,000 definitions. By *Edwin J. Houston*, A. M., Ph. D. (Princeton). 1 volume, 32mo, cloth, **$2.50**; leather, **$3.00.**

Electricity Made Easy. Profusely illustrated. A hand-book for busy people. By *Edwin J. Houston*, A. M., Ph. D., and *Arthur E. Kennelly*, Sc. D. 1 volume, 12mo, cloth, **$1.50.**

Dynamo-Electric Machinery. By *Silvanus P. Thompson*, D. Sc., B. A., F. R. S. Eighth edition, revised and enlarged. Profusely illustrated with new engravings. 19 folding plates. 8vo, cloth, **$5.00.**
The rapid advance of electrical science made it absolutely necessary to revise the last edition, and this is now a new work. It is indispensable to the electrical expert, professor and student of electrotechnics. Students and professors highly appreciate the publication of this extensive work.

Polyphase Electric Currents and Alternate Current Motors. By *Silvanus P. Thompson*, D. Sc., B. A., F. R. S. 1 volume, 8vo, cloth, **$3.50.**
The most important work on the subject. A companion book to "Dynamo-Electric Machinery." One of the text-books in schools of technology and colleges. Beautifully illustrated with fine engravings. Folding plates. Invaluable to the expert electrician.

Algebra Made Easy. By *Edwin J. Houston*, Ph. D., and *A. E. Kennelly*, Sc. D. This little work is of special value to readers of Prof. Thompson's Dynamo-Electric Machinery and Polyphase Electric Currents, as the work has been written to explain in a clear and simple manner the equations contained in those works. 1 volume, 16mo, cloth, **75** cents.

The Interpretation of Mathematical Formulae. By *Edwin J. Houston*, Ph. D., and *A. E. Kennelly*, Sc. D. 1 volume, 12mo., cloth. **$1.25.**
A most valuable aid to students and electrical workers.

A B C of Electricity. Now approaching its 65th thousand. By *William H. Meadowcroft*. 1 volume, 12mo, cloth. **50** cents. Fully illustrated.
This excellent primary book has taken the first place in elementary scientific works. It has received the endorsement of Thomas A. Edison. It is for every person desiring a knowledge of electricity, and is written in simple style so that a child can understand the work. It is what its title indicates, the first flight of steps in electricity.

Scholars' A B C of Electricity. By *William H. Meadowcroft*. 1 volume, 12mo. illustrated, cloth, **50** cents.
The author of this work has designed it for the use of teachers and scholars. A large number of simple experiments have been added, with notes relative to the work. It is the primary book for school use.

The X Ray; or Photography of the Invisible and Its Value in Surgery. By *William J. Morton*, M. D. Written in collaboration with *Edwin W. Hammer*, 1 volume, 12mo, cloth and silver, **75** cents; paper, **50** cents.
The work explains in clear and simple style how these extraordinary pictures are taken through solids. Full description is given of the apparatus used, and the text is profusely illustrated with half-tone illustrations giving facsimile copies of the pictures taken from the negatives of the author. The subjects are varied.

The A B C of the X Ray. By *William H. Meadowcroft*. 1 volume, 12mo, cloth and gold, **75** cents.
The first primary work on the subject. A book for the people. The author of "A B C of Electricity" showed clearly in that work his ability to explain a technical subject for the laymen who know nothing of scientific terms. He has written this work about the X Ray in his usual clear and simple style. and a wide circulation of this useful book is assured. The text of the author is beautifully embellished with fine engravings, and nothing is omitted that will give the public a clear knowledge of this remarkable discovery of Prof. Röntgen. The public would do well to secure both these important works.

One 50 K. W. Commercial, 6-pole, 125-volt generator, with 8½-13x12 Armington & Sims tandem compound engine.
One 50 K. W. Eddy, 4-pole, 125-volt generator, with 13x12 Harrisburg Ideal engine.
One 50 K. W. unit, consisting of two 25 K. W. General Electric, 4-pole, 125-volt generators, with one triple expansion vertical engine.
One 30 K. W. Eddy, 4-pole, 125-volt generator, with 10x12 Watertown engine.
One 25 K. W. GeneralElectric, 6-pole, 125-volt generator, with 9½x10 Armington & Sims engine.
Two 25 K. W. Westinghouse 6-pole, 250-volt generators, each with 9x10 Ball and Wood engine.

ENGINES.

One 26x48 Harris Corliss, 500 H. P.
One 18-34x48 Cooper Corliss, cross compound, 500 H. P.
One 23x48 Harris Corliss, 400 H. P.
One 20x36 Hewes & Phillips, 200 H. P.
One 18x48 George H. Corliss, 250 H. P
One 16x42 Providence Greene, 200 H. P.
Two 18-30x16 Westinghouse compound, 250 H. P. each.
Three 18½x18 Armington & Sims, 250 H. P. each.
One 18½x18 New York Safety, 250 H. P.
Two 10-18x20 Payne tandem compound, 150 H. P. each.
One 13-19x15 McIntosh, Seymour & Co. tandem, 175 H. P.
Two 14x13 Armington & Sims, 150 H. P.
One 14x14 Rice automatic, 125 H. P.
One 13x12 Armington & Sims, 125 H. P.
One 12-20x12 Westinghouse compound, 100 H. P.
One 12x12 New York Safety, 100 H. P.
One 10½-16½x12 Armington & Sims cross compound, 100 H. P.
One 9x16 Rice automatic, 75 H. P.
One 12x10 Westinghouse Junior, 75 H. P.
One 8x10 B. F. Sturtevant, 40 H. P.
One 7x8 Payne, 20 H. P.
Three 6x5 Westinghouse Junior, 12 H. P. each,
Two 5x4 Westinghouse Junior, 6 H. P. each.

Direct current generators and motors, 110, 220 and 500 volts.
Alternating-current motors, 60 and 125 cycles.
Brush and Thomson-Houston arc generators—all sizes.
Babcock & Wilcox and water tube boilers.
Transformers, arc lamps, street railway motor equipments.

FOR SALE.

GENERATORS—500 Volts.

Two T. H., 500 K. W.
Four T. H., 270 K. W., arranged to be driven with a single pulley clutch coupling on each side of pulley.
One General Electric, 250 K. W.
One Westinghouse, 175 K. W.
Two General Electric, 100 K. W., 4 pole.
Two General Electric, 100 K. W., 6 pole.
Six Edison, No. 60, 175 K. W.
Six T. H., D62.
One Edison No. 20, 60 K. W.

GENERATORS—110 Volts.

Two 210 K. W., G. E. design, 14 pole, for direct connection, at a speed of 120 R. P. M.
Four 60 K. W. Edison.
Two 46 K. W. Edison.

ALTERNATING GENERATORS.

One 750 K.W., Westinghouse 60-cycle, 2-phase, 2,200 volt generator, belted to one 24 and 48x60 cross-compound condensing Cooper Corliss engine, complete.
Two 100 K. W., G.E. 3 phase, 60 cycle generator, complete.
Two 100 K. W., G. E., 1100 volts monocyclic, complete.
One 60 K. W., Westinghouse, 1100 volts.
One 35 K. W., Westinghouse, 1100 volts, complete.

STREET CAR EQUIPMENT.

One hundred and eighty 25 H. P. motors, new and complete with pinions, gear and gear cases.
One hundred and eighty "K" Controllers.
Twenty-five K-2 Controllers.

ENGINES.

Six 36 and 60x60, Cooper cross-compound, non-condensing, new, never shipped from factory.
One 30x54 St. Louis Corliss.
Two 24x60 Lane & Bodley, designed for rolling mill work.
One 28x60 Pennsylvania Iron Works Co.
One 20x48 Wheelock.
One 20x48 Double Wheelock.
One 20x42 Wheelock.
One 14x42 Hamilton Corliss.
Two 21x18 Armington & Sims.
Four 16 and 22x22 Houston, Stanwood & Gamble, cross-compound.
Five 12 and 20x16 tandem compound Ball.
Two 11 and 17x14 cross-compound Ideal.
Two 9 and 16x12 tandem compound Ball.
One 8 and 13x12 tandem compound Ball.
Three 17x18, Skinner, with air cylinders attached.
Two 16x20 Porter-Allen.
Two 15x20 Automatic Russell.
One 15½x15 Armington & Sims high speed simple automatic, 270 R. P. M.
One 15x15 Armington & Sims simple automatic, 270 R. P. M.
One 13½x15 Armington & Sims high speed simple automatic, 300 R. P. M.
One 14x17 Fisher, new.

BOILERS.

Four 66x18 with 66 4-inch tubes. A complete battery at a great bargain.
Three 66 x 14, with 66 4-inch tubes.
Two 72 in. x 18 ft., with 66 4-inch tubes.
Five 60x16 ft. high pressure boilers.
Two Sterling Water Tube Boilers, 250 H.P. each.
Two 500 H. P. Hazelton.

FERRIS WHEEL.

One 60 ft. Ferris Wheel, electrically driven.

AT A BARGAIN — A complete Edison 3-wire plant of 300 K. W. capacity.

It will be profitable to wire or write us giving requirements of machinery wanted or for sale.

CHEAP TICKETS TO COLORADO.

We are going to make it easy for people of moderate means to spend their vacations in Colorado this summer. In the average outing the two largest items of expense are those for transportation and board.

This is the way we are going to take care of the transportation item:

From June 1 to September 30 we will sell round-trip tickets to Denver, Colorado Springs and Pueblo at half fare plus 50 cents. This means $30 for the round trip from Chicago; $25 from St. Louis. Good returning until October 31, 1903.

From July 1 to July 10 the rates will be even lower. On these days round trip from Chicago will cost $25; from St. Louis $21. Good returning until August 31, 1903.

We figure that the board item will take care of itself, because Colorado has so many moderate-priced hotels and boarding houses. Excellent fare and good quarters can be had for as little as $8 to $10 per week.

Send for a copy of our "Colorado Handbook"—it's free. This handy little work tells just what you want to know about the hotels and boarding houses.

PRACTICAL FEATURES OF TELEPHONE WORK.

By A. E. DOBBS.

Cloth, 7 by 5 1-4 Inches. Illustrated. 134 pages. Appendix. 75 Cents.

THIS work is designed as a simple, plain-speaking handbook for the practical telephone man. Its author, Mr. Dobbs, has been eminently fitted by fourteen years' experience in telephony to deal with the subject in a thoroughly competent manner. This he has done, and the result is a mine of information, clearly and concisely presented, and invaluable to the manager, operator and lineman alike. The appendix contains reliable data regarding wires, resistance, inductive capacity, etc.

This or any other book on telephony or electricity sent to any address, postpaid, on receipt of price.

ELECTRICIAN PUBLISHING CO.,
510 MARQUETTE BUILDING, CHICAGO.

IMPORTANT TELEPHONE BOOKS.

THE TELEPHONE HANDBOOK. By Herbert Laws Webb. 16mo, 150 pp. Price $1.00.
This handbook is a reliable treatise on telephony, and a practical book on telephone working and management, based entirely on standard American practice. It is extremely useful to telephone inspectors and operators.

AMERICAN TELEPHONE PRACTICE. By Kempster B. Miller, M. E. 510 pp. 380 illustrations. Price $3.00.
This is the first complete treatise on telephony in the English language. The text is profusely illustrated by cuts of commercial apparatus and carefully prepared diagrams of circuits. No diagram is given without a full explanation. The apparatus, circuits and methods of the American Bell Telephone Company and of the various independent companies are fully described. The apparatus and methods used in making all of the tests required in commercial telephone work are fully treated.

THE INSPECTOR AND TROUBLE MAN. By A. E. Dobbs. 106 pp. Price $1.00.
A practical book, written in plain language. Full of information and diagrams for the operator, exchange manager, inspector, trouble man and lineman. A complete description of telephones, how to find and remedy their troubles, together with working plans for exchange construction, complete with diagrams of all up-to-date telephones and switchboards.

A, B, C, OF THE TELEPHONE. By J. E. Homans, A. M. 352 pp. 269 illustrations. Price $1.00.
Owing to the demand for a comprehensive book giving a clear, terse idea of the principles governing the construction, installation, care and management of telephones and their appliances, this book has been compiled. It has been the aim of the author to make this the most complete elementary book on this subject for the practical electrician, wireman, lineman and engineer, and it is written in a clear and careful style.

THE PRACTICAL TELEPHONE HANDBOOK. By Joseph Poole, A. I. E. E. Second edition, revised and enlarged. 360 pp. 288 illustrations. Price $1.50.
In this work the writer has endeavored to produce a manual of moderate size and cost, but thoroughly practical, and detailing, as far as space will allow, the most recent methods of telephone working. While the requirements of telephone employes have been kept constantly in view it is fully intended also that the book shall be of service as a source of information on telephonic matters to users of the telephone and to the public generally.

PRACTICAL FEATURES OF TELEPHONE WORK. By A. E. Dobbs. 134 pp. Price 75 cents.
A simple, plain-speaking handbook for the practical telephone man.

TELEPHONE TROUBLES AND HOW TO FIND THEM. A complete handbook for telephone inspectors. By W. Hyde and J. H. McManman, edited by Prof. C. H. Haskins. Eighth edition. 16mo, 48 pp. Price 25 cents.
This little volume is an extremely practical work for telephone employes, written in a popular style and devoid of technicalities.

TELEPHONE LINES AND THEIR PROPERTIES. By Wm. J. Hopkins. Sixth edition. 272 pp. Illustrated. Price $1.50.

A MANUAL OF TELEPHONY. A new and large edition. By W. H. Preece, F. R. S., and A. J. Stubbs. 508 pp. 333 illustrations. Price $4.50.

TELEPHONES, THEIR CONSTRUCTION AND FITTING. A Practical Manual on the Fitting Up and Maintenance of Telephone and Auxiliary Apparatus. By F. C. Allsop. 191 pp. 168 illustrations. Price $1.25.

TELEPHONING OF GREAT CITIES. By Bennett. Paper. Price 35 cents.

MAGNETO HAND TELEPHONE. Its Construction, Fitting Up and Adaptability to Everyday Use. By Hughes. 80 pp. 23 illustrations. Price $1.00.

ELECTRICAL TRANSMISSION OF INTELLIGENCE AND OTHER ADVANCED PRIMERS OF ELECTRICITY, treating on the telegraph, telephone, etc. By E. J. Houston. 330 pp. 88 illustrations. Price $1.00.

The Above, or Any Other Electrical Work Published, Sent on Receipt of Price.

ELECTRICIAN PUBLISHING CO., Suite 510 Marquette Building, CHICAGO, ILL.

ONE DOLLAR EACH.

The Inspector AND Trouble Man.

By A. E. DOBBS.

Full of information and diagrams for the operator, exchange owner, exchange manager, inspector, trouble man, lineman.

A complete description of telephones and their troubles. How to find and remedy them, together with working plans for exchange construction, complete with diagrams of all up-to-date telephones and switchboards.

This is a practical book, written in **plain language**, and for **anyone** interested in telephony.

Mailed anywhere on receipt of price . . . ONE DOLLAR.

No technicalities. Substantially bound in cloth.

ELECTRICIAN PUBLISHING CO.,
510 MARQUETTE BUILDING, CHICAGO.

SUBSCRIPTIONS.

With January 1st began the thirty-second volume of the WESTERN ELECTRICIAN, and during 1903 it will complete its sixteenth and the first half of its seventeenth year, the paper having been founded July 2, 1887, and continued under the present management for this entire period. We offer the past as a guaranty of the future, and in addition pledge the best efforts of an experienced and competent staff to the constant improvement of the paper.

The WESTERN ELECTRICIAN is published for the purpose of assisting everyone interested in the art. It is a general electrical and scientific paper, and gives to its readers all the latest news and keeps them thoroughly informed of everything that is going on in all the different departments of the electrical and allied fields. Its technical and scientific articles cover all the latest inventions and improvements and keep the reader thoroughly informed of all that is new in the art. Its special articles, written by the most prominent authorities, as well as its general articles, are of the highest order, and no interested person can afford to be without the paper.

SUBSCRIPTION PRICE PER YEAR OF FIFTY-TWO NUMBERS

In the United States $3.00

Announcement

The Westinghouse Air Brake Co.'s

New Multiple Unit System of Electric Train Control is the simplest, the safest, the most compact, the most reliable, the most economical of all in use. All other systems are cumbrous and complicated.

Observe how little space our system occupies on a Railway Car.

Now you see why we speak of the "Turret" Controller.

Our new controller is in the little turret under the car.

The circuit-breaking power of our turret controller is fifty times greater than that of any other controller.

Our turret system has other advantages—greater blow-out capacity; greater uniformity of action; unequaled arrangement of contacts; an automatic accelerating device. There are more advantages than can be told on this page.

Another new Westinghouse invention is the Automatic Coupler, which in one operation couples the air-brake hose, the Multiple Unit connections, and the lighting and heating connections.

We invite Railway Officials to inspect these inventions at our Pittsburg works.

PARAGON DESK FAN

CHICAGO EDISON COMPANY, 139 Adams St., CHICAGO.

EDISON TELEPHONE LAMPS

ARE THE

STANDARD FOR VISUAL SIGNALS.

They save the exchange time and money because every lamp is perfect—sure to fit—sure to burn. The life is extremely long—running into years.

Be sure to get the EDISON.

EDISON DECORATIVE AND MINIATURE LAMP DEPARTMENT

GENERAL ELECTRIC COMPANY,

Harrison, N. J.

CHICAGO OFFICE: Monadnock Block. Sales Offices in All Large Cities.

New Standard Specialties.

DRY CELL.

If kept out of the sun, in a cool dry place, this cell will not run down on the shelf in two years, and at the end of that time will be as good as other makes fresh from the factory. To maintain its superiority to all others, no expense is spared, and only the best materials and chemicals are used in its manufacture

This cell will save the consumer money, because a fewer number will perform a given amount of work four times as long as any other cell of equal size.

ELECTROMOTIVE FORCE, 1.52 VOLTS.
CURRENT, - 14 TO 18 AMPERES.

ELECTROLYSIS-PROOF

UNDERGROUND CONDUIT

OUR CONDUIT IS { *Absolutely— Electrolysis-Proof, Non-Abrasive, Moisture-Proof, Non-Corrosive, Perfect Insulator.* }

Insulation Test, **66,000 VOLTS.**

A perfect joint which is self-aligning, making the conduit line a solid tube from manhole to manhole.

Construction simple, rapid and inexpensive, requires no skilled labor.

Cables drawn more easily and a longer distance than in any other.

Resistance strength when underground as great as any.

Life of Conduit everlasting. Asphalt never deteriorates.

BRANCHES: New York, Philadelphia, Boston. Elizabethport, N. J.

EUREKA WINS.

Defeats American Electric Telephone Company and J. B. Overshiner In Patent Suits.

Friday, June 19th, 1903, Judge Shiras of the United States Circuit Court for the northern district of Iowa, sitting at Dubuque, dismissed all suits filed in the Meissner and Overshiner patent suits, against the County Telephone & Telegraph Company of Waterloo, Iowa. These suits were filed by the American Electric Company and J. B. Overshiner of Chicago and were defended by the Eureka Electric Company of Chicago in making good their guarantees to users of Eureka apparatus.

The Eureka Electric Company wishes to reassure its patrons that it stands back of all of its guarantees and will defend any and all suits that may be filed against its patrons for the use of its apparatus on any claims of alleged infringement.

Our new handsome catalogue No. 23 is now being distributed. If you have not received a copy, send for it at once.

EUREKA ELECTRIC CO.

GENOA, ILL. CHICAGO, ILL.

OUR CHICAGO FACTORY

Engaged in the manufacture of telephone and switchboard apparatus exclusively for Independent Telephone Exchanges. Present daily output greater than that of any other four factories combined, and the demand for high-grade apparatus has made it.

OUR FINISHED PRODUCT

Switchboard of the Glen Telephone Co., Utica, N. Y. Capacity, 12,000 lines. Present equipment, 2,400 lines.

OUR ROCHESTER FACTORY

Engaged in the manufacture of cords, cable and insulated wire.

CHICAGO, ILLINOIS.

Announcement

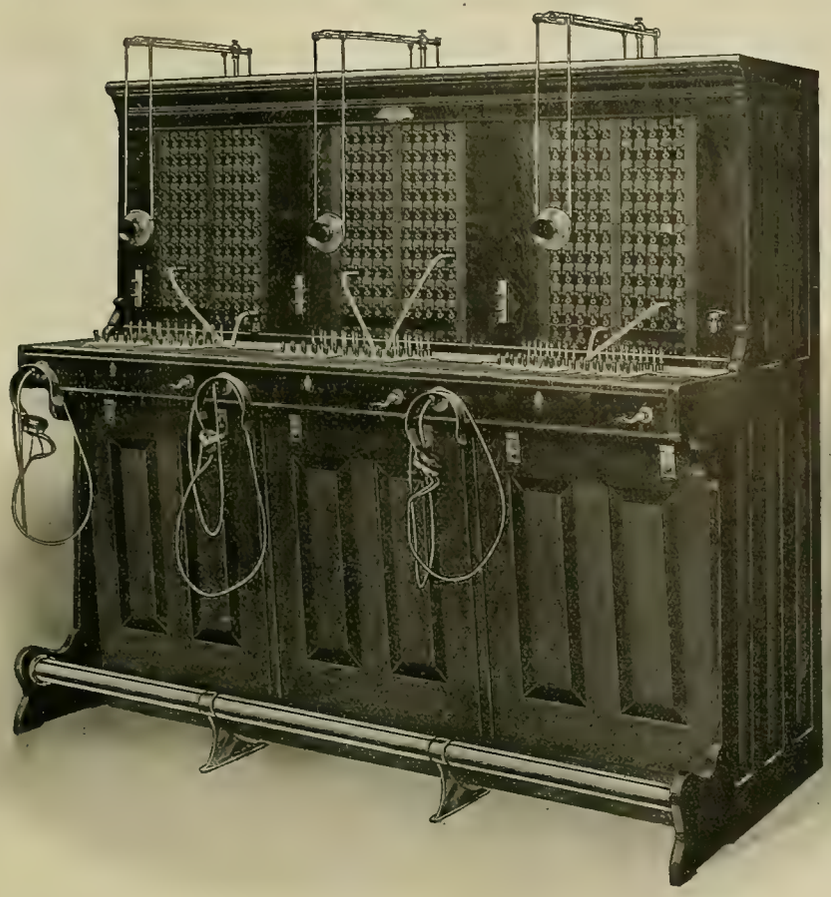
Owing to various rumors recently circulated by competitors relative to the control of this company as to its ability and willingness to carry out future contracts for Independent telephone apparatus, we feel that the Independent telephone interests which are our present and prospective customers are entitled to some statement from us.

We desire to assure our present and prospective customers that the business of this company will be continued in the future as in the past.

To assure customers of our entire good faith and intentions to continue in business as heretofore, we will furnish bonds to customers insuring the fulfillment of our contracts for new apparatus or for the furnishing of extensions of existing exchanges for a period of five years. Our customers will be as fully protected as ever.

Kellogg Switchboard & Supply Company

CHICAGO



Kellogg Apparatus IS NO EXPERIMENT

Experimental systems are expensive at any price.

It is not necessary for the purchaser to carry on experimental work for the manufacturer when operating Kellogg apparatus.

Two and a half years of positively successful work in the largest exchange in this country without any material change in the system is the best kind of guarantee. This period of time is a year and a half longer experience with standard multiple boards than that of any other independent telephone manufacturing company.

KELLOGG SWITCHBOARD & SUPPLY COMPANY,

AMERICAN ELECTRIC TELEPHONE CO.

MANUFACTURERS OF
HIGH GRADE TELEPHONE APPARATUS
36 TO 58 WEST JACKSON BOULEVARD

CHICAGO, June 8th 1903.

INDEPENDENT TELEPHONE OPERATING COMPANIES

Gentlemen-

In view of the confirmation of the Kellogg sale to the Bell Company (sale made about sixteen months past) and of the persistent rumors of another Bell affiliation, we take this occasion to reassure the independent operating companies that they need fear no embarrassment in securing extensions to their present switchboards and apparatus.

THIS COMPANY IS PREPARED TO MAKE ALL DIES AND TOOLS, TO PRACTICALLY DUPLICATE ANY PARTS OF APPARATUS HERETOFORE MADE BY ANY OTHER MANUFACTURER.

We have always been independent and have won many important patent suits effecting all makes of independent apparatus. If you will continue to co-operate with us, the Bell Company can work no injury by acquiring the alleged independent factories.

The reason recent patent suits have been won and other suits brought by the Bell Company, against these alleged independent factories, is now easily understood.

AMERICAN ELECTRIC TELEPHONE COMPANY
P. C. Burns, President.

P. S. We have already arranged to build a new factory double the capacity of our present ones.

FOR SALE.

GENERATORS—500 Volts.

Two T. H., 500 K. W.
Four T. H., 270 K. W., arranged to be driven with a single pulley clutch coupling on each side of pulley.
One General Electric, 250 K. W.
One Westinghouse, 175 K. W.
Two General Electric, 100 K. W., 4 pole.
Two General Electric, 100 K. W., 6 pole.
Six Edison, No. 60, 175 K. W.
Six T. H., D62.
One Edison No. 20, 60 K. W.

GENERATORS—110 Volts.

Two 210 K. W., G. E. design, 14 pole, for direct connection, at a speed of 120 R. P. M.
Four 60 K. W. Edison.
Two 46 K. W. Edison.

ALTERNATING GENERATORS.

One 750 K. W., Westinghouse 60-cycle, 2-phase, 2,200 volt generator, belted to one 24 and 48x 60 cross-compound condensing Cooper Corliss engine, complete.
Two 100 K. W., G.E. 3 phase, 60 cycle generator, complete.
Two 100 K. W., G. E., 1100 volts monocyclic, complete.
One 60 K. W., Westinghouse, 1100 volts.
One 35 K. W., Westinghouse, 1100 volts, complete.

STREET CAR EQUIPMENT.

One hundred and eighty 25 H. P. motors, new and complete with pinions, gear and gear cases.
One hundred and eighty "K" Controllers.
Twenty-five K-2 Controllers.

ENGINES.

Six 36 and 60x60, Cooper cross-compound non-condensing, new, never shipped from factory.
One 30x54 St. Louis Corliss.
Two 24x60 Lane & Bodley, designed for rolling mill work.
One 28x60 Pennsylvania Iron Works Co.
One 20x48 Wheelock.
One 20x48 Double Wheelock.
One 20x42 Wheelock.
One 14x42 Hamilton Corliss.
Two 21x18 Armington & Sims.
Four 16 and 22x22 Houston, Stanwood & Gamble, cross-compound.
Five 12 and 20x16 tandem compound Ball.
Two 11 and 17x14 cross-compound Ideal.
Two 9 and 16x12 tandem compound Ball.
One 8 and 13x12 tandem compound Ball.
Three 17x18, Skinner, with air cylinders attached.
Two 16x20 Porter-Allen.
Two 15x20 Automatic Russell.
One 15½x15 Armington & Sims high speed simple automatic, 270 R. P. M.
One 15x15 Armington & Sims simple automatic, 270 R. P. M.
One 13½x15 Armington & Sims high speed simple automatic, 300 R. P. M.
One 14x17 Fisher, new.

BOILERS.

Four 66x18 with 66 4-inch tubes. A complete battery at a great bargain.
Three 66 x 14, with 66 4-inch tubes.
Two 72 in. x 18 ft., with 66 4-inch tubes.
Five 60x16 ft. high pressure boilers.
Two Sterling Water Tube Boilers, 250 H.P. each.
Two 500 H. P. Hazelton.

FERRIS WHEEL.

One 60 ft. Ferris Wheel, electrically driven.

AT A BARGAIN — A complete Edison 3-wire plant of 300 K. W. capacity.

ONE DOLLAR EACH.

GOOD BOARD IN COLORADO, $8 A WEEK

The idea that it costs a "mint of money" to spend a vacation in Colorado is all wrong. On the contrary, it is a fact that no other summer resort state has so many moderate-priced hotels and boarding houses

Comfortable places, where one can get splendid fare and excellent quarters for $8 to $10 a week, are to be found in all sections of the state. Of course those who prefer to spend more can find hotels to suit their tastes.

The cost of a visit to Colorado will, of course, depend on the length of your stay. At Manitou, Colorado Springs and Glenwood Springs a good room and first-class board can be had for $14 a week and upward. During the summer months the strictly first-class hotels charge $17.50 a week, and in some cases $20, $25 and even $30. At all of Colorado's resorts are hotels which provide good accommodations for as little as $8 or $10 a week. Boarding houses ask even less—$25 to $35 a month. Excluding railroad fare to and from Colorado $75 is a liberal estimate of the cost of a month's stay in the mountains. In actual practice it is likely that the majority of the people who visit Colorado spend little more than $50 a month for their board, lodging and amusements.

Send for a free copy of our "Colorado Handbook"—it tells just what you want to know about the hotels and boarding houses.

IMPORTANT TELEPHONE BOOKS.

THE TELEPHONE HANDBOOK. By Herbert Laws Webb. 16mo, 150 pp. Price $1.00.
This handbook is a reliable treatise on telephony, and a practical book on telephone working and management, based entirely on standard American practice. It is extremely useful to telephone inspectors and operators.

AMERICAN TELEPHONE PRACTICE. By Kempster B. Miller, M. E. 510 pp. 380 illustrations. Price $3.00.
This is the first complete treatise on telephony in the English language. The text is profusely illustrated by cuts of commercial apparatus and carefully prepared diagrams of circuits. No diagram is given without a full explanation. The apparatus, circuits and methods of the American Bell Telephone Company and of the various independent companies are fully described. The apparatus and methods used in making all of the tests required in commercial telephone work are fully treated.

THE INSPECTOR AND TROUBLE MAN. By A. E. Dobbs. 106 pp. Price $1.00.
A practical book, written in plain language. Full of information and diagrams for the operator, exchange manager, inspector, trouble man and lineman. A complete description of telephones, how to find and remedy their troubles, together with working plans for exchange construction, complete with diagrams of all up-to-date telephones and switchboards.

A, B, C, OF THE TELEPHONE. By J. E. Homans, A. M. 352 pp. 269 illustrations. Price $1.00.
Owing to the demand for a comprehensive book giving a clear, terse idea of the principles governing the construction, installation, care and management of telephones and their appliances, this book has been compiled. It has been the aim of the author to make this the most complete elementary book on this subject for the practical electrician, wireman, lineman and engineer, and it is written in a clear and careful style.

THE PRACTICAL TELEPHONE HANDBOOK. By Joseph Poole, A. I. E. E. Second edition, revised and enlarged. 360 pp. 288 illustrations. Price $1.50.
In this work the writer has endeavored to produce a manual of moderate size and cost, but thoroughly practical, and detailing, as far as space will allow, the most recent methods of telephone working. While the requirements of telephone employes have been kept constantly in view it is fully intended also that the book shall be of service as a source of information on telephonic matters to users of the telephone and to the public generally.

PRACTICAL FEATURES OF TELEPHONE WORK. By A. E. Dobbs. 134 pp. Price 75 cents.
A simple, plain-speaking handbook for the practical telephone man.

TELEPHONE TROUBLES AND HOW TO FIND THEM. A complete handbook for telephone inspectors. By W. Hyde and J. H. McManman, edited by Prof. C. H. Haskins. Eighth edition. 16mo, 48 pp. Price 25 cents.
This little volume is an extremely practical work for telephone employes, written in a popular style and devoid of technicalities.

TELEPHONE LINES AND THEIR PROPERTIES. By Wm. J. Hopkins. Sixth edition. 272 pp. Illustrated. Price $1.50.

A MANUAL OF TELEPHONY. A new and large edition. By W. H. Preece, F. R. S., and A. J. Stubbs. 508 pp. 333 illustrations. Price $4.50.

TELEPHONES, THEIR CONSTRUCTION AND FITTING. A Practical Manual on the Fitting Up and Maintenance of Telephone and Auxiliary Apparatus. By F. C. Allsop. 191 pp. 168 illustrations. Price $1.25.

TELEPHONING OF GREAT CITIES. By Bennett. Paper. Price 35 cents.

MAGNETO HAND TELEPHONE. Its Construction, Fitting Up and Adaptability to Everyday Use. By Hughes. 80 pp. 23 illustrations. Price $1.00.

ELECTRICAL TRANSMISSION OF INTELLIGENCE AND OTHER ADVANCED PRIMERS OF ELECTRICITY, treating on the telegraph, telephone, etc. By E. J. Houston. 330 pp. 88 illustrations. Price $1.00.

The Above, or Any Other Electrical Work Published, Sent on Receipt of Price.

The Westinghouse Air Brake Co.

New Multiple Unit System of Electric Train Control cuts off current when brakes are applied.

Brakes are applied and current cut off if motorman removes his hand.

Circuit breaker on every car opened and closed at will by motorman providing independent emergency method for instantly cutting off current from all motors.

All these operations automatically take place on each car if train breaks apart.

Fire risks reduced. Fourteen volt storage battery current used. There is no heavy motor current carried through the train at line pressure.

The new system is electro-pneumatic.

It is operated by compressed air controlled by storage battery magnets. It is independent of line current. It is not affected by sleet, snow, ice, defective contact with third-rail, or by fluctuating voltage.

Instead of blowing fuses, any excessive current will open circuit breaker.

Circuit breaker closed again instantly by motorman without leaving his cab.

A long break made with very great power prevents any freezing shut of contactors. The method employed is fifty times more reliable than any contactor built by other makers.

Trains accelerated automatically at just the right speed with just the right amount of current. All trains work exactly alike. A road using any non-automatic system requires between 10% and 20% additional power to move the same train tonnage.

Our automatic system uses much less power than any all-electric system for operating the controller.

Weight is less than any other system.

Then there is the new Westinghouse Automatic Coupler, which in one operation couples the air brake hose, the multiple unit connections, and the lighting and heating connections.

We invite Railway Officials to inspect these inventions at our Pittsburg works.

The Nernst

Quality of Light

Reading Room illuminated by Nernst Lamps

Telephone Exchange illuminated by Nernst Lamps

is especially valuable where the conditions call for perfect steadiness and softness, free from any irritating glare.

Any Electrical Supply Dealer

will mail you Booklet No. 6 describing the many advantages of The Nernst, both in efficiency and economy, as compared with the ordinary incandescent,

or address nearest sales office of Nernst Lamp Co.

Sales Offices: Pittsburg, Fayette Street and Garrison Place; New York, Equitable Building; Boston, Board of Trade Building; Philadelphia, Real Estate Trust Building; Chicago, National Life Building.
